

The Property of Bystra (English Version)

The PoB Notes

The Property of Bystra

I have no copyright and I don't want to.

But I have a God watching over the dishonesty of a handful who take advantage of the copyright in these notes.

Please be honest everything you do.

Life is only temporary.

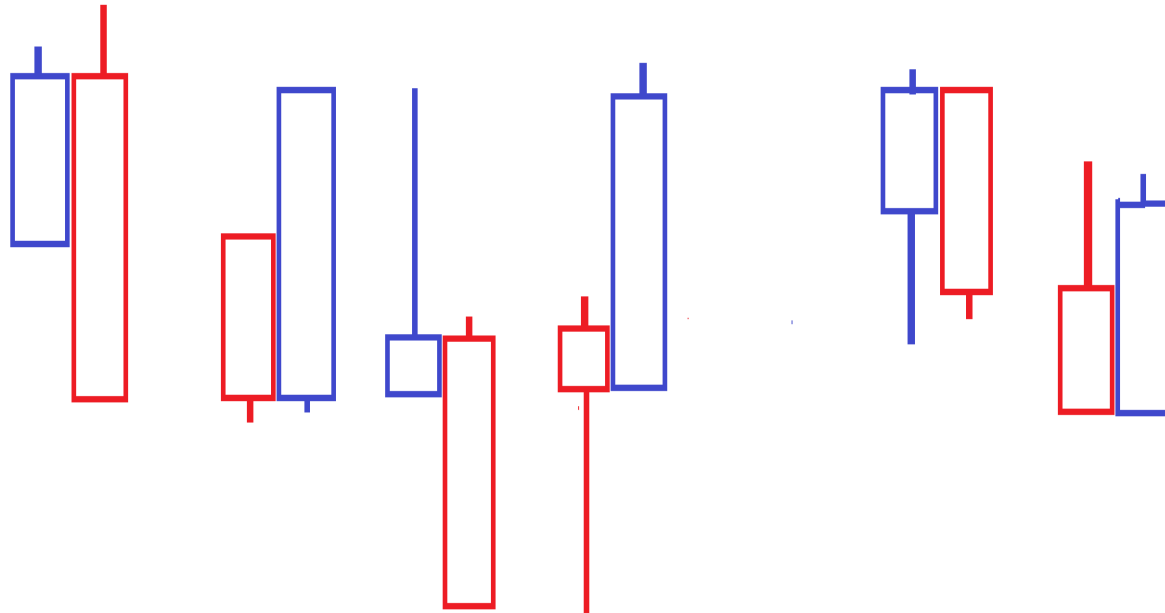

The blessing, an honest is more valuable than luxurious and the contents of the world.

- Nora

Quotes

“ Multi timeframe analysis is behind every great setup”

The Engulf

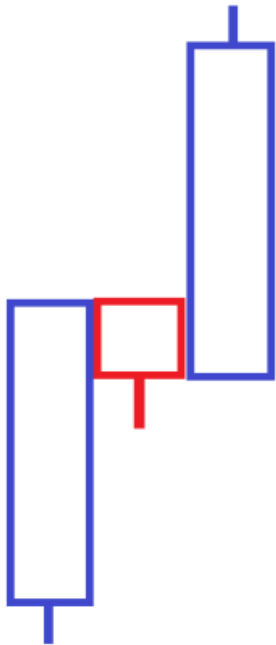

Please be familiar with Engulfing candle. There are many kinds of engulfing.
Because we are going to use it as an entry point or confirmation. It's very important yeah

Entry Point

There are only 4 types of Entry Point

- **RBR** (Rally Base Rally)
- **DBD** (Drop Base Drop)
- **RBD** (Rally Base Drop)
- **DBR** (Drop Base Rally)

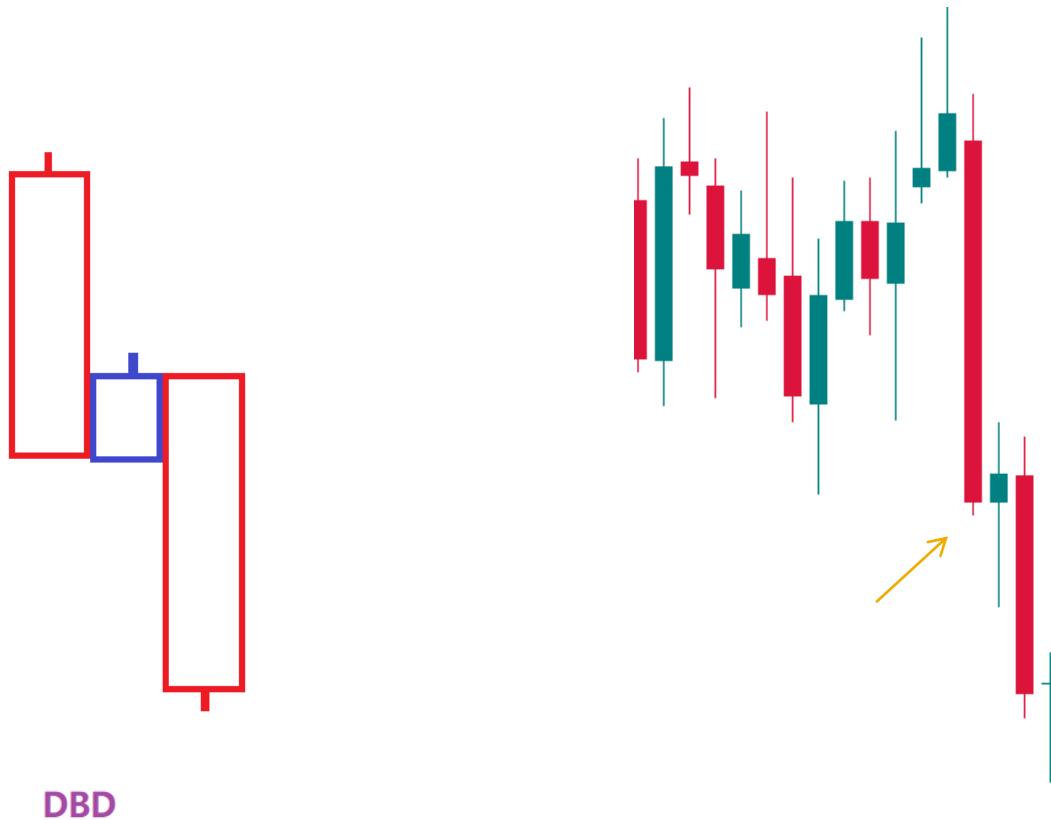

1. RBR (Rally Base Rally)

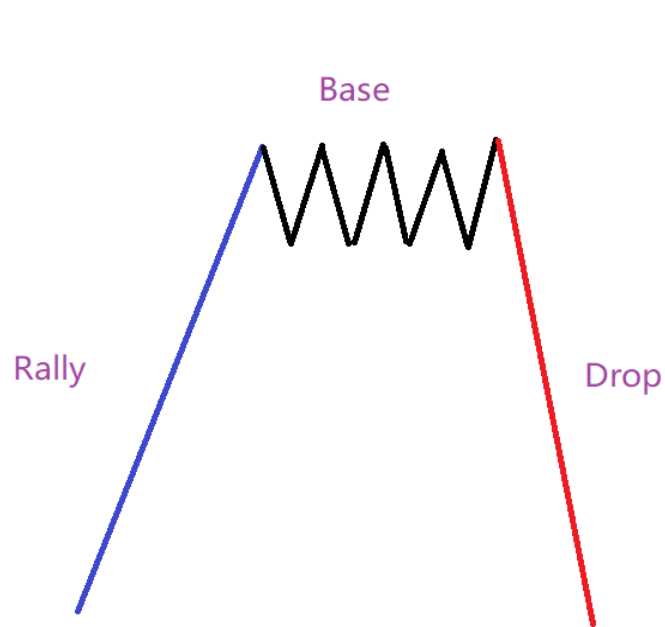

RBR

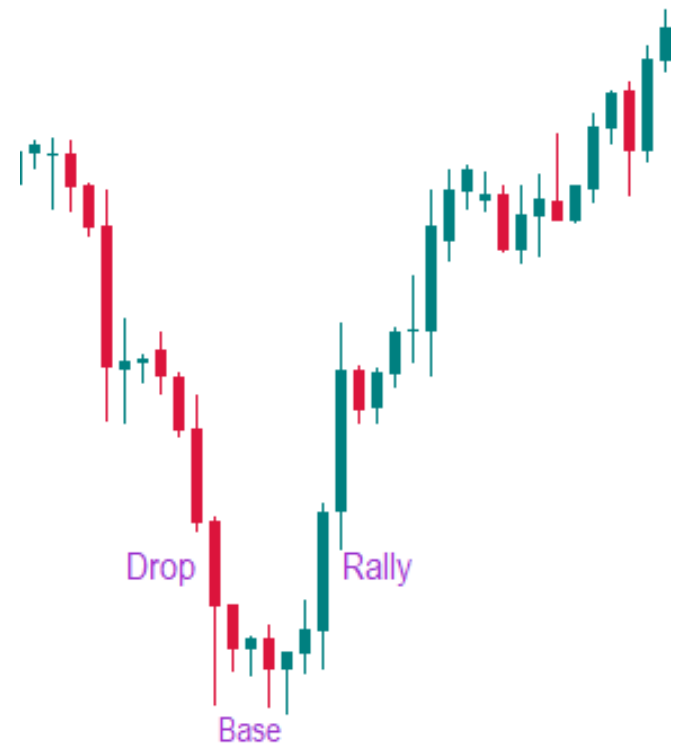

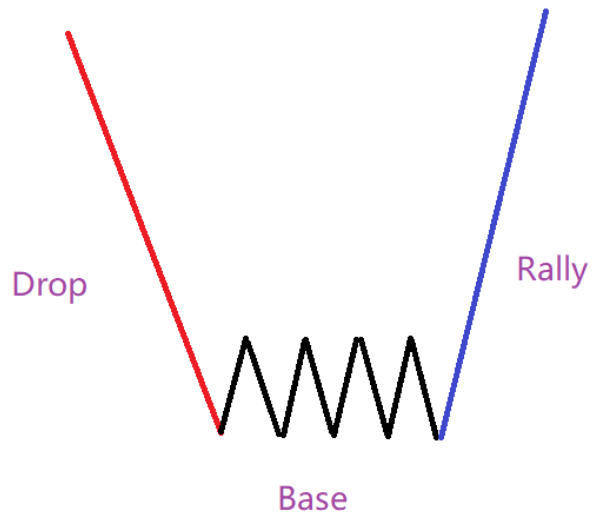

2. DBD (Drop Base Drop)

3. RBD (Rally Base Drop)

4. DBR (Drop Base Rally)

Movement

- Reversal
- Continuation
- Sideways

Reversal

Market is changing direction from uptrend to
downtrend.

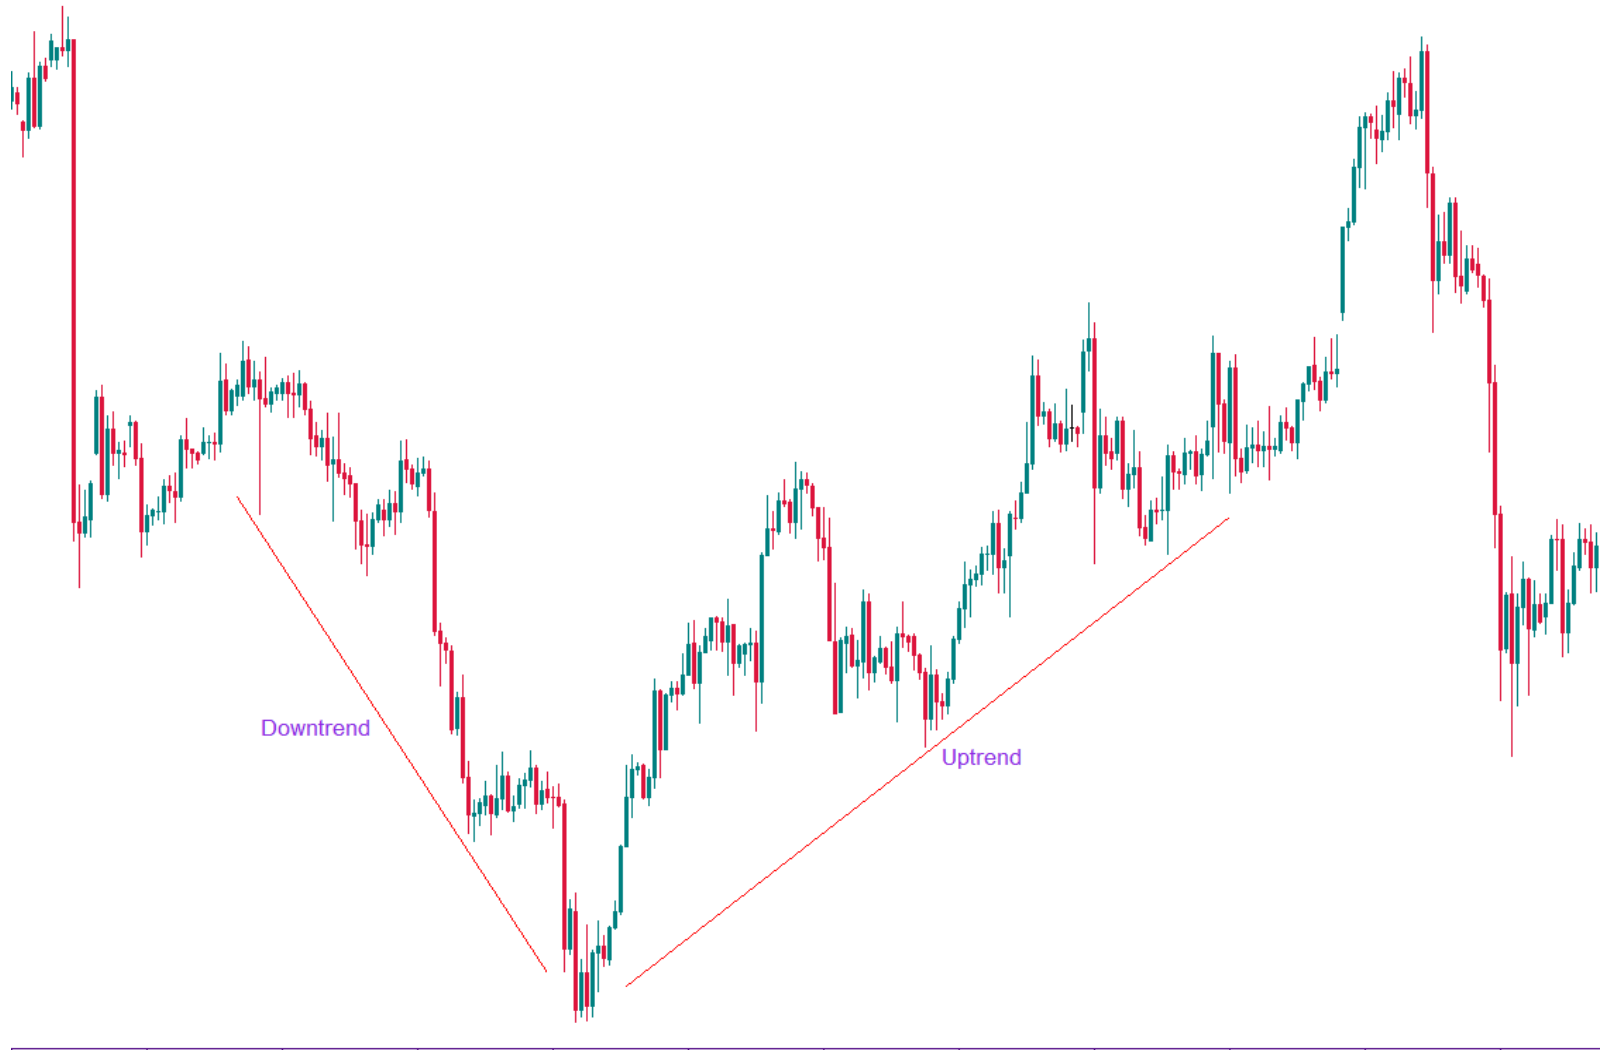

Or

From downtrend to uptrend

Reversal

Reversal

Continuation

Market is moving one way.

Whether it is uptrend,

Or

Downtrend

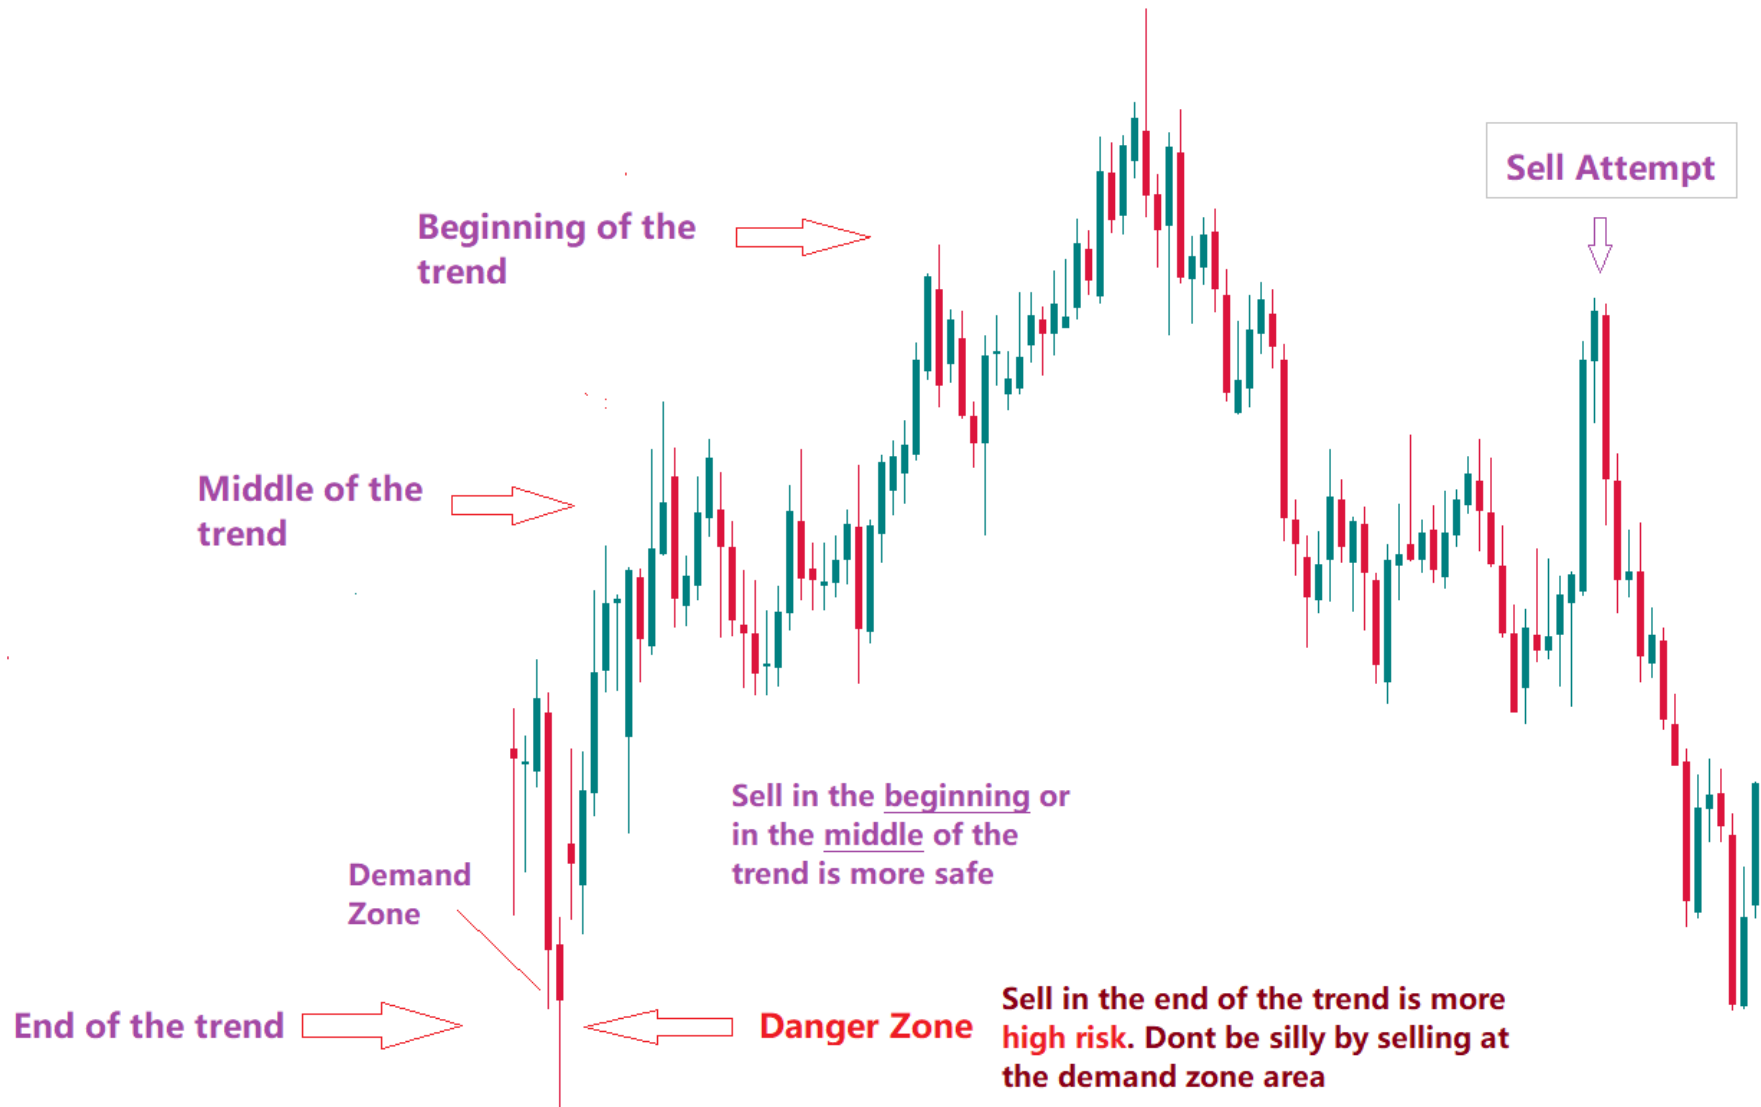

Continuation (Uptrend)

Continuation (Downtrend)

Danger Zone in a Trend (Sell)

Danger Zone in a Trend (Buy)

Confirmation

Before entry, look for a **setup**

Then, if you found setup, look for a **confirmation**

How to find a confirmation?

= **By Multi Time Frame Analysis**

Multi Time Frame Analysis

The best confirmation is in the
Engulfing Candle Body

For example,

In **Lower TF**, price made snrc2 setup

In **Higher TF**, price made Engulfing Candle

Let's check it out..

Confirmation (Examples)

Confirmation (Example 2)

Confirmation (Example 3)

Setup SNRC2

Entry

Engulfing Candle

Entry

Confirmation (Example 4)

Confirmation

But, the confirmation is **not only** in the form of **engulfing**.

Confirmation can also be in the **body candle**, as long as the price does not touch the "**end of the trend**" because it will be more **high risk**

The thing is, please **always keep switching timeframe to look for a confirmation** if you found a setup.

The Setups

For me, setups are the **chances** for us to take position in the market with more **precise and safe**.

With setups, we **don't entry blindly**.

Setups also are **part of the plan**.

Big Player's plan. Whether you **win**, or you **lose**.

Type of Setups

1. Hybrid 1 (Reversal)
2. Hybrid 2 (Reversal)
3. SNRC1 (Continuation)
4. SNRC2 (Continuation)
5. SNRC3 (Continuation)
6. QMR (Reversal)
7. QMM (Reversal)
8. QMC (Continuation)
9. Manipulation (Reversal)
10. CLAB (Neutral)
11. Blindspot (Reversal)
12. QM2P (Reversal)

1. Hybrid Setup (Type 1)

Hybrid Setup 1 is a '**hint**' to traders that this setup is valid or not through the price touch in **Danger Zone**.

If the price has touched **Danger Zone**, this setup is **invalid**.
And if this setup has not touched **Danger Zone**, this price is **still valid**.

But be careful, hybrid setup 1 is in reversal category.
It means, this setup is **High Risk**

Hybrid 1 Formula

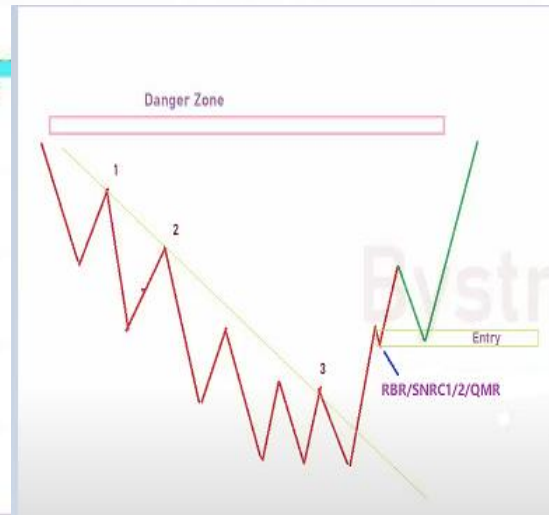

1. Price **reverse** indicates that the **trend is over**
2. Price retest at **RBR / DBD / QMR**
3. Make sure after the price reverse, it doesn't touch the **Danger Zone**

Hybrid 1 Formula (Picture)

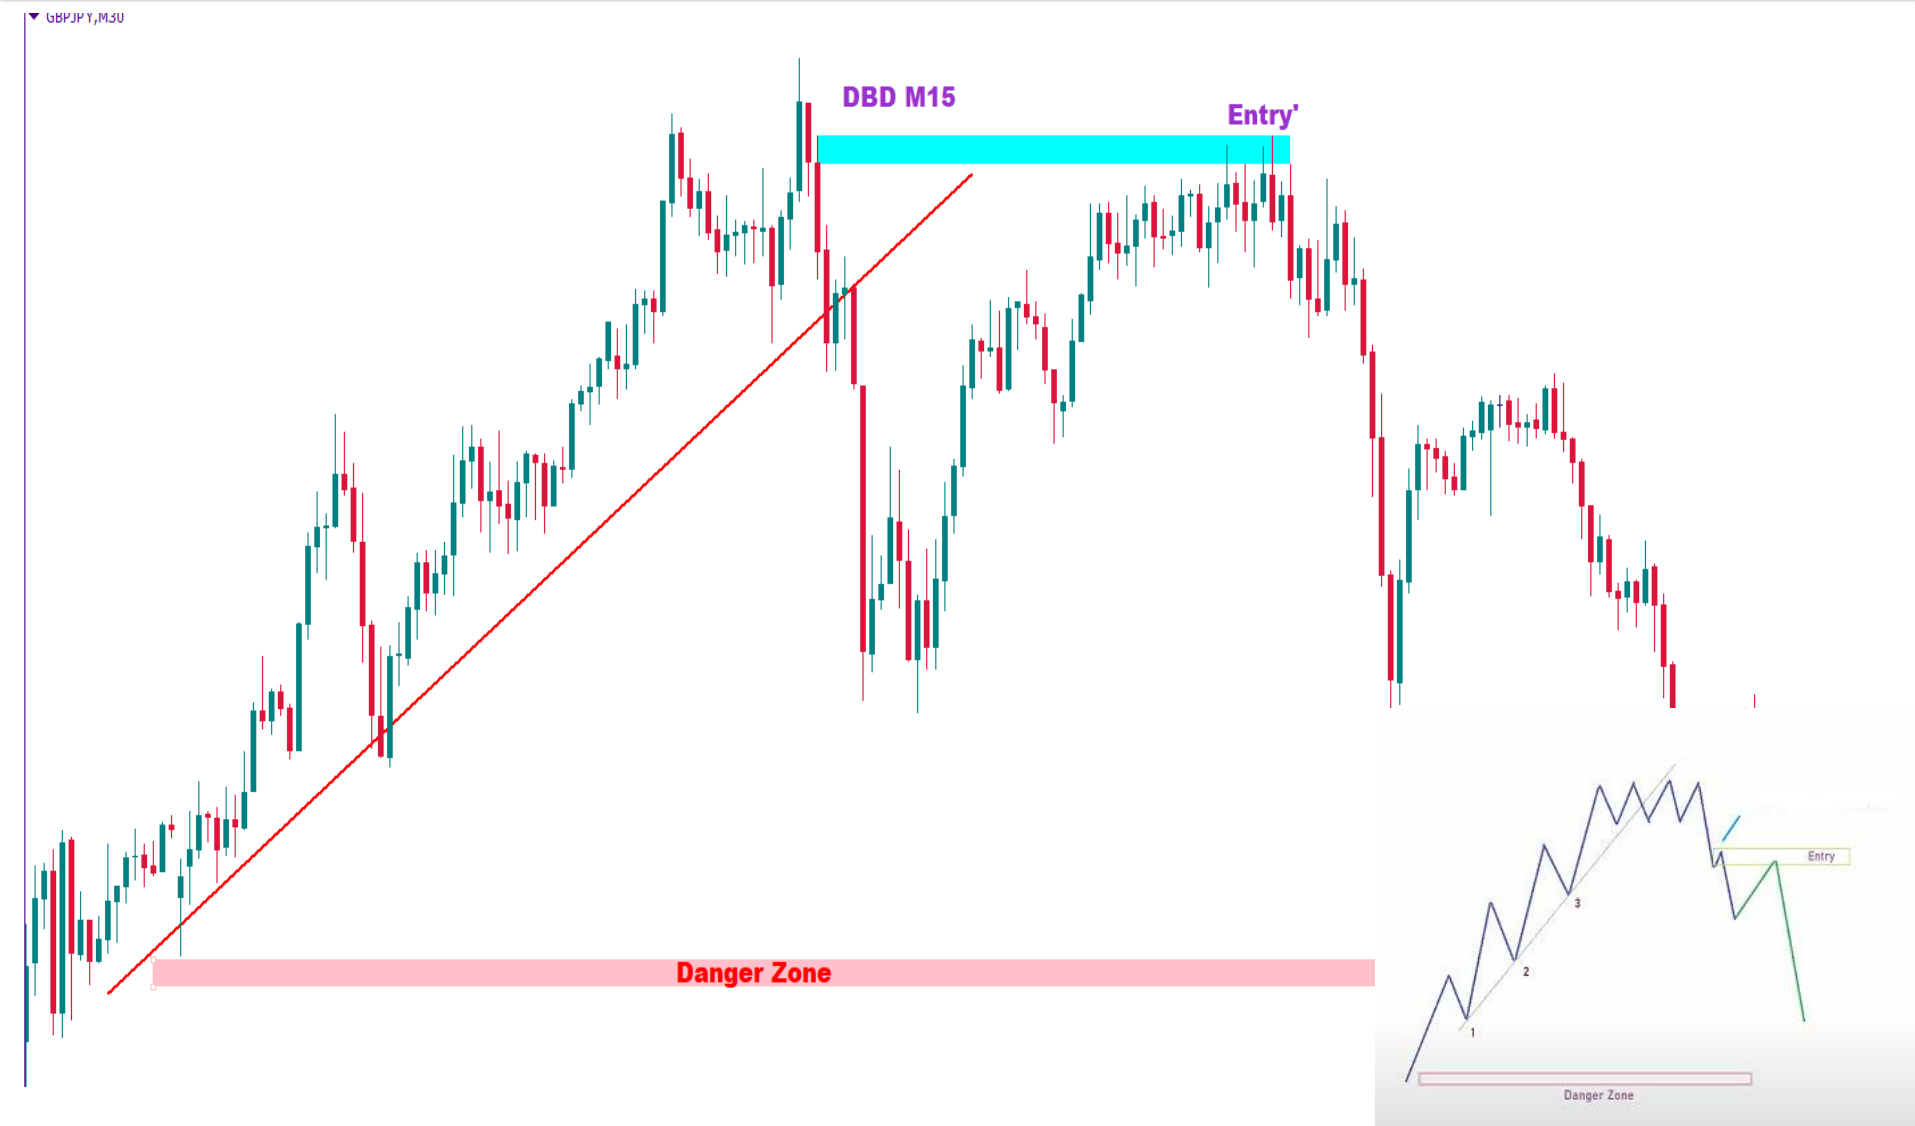

Hybrid 1 (Example 1)

CADCHF, M30

Hybrid 1 (Example 2)

Warning!

Hybrid 1 is not my favorite setup because it is very **High Risk** and this setup is also frequently used by most traders.

Therefore, I always "**FAST**" Hybrid 1 setup to avoid my equity being exposed to very **high risk**.

Hybrid 1 Ends

Hybrid 2 Setup

Hybrid 2 is a "**twin**" to the Hybrid 1 setup.

But, there are a **few differences** in the Hybrid 2 setup.

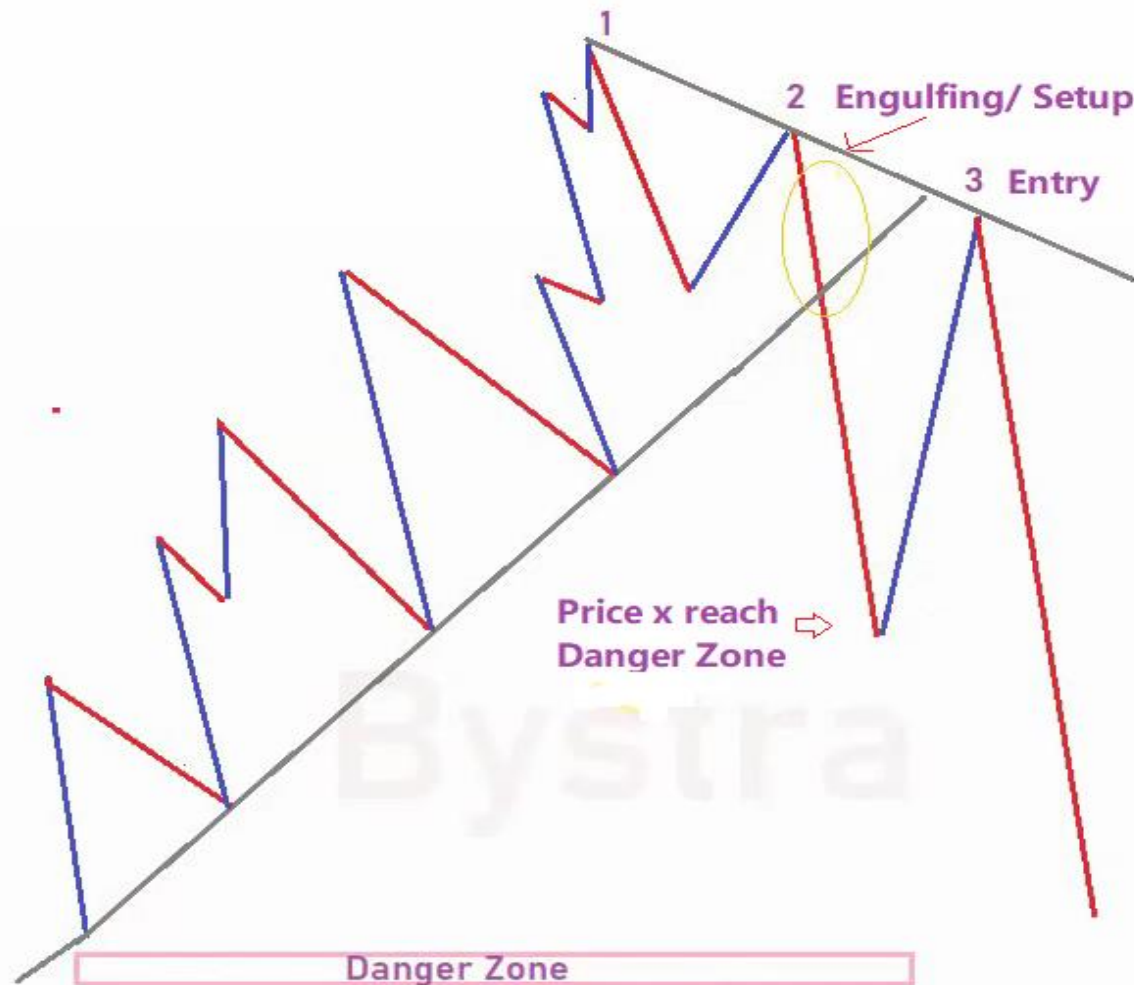

It is in addition **to trendline / confluence** and **multi time frame analysis**

Let's see what the Hybrid 2 formula is

Hybrid 2 Formula

1. Price reverse indicates the trend is over
2. There are parallel trendlines / confluences 1 and 2. Make sure the second trendline breaks the previous trend.
3. Switch to a larger TF to see if there is engulfing or candle reversal
4. Entry in the third trendline.

Hybrid 2 formula (Picture)

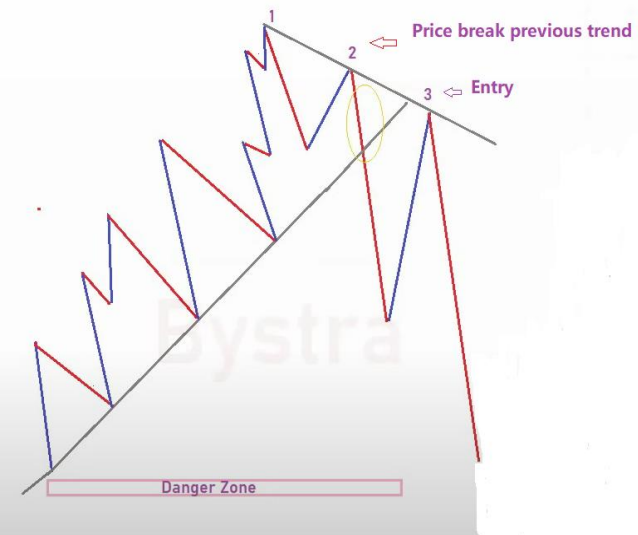

Hybrid 2 (Example 1)

Hybrid 2 (Example 2)

EURCAD,H1

Hybrid 2 (Example 3)

Hybrid 2 (Example 4)

Hybrid 2 (Example 5)

Hybrid 2 Ends

SNRC1

SNRC1 means SnR Continuation 1

This setup is **very simple** and it occurs only in **continuation trend**.

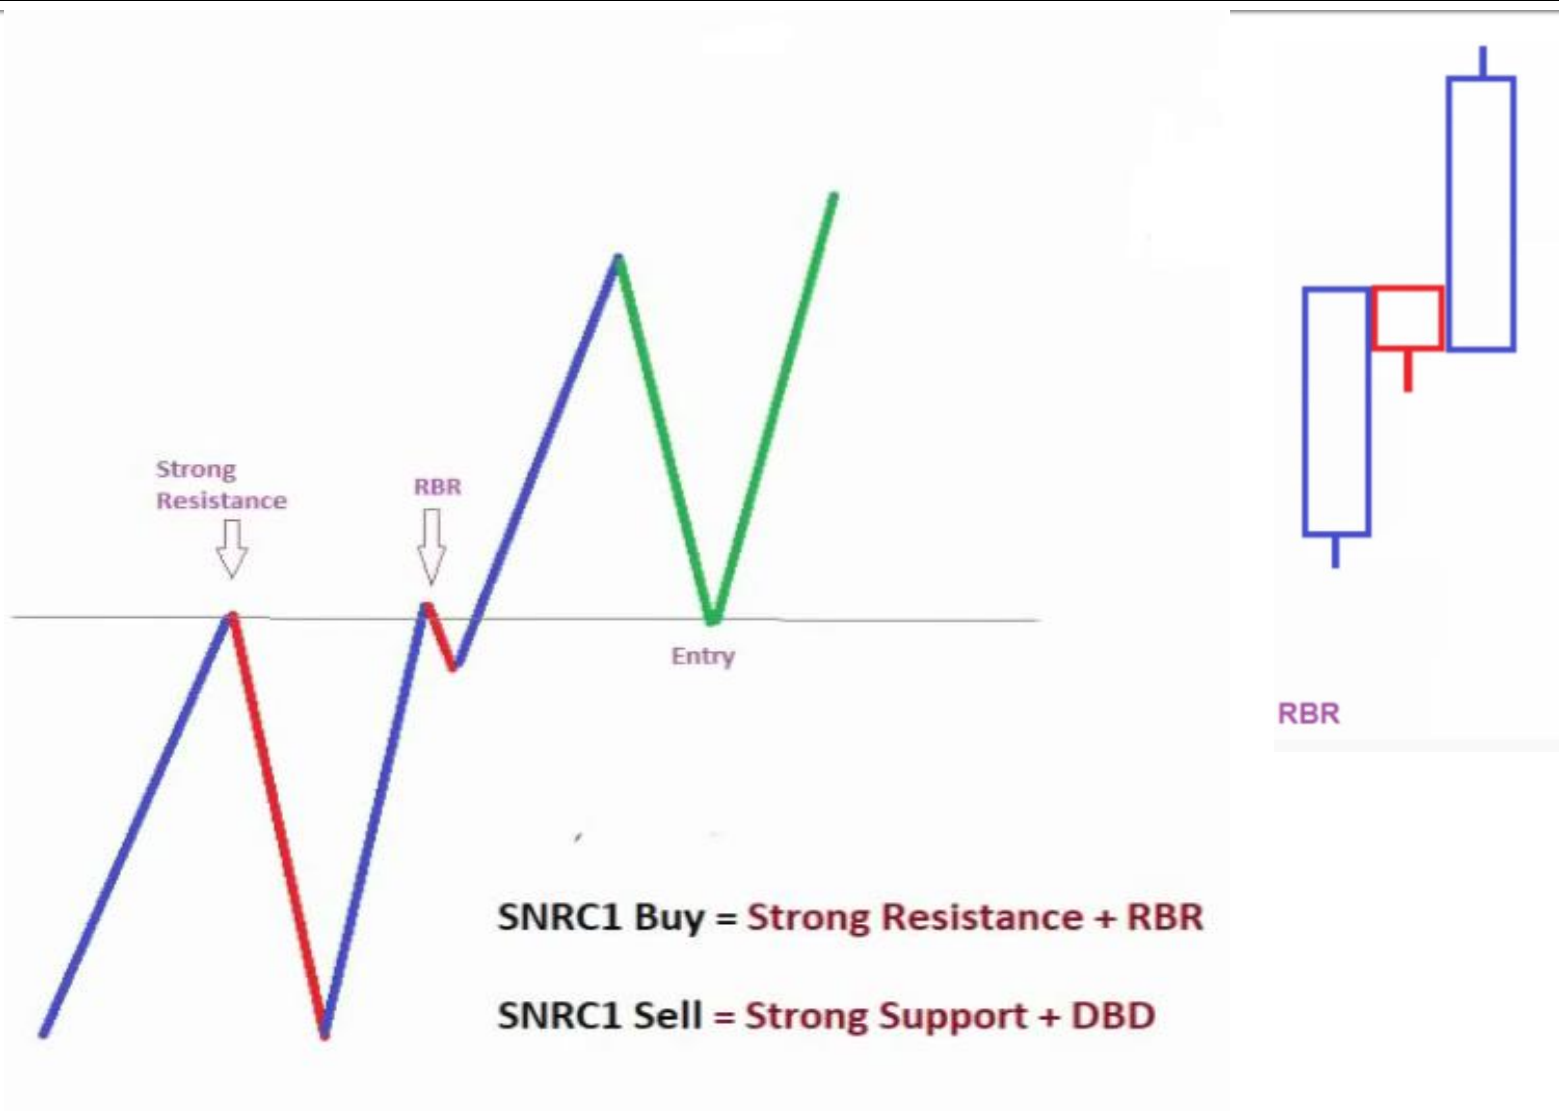

Now let's check it out the formula

SNRC1 Formula

1. Entry Point of **RBR/ DBD**
2. Strong **Support** or **Resistance**
3. **Confirmation** = Switch to **Higher TF**, look for **Engulf** or **Body candle** that **didn't touch** any **danger zone** yet

That's it!

SNRC1 Formula (Picture)

SNRC1 Formula

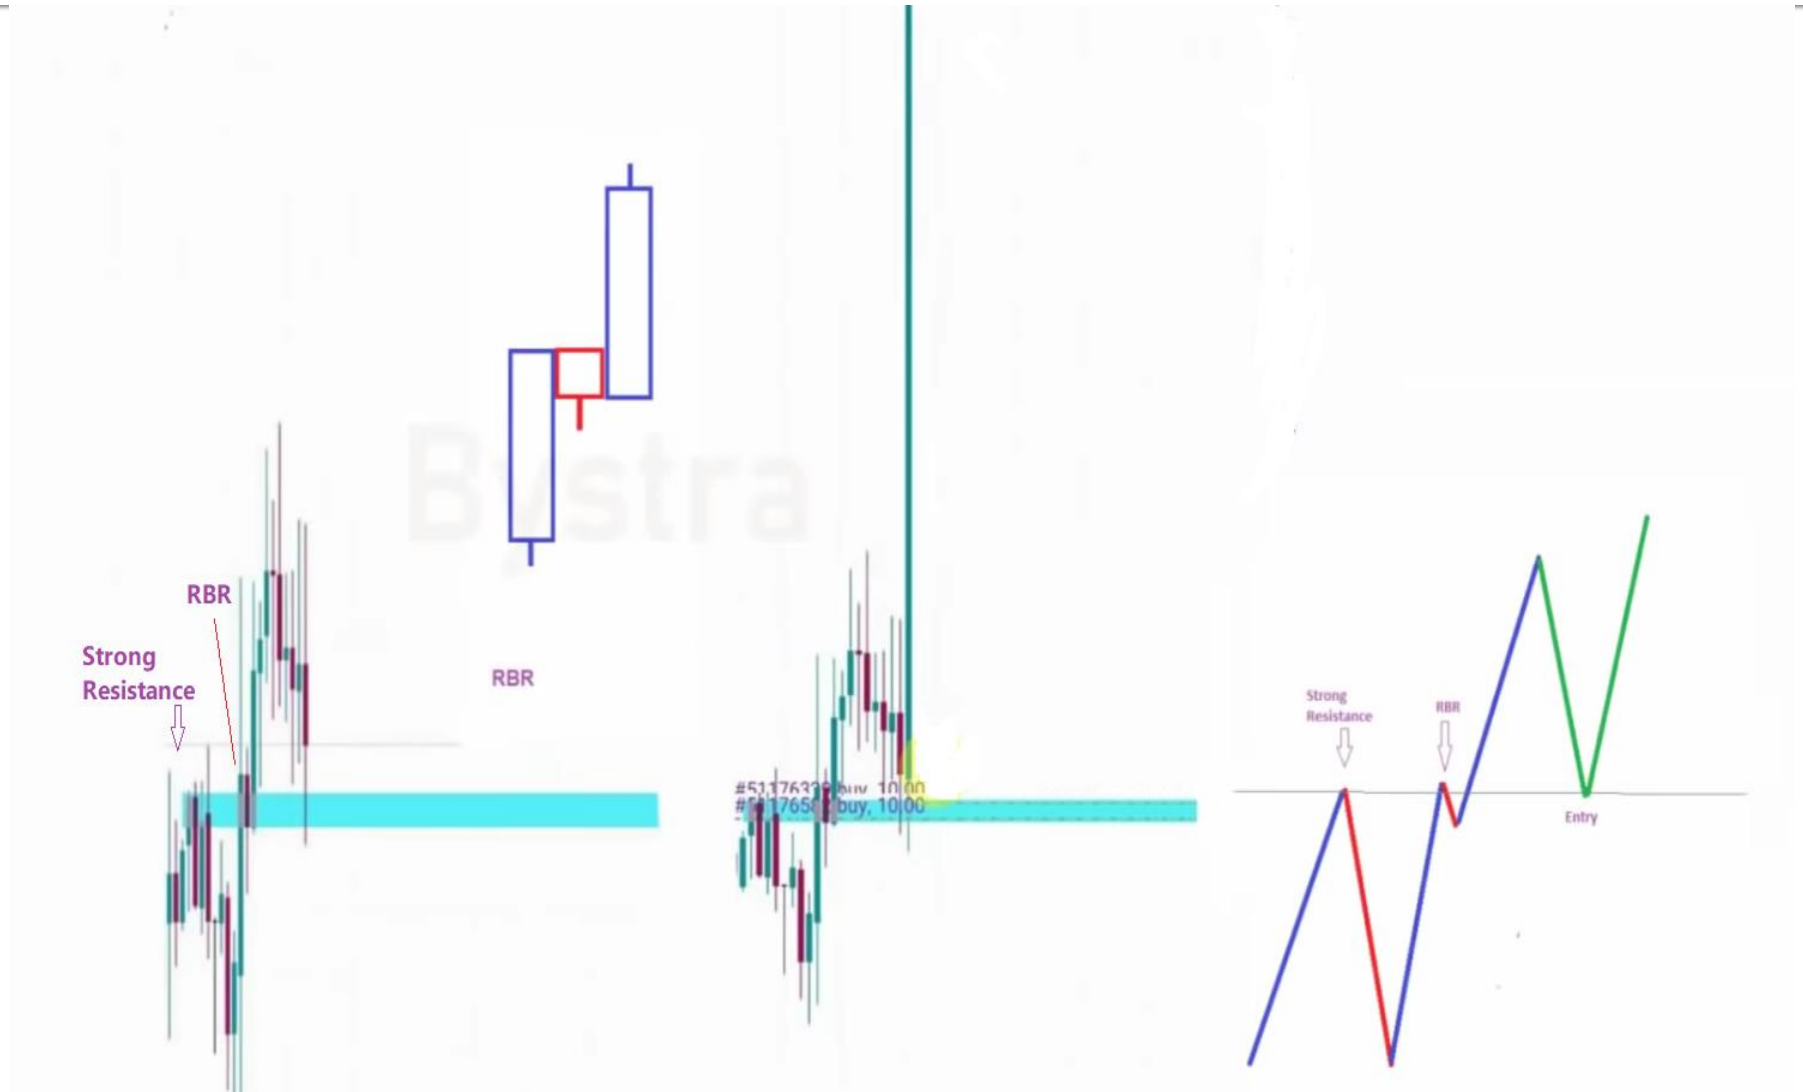

SNRC1 (Example 1)

Strong Resistance
must be in the
same line with RBR

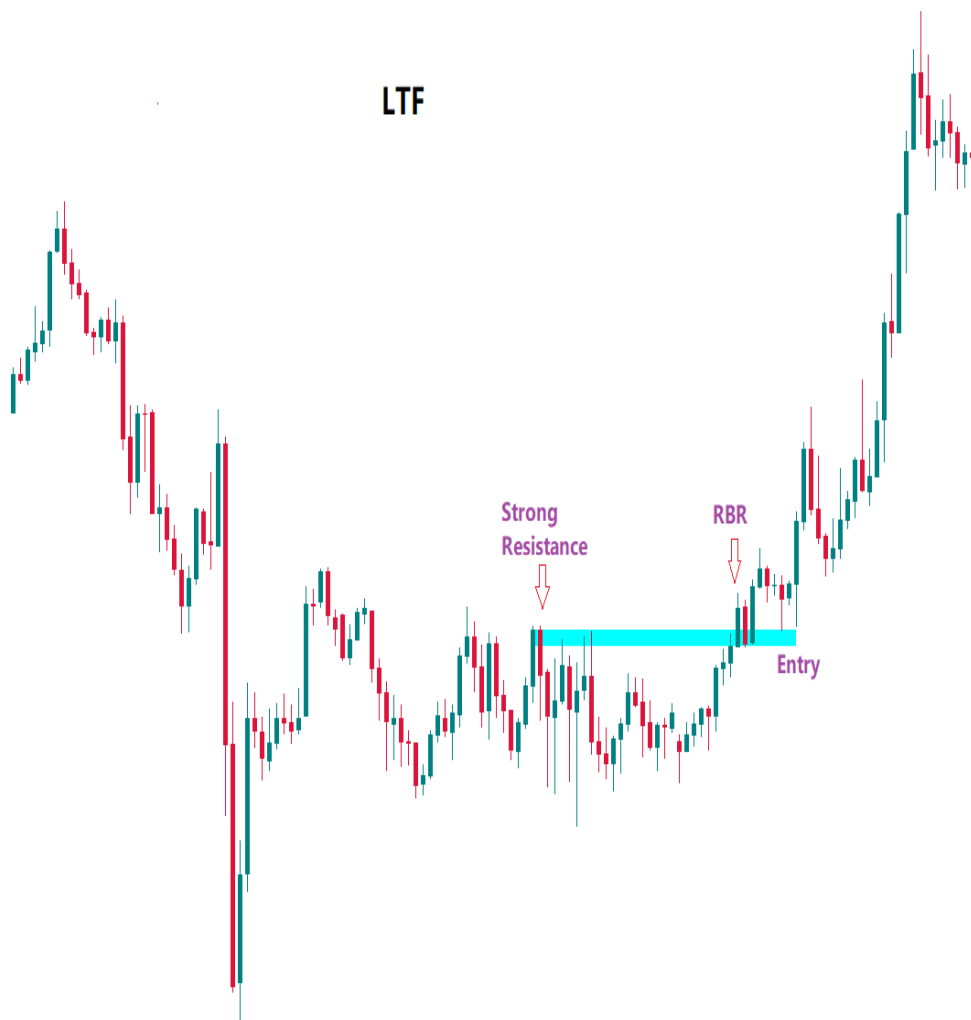

SNRC1 (Example 2)

SNRC1 (Example 3)

HTF

Entry

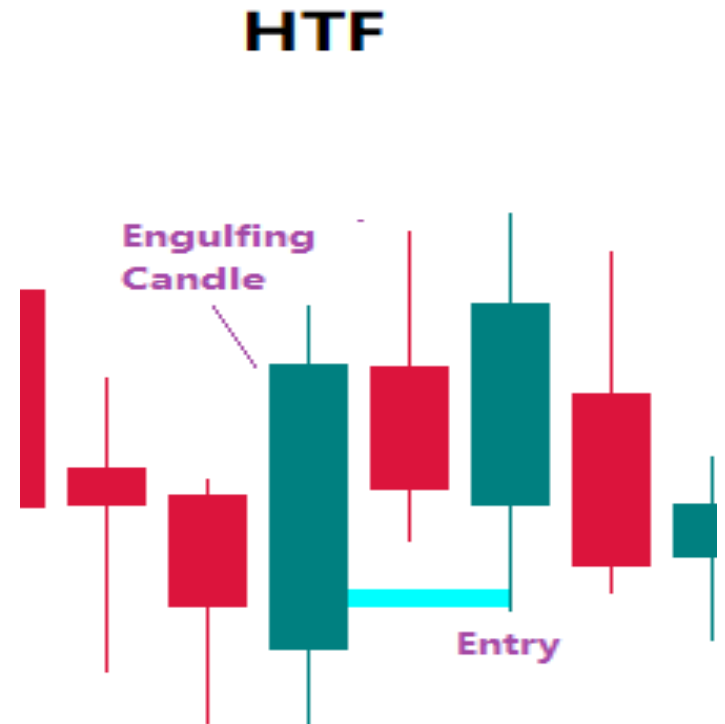

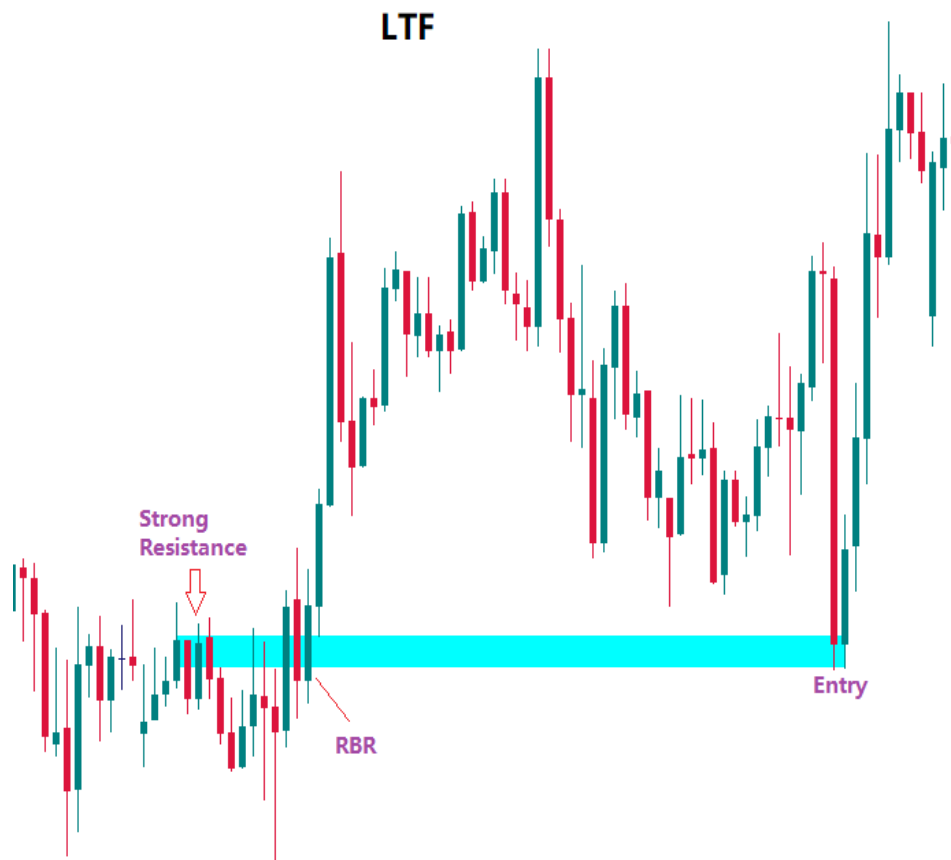

Engulfing
Candle

SNRC1 + Confirmation 6

SNRC1 Ends

SNRC2

SNRC2 is “ **sibling** ” of SNRC1.

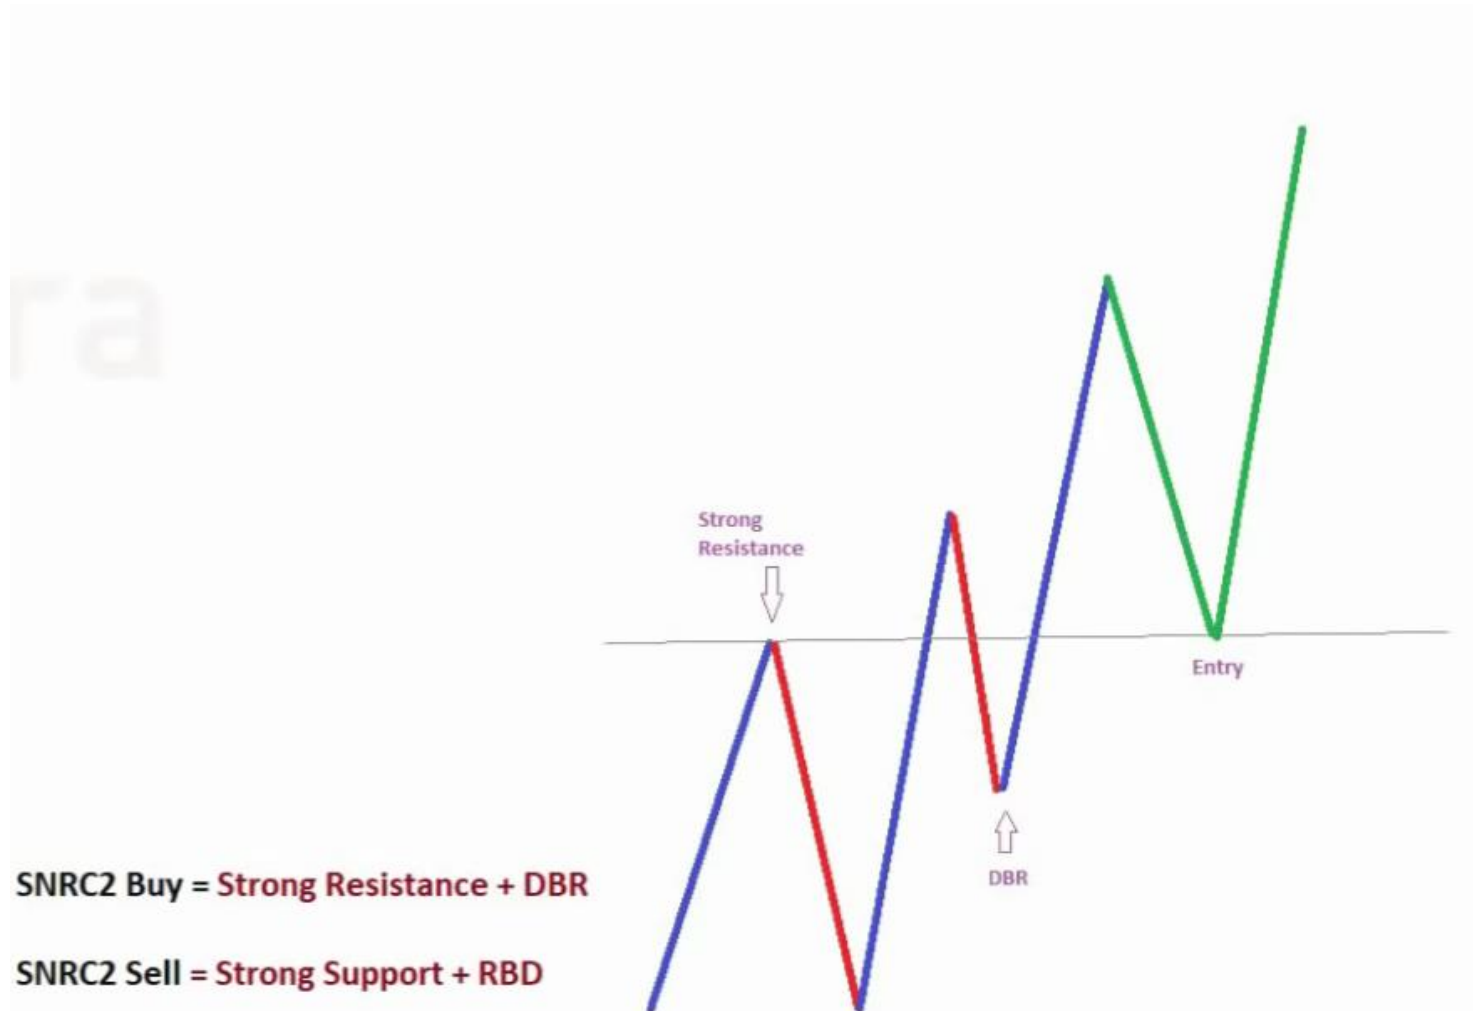

The formula is just little bit different.

The entry point of SNRC2 is RBD, DBR

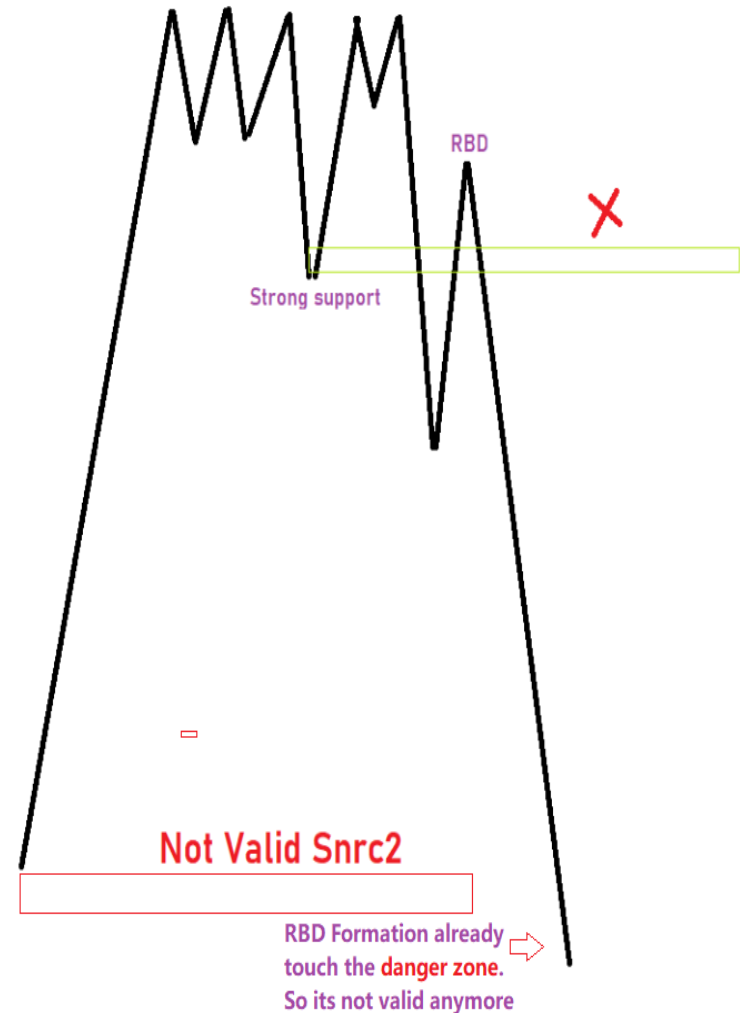

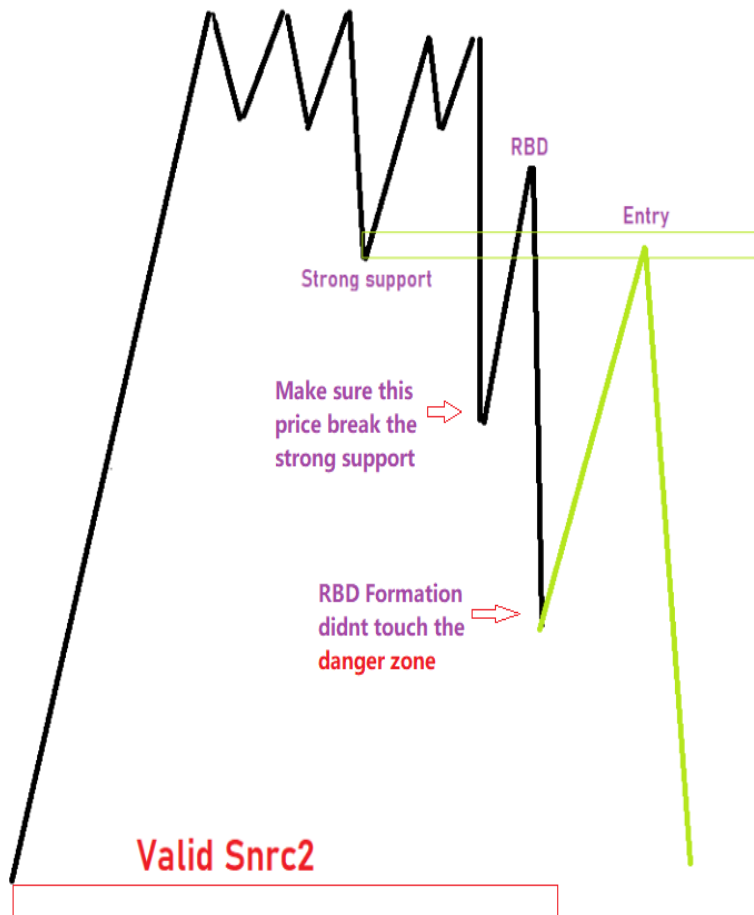

SNRC2 Formula

1. Strong Support / Resistance
2. Entry Point DBR/ RBD
3. **Confirmation** = Switch to **Higher TF**, look for **Engulf** or **Body candle** that **didn't touch** any **danger zone** yet

SNRC2 Formula (Picture)

SNRC2 + Confirmation 2

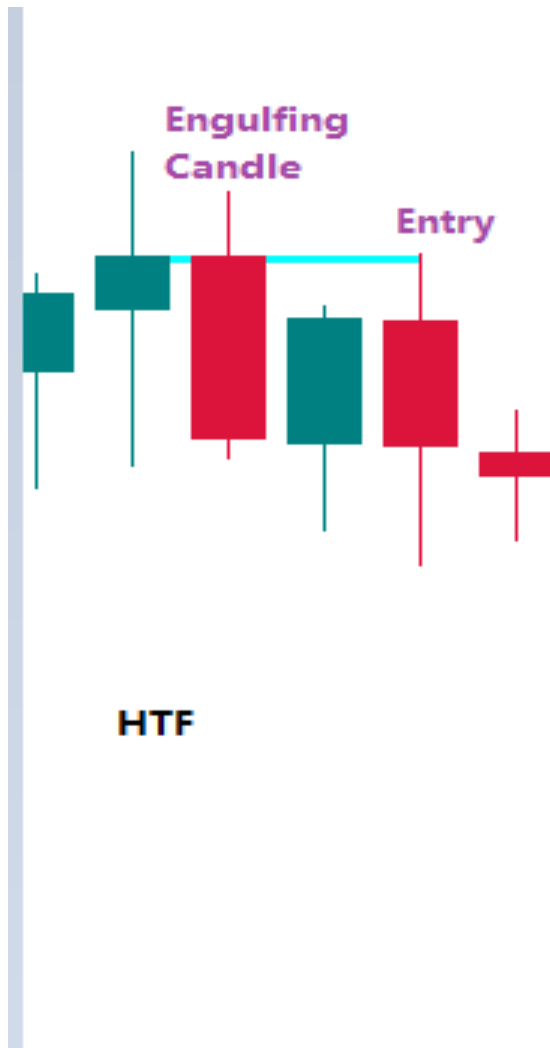

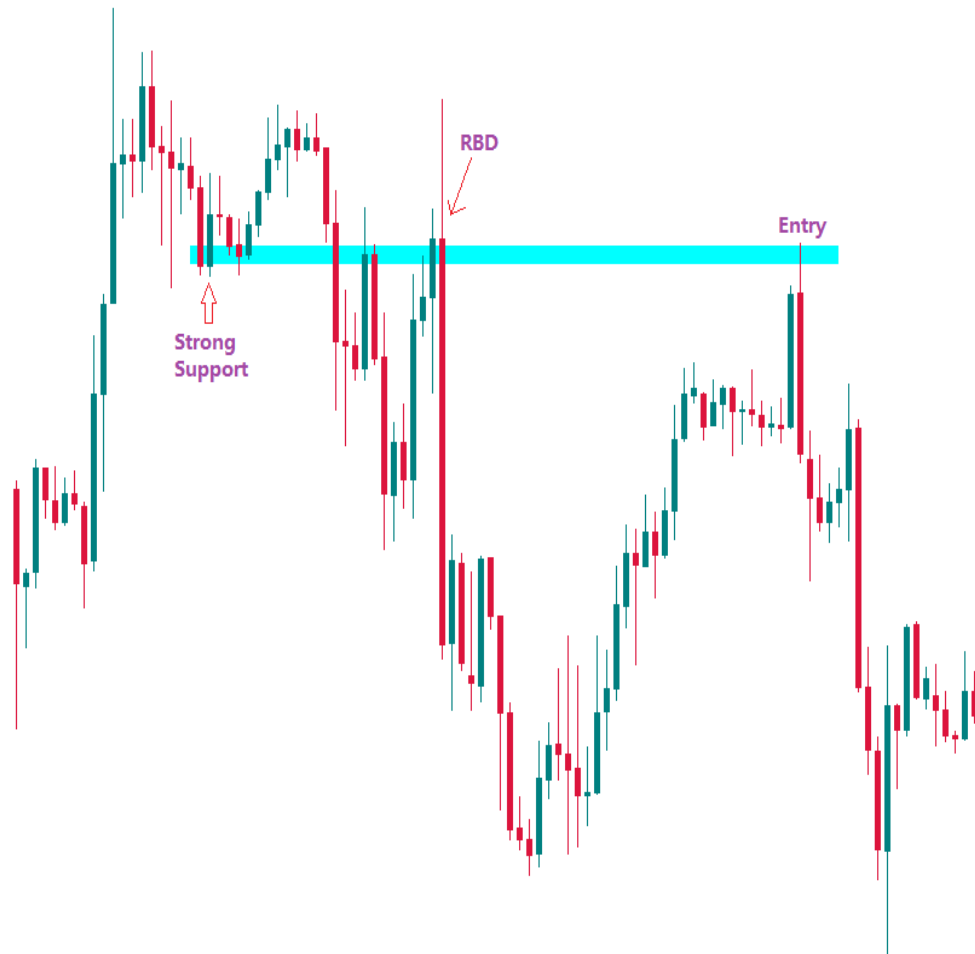

SNRC2 + Confirmation 3

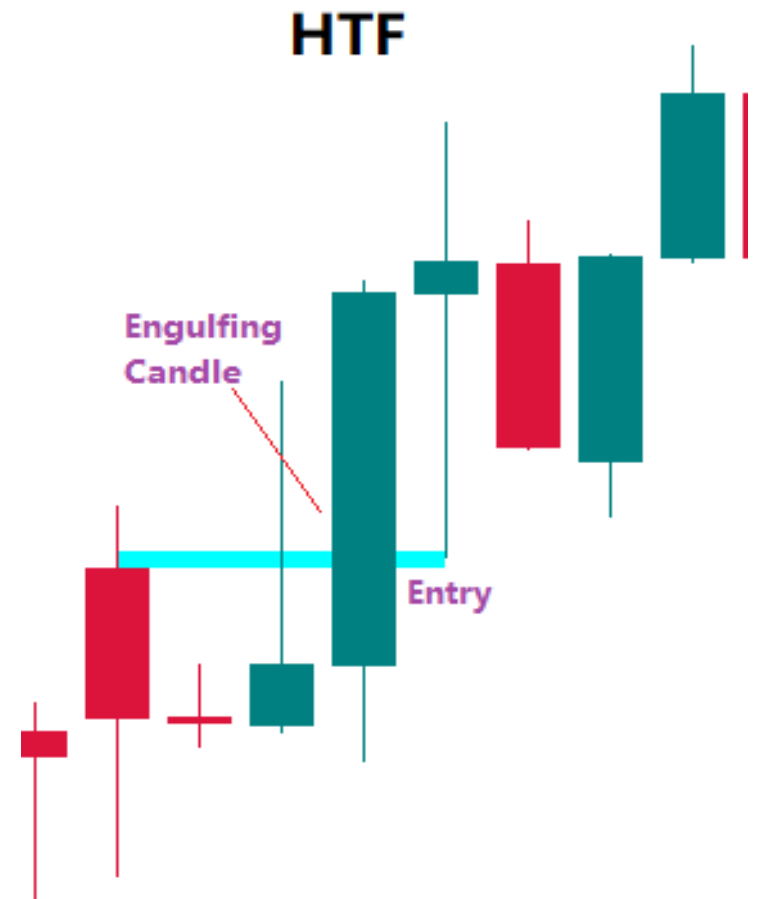

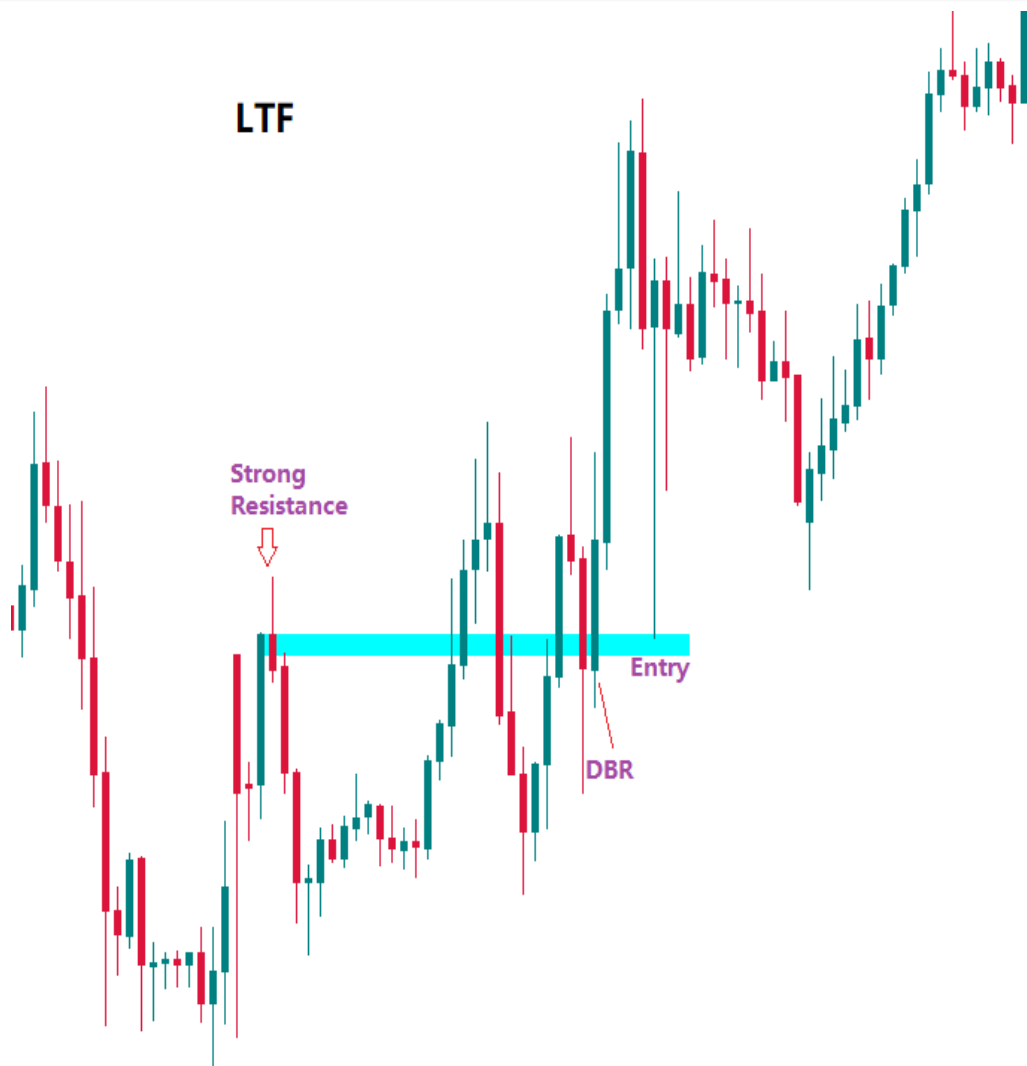

SNRC2 + Confirmation 4

SNRC2 + Confirmation 5

SNRC2 + Confirmation 6

SNRC2 Ends

SNRC3

Please do not headache.

SNRC3 is not a setup.

It's actually same as **SNRC1** but it has it's own
formula

SNRC3 Attitude

SNRC3 is the “WAR” between **Bearish Engulfing** and **Bullish Engulfing**. SOP is still same with SNRC1 and SNRC2. No need to be headache.

Now, back to **Entry Point**.

If you noticed,
RBR, DBD, RBD, DBR are actually **Engulfing**

Now, forget the SNR, SND for a while.
This is between the clear Engulfing only.

SNRC3 Formula

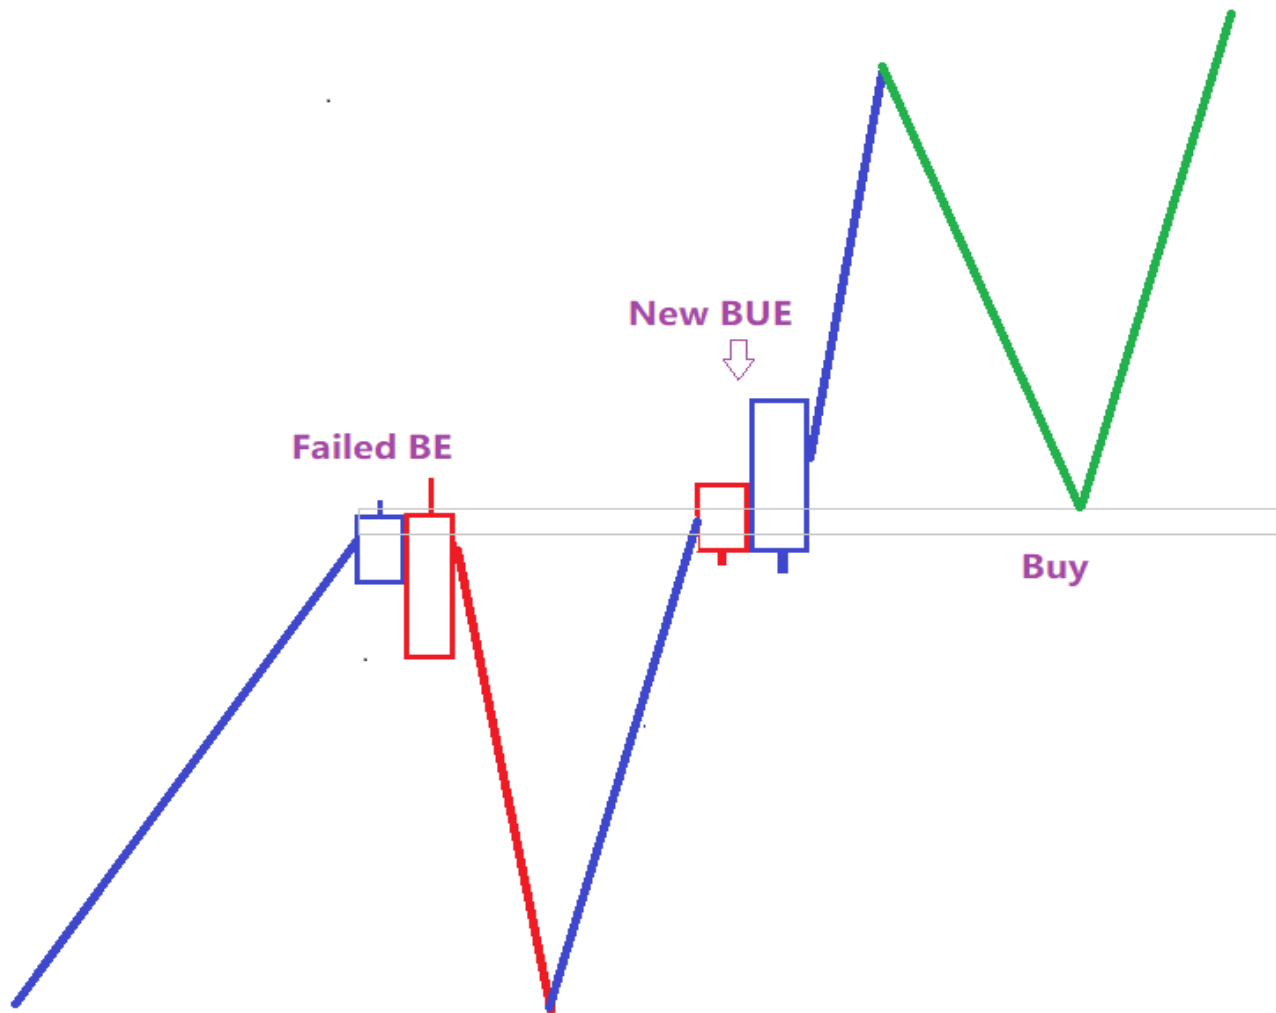

To Sell : Strong support changed to **Failed** Bullish Engulfing.

The **Entry Point** is Bearish Engulfing that is in the same line with that **Failed** Bullish Engulfing.

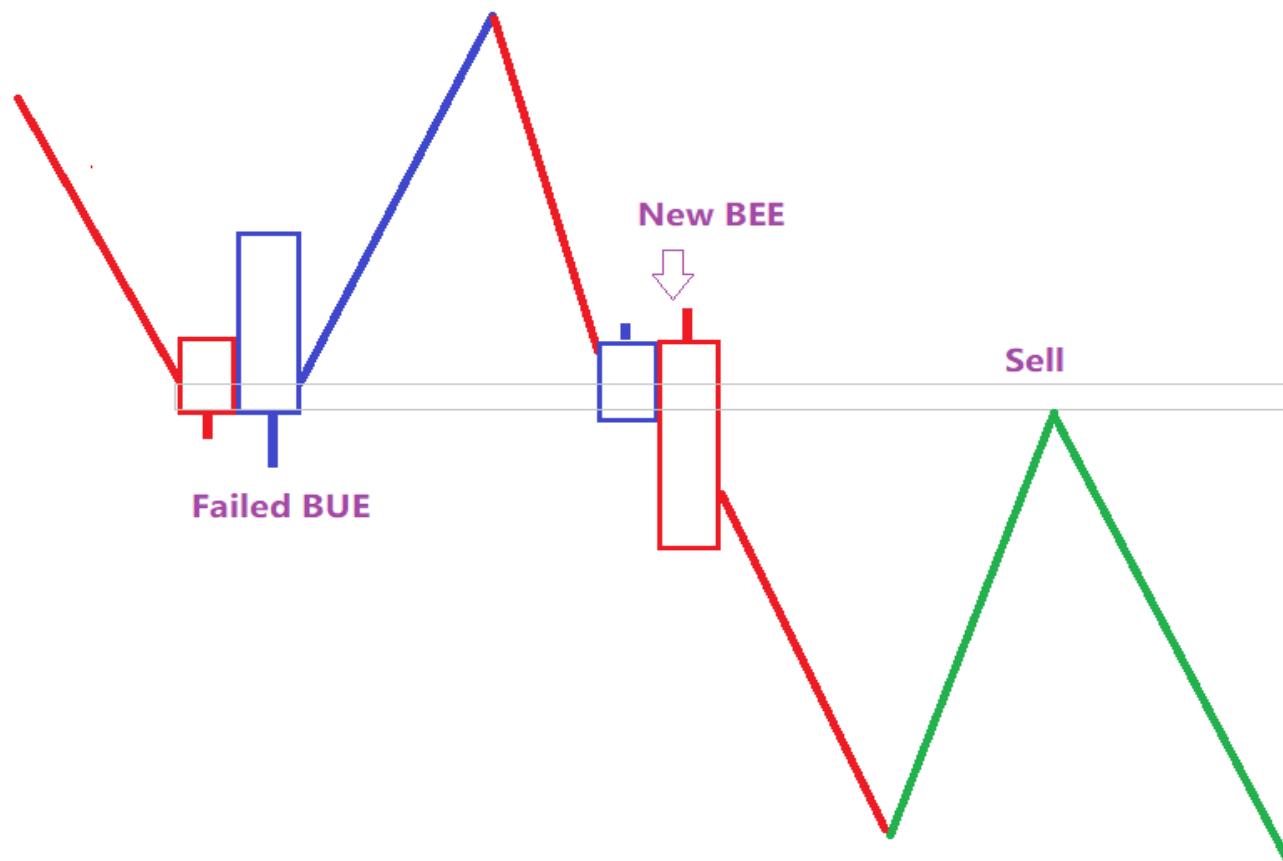

To Buy : Strong Resistance changed to **Failed** Bearish Engulfing.

The **Entry Point** is Bullish Engulfing that is in the same line with **Failed** Bearish Engulfing.

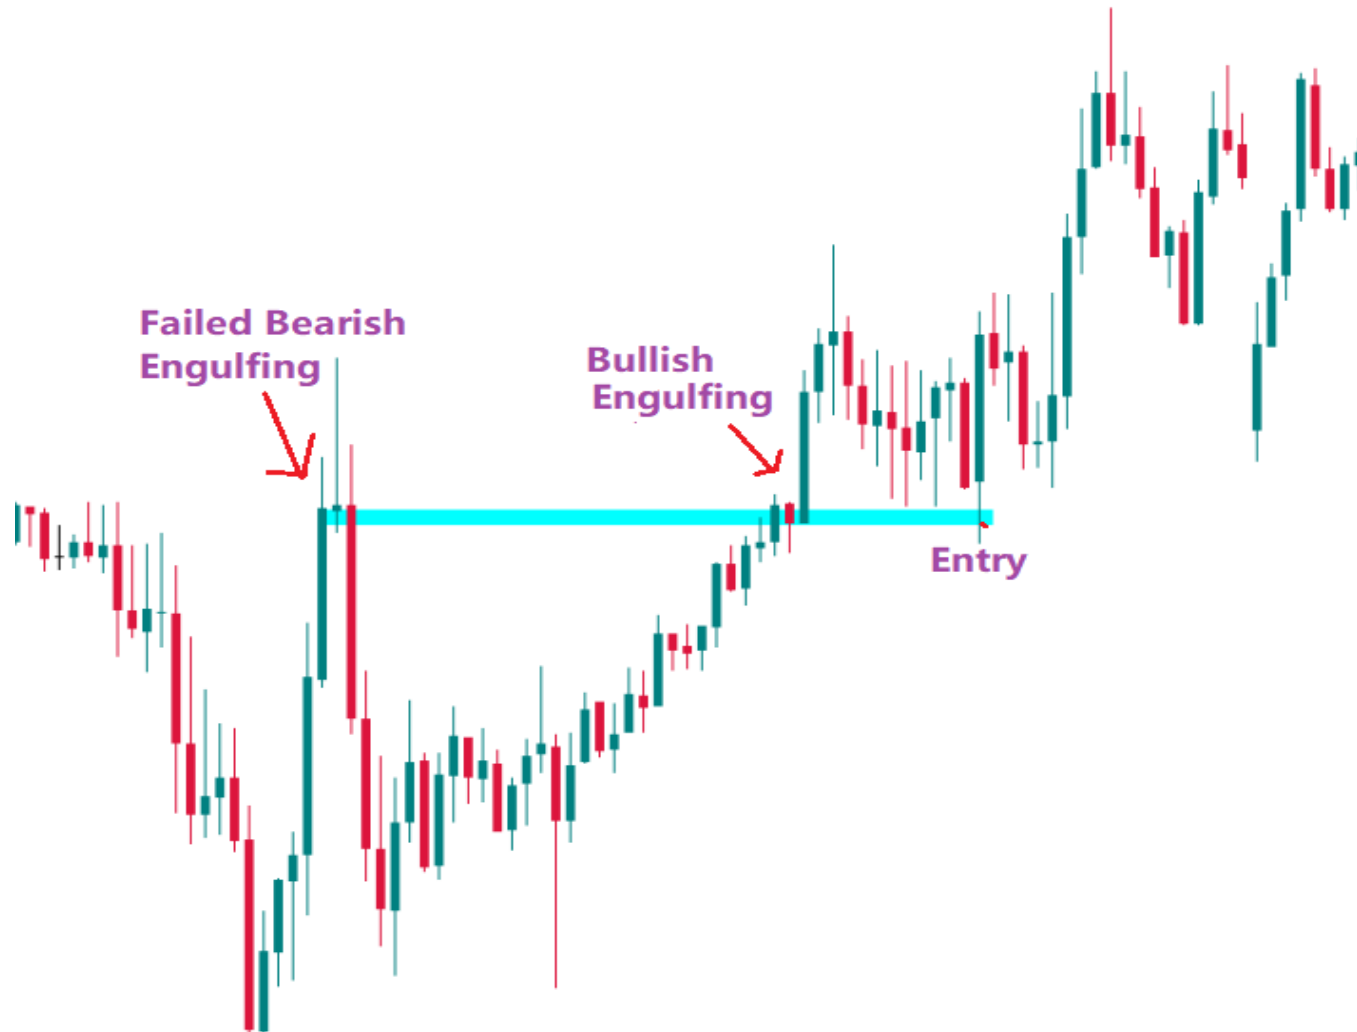

SNRC3 Formula (Buy)

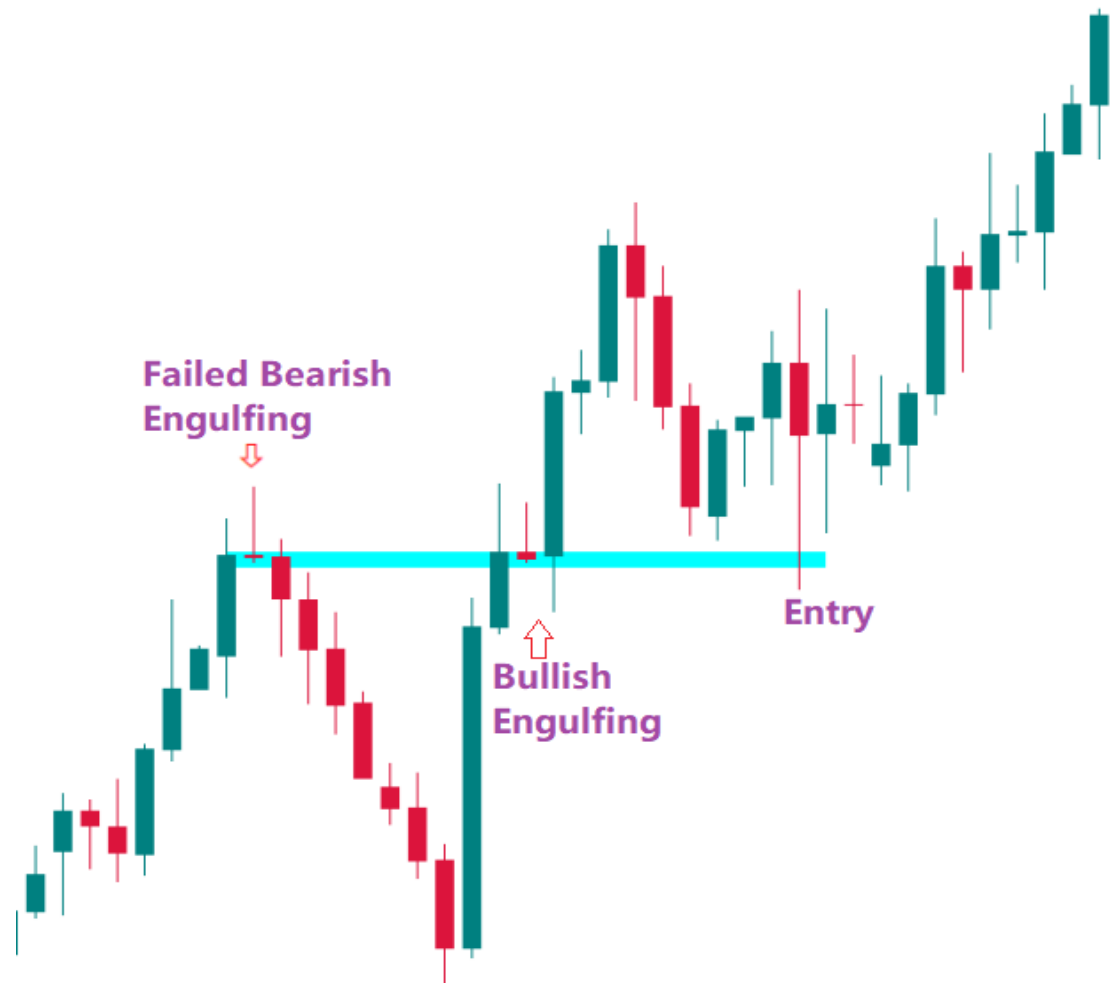

SNRC3 Formula (Sell)

QM (Quasimodo)

QMR (QM Reversal)

QML means Quasimodo level

Quasimodo is came from a cartoon character that has hunchback shoulder

QML only occurs in **reversal**. Which means, it is **high risk**.

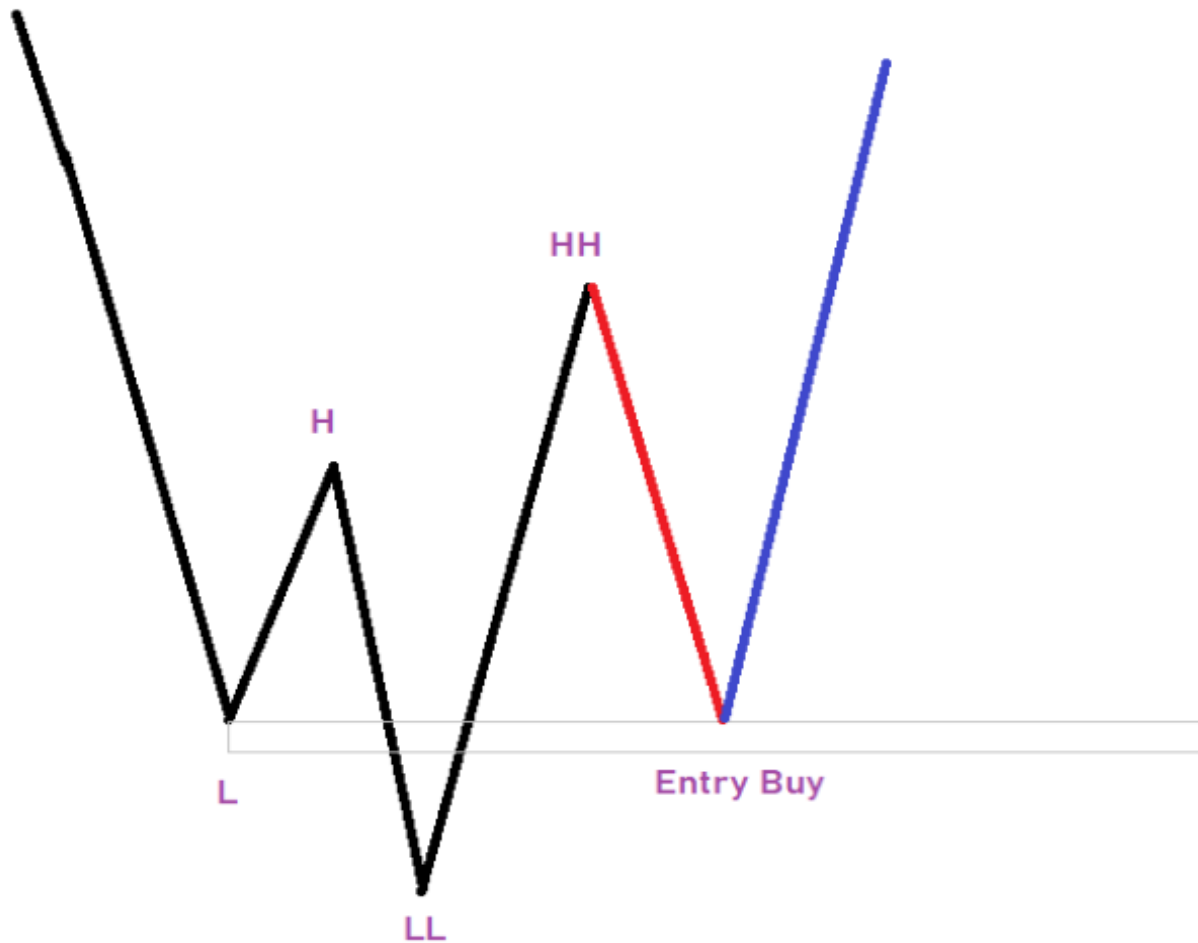

QML is quite popular among SnD traders. But beware, QML also is the place for the big traders **manipulate** us.

Now let's get started!

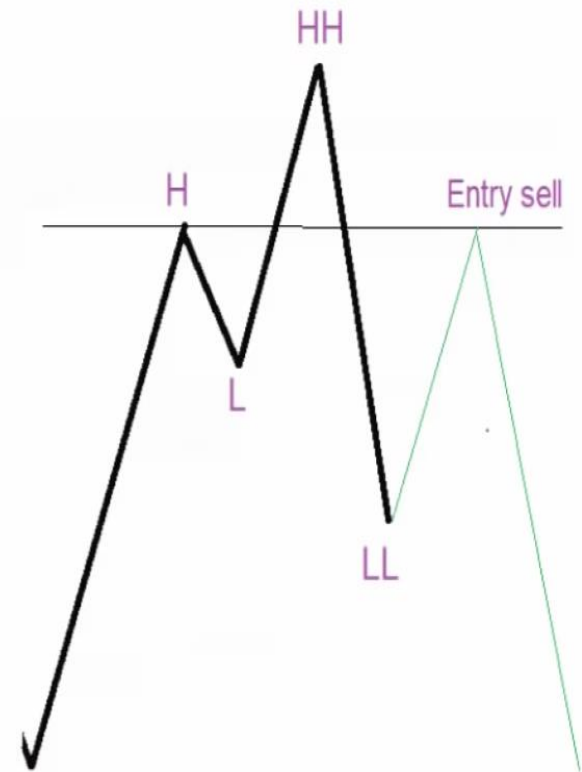

QMR Formula (Sell)

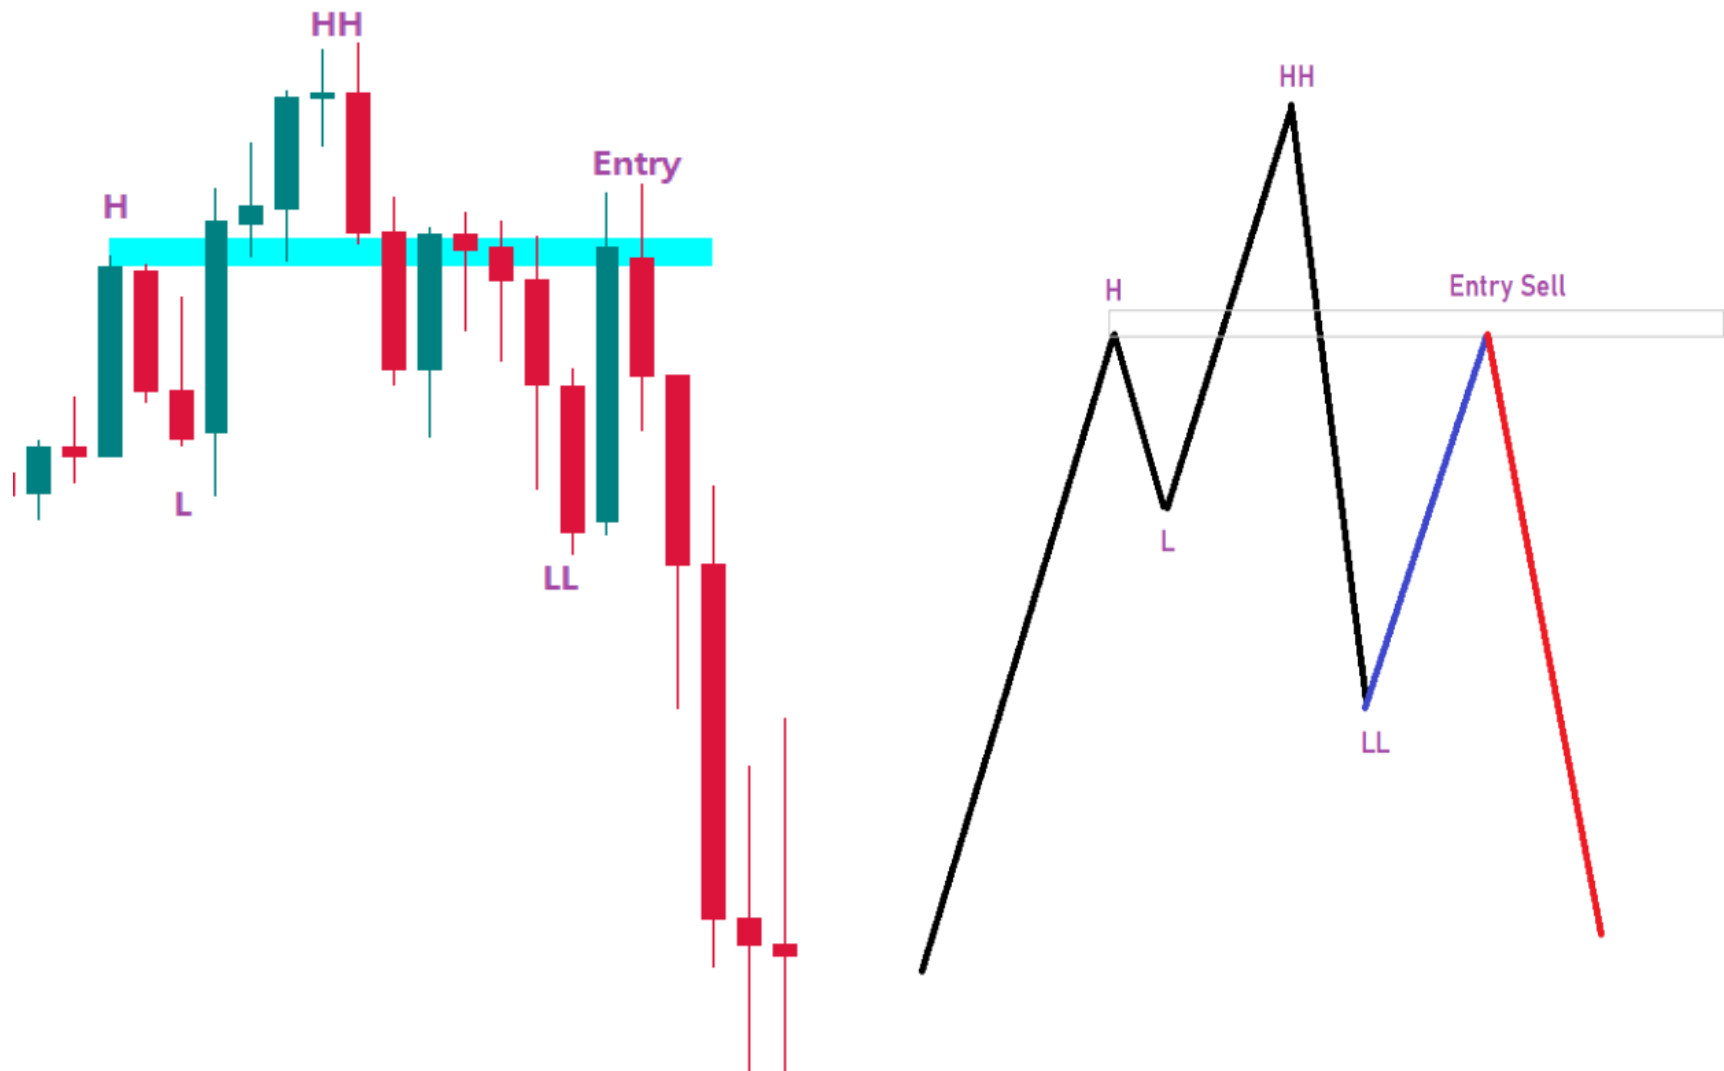

QMR Formula (Buy)

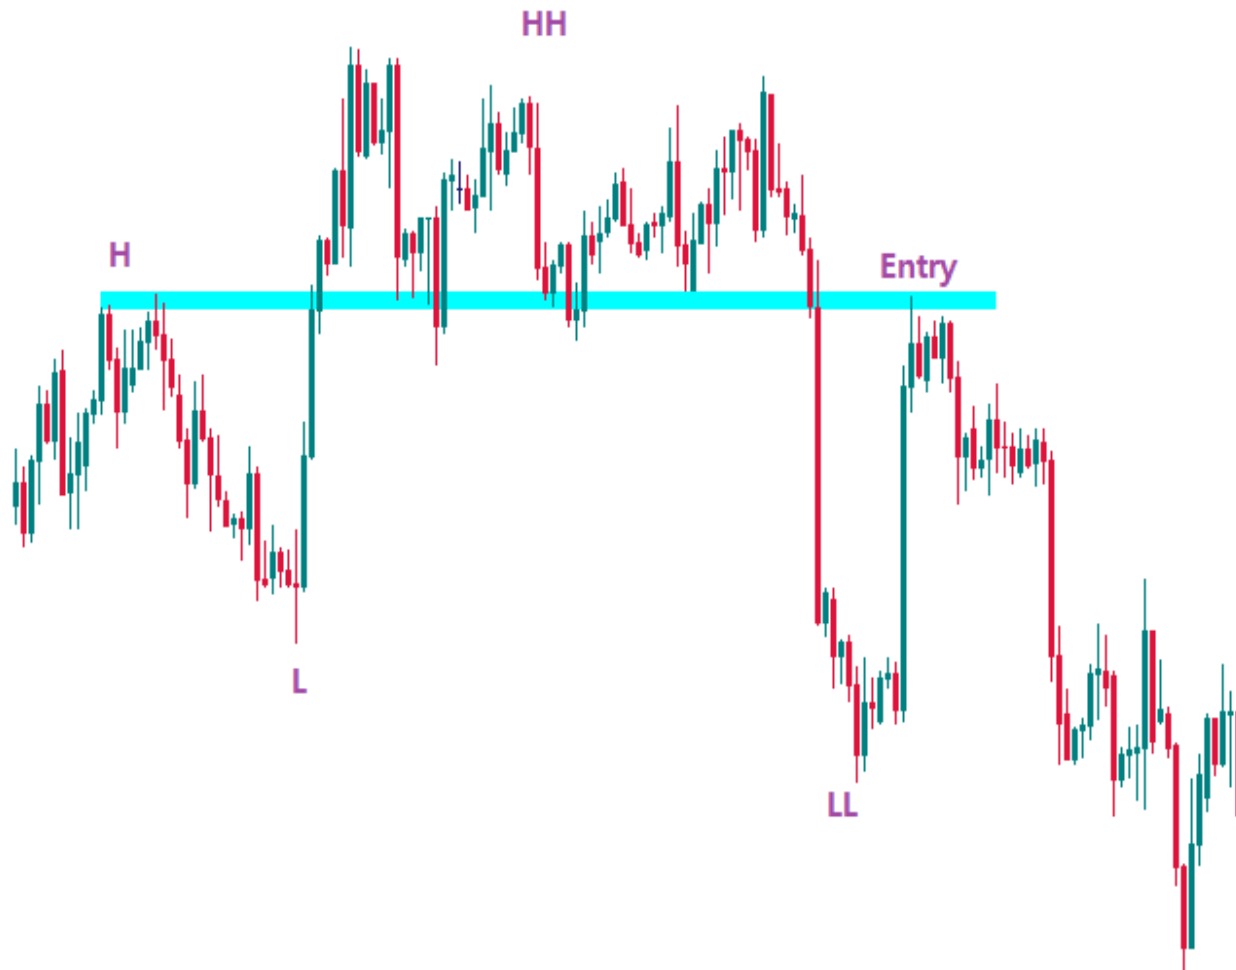

QMR (Example 1)

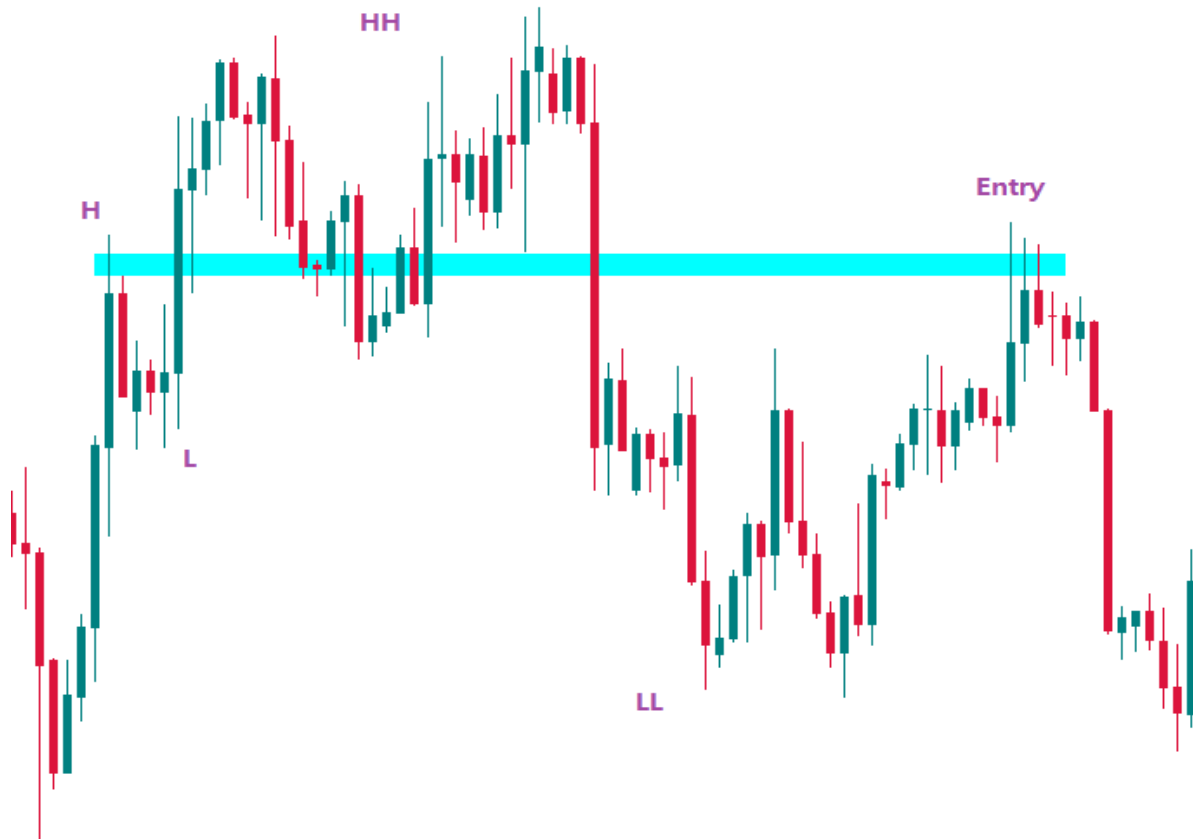

QMR (Example 2)

QMR (Example 3)

QMR (Example 4)

QMR + Confirmation 3

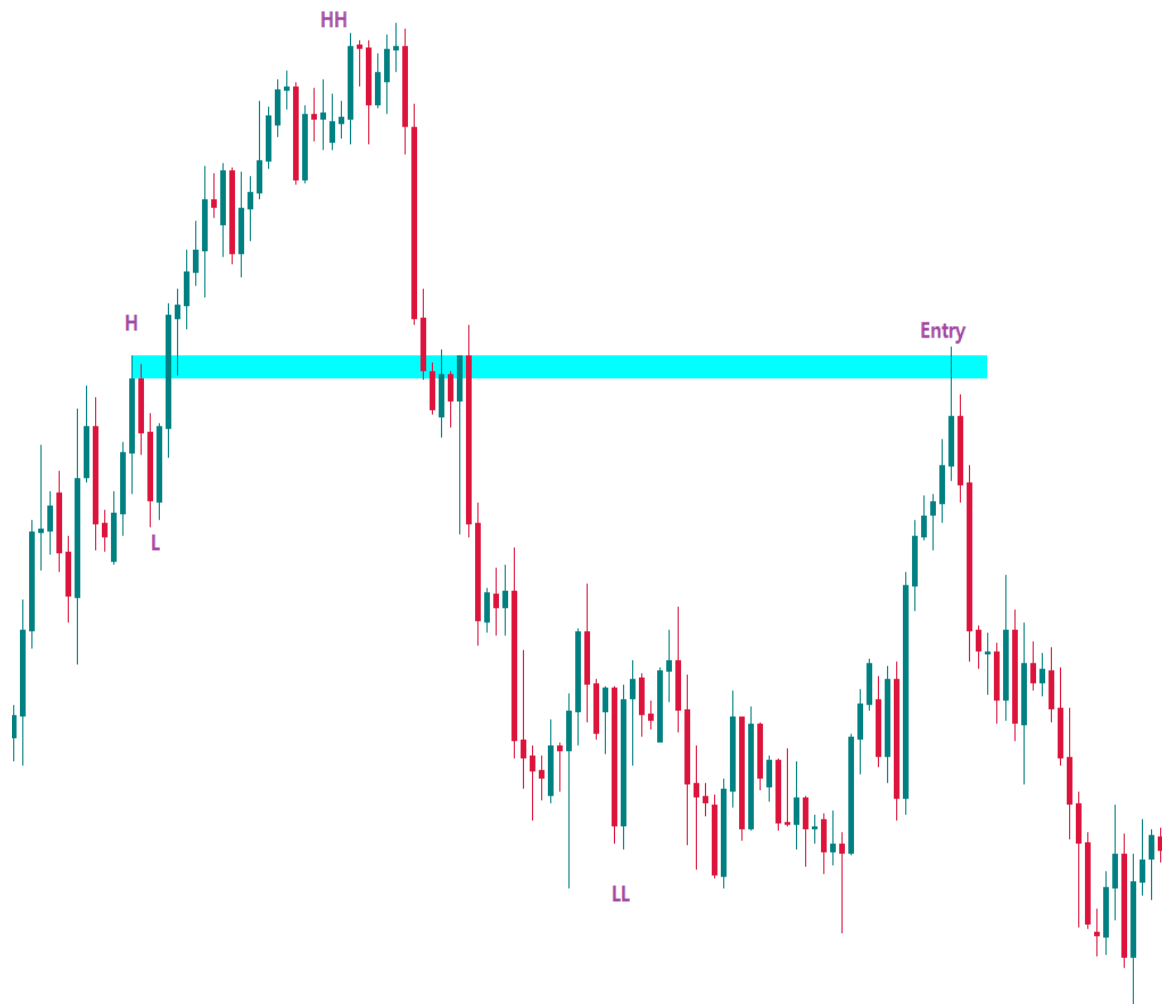

QMR + Confirmation 4

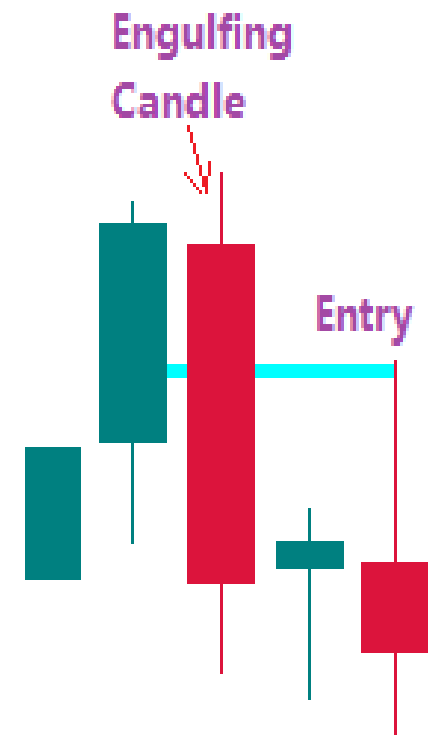

QMR + Confirmation 5

QMR + Confirmation 6

LTF

HTF

QMR Ends

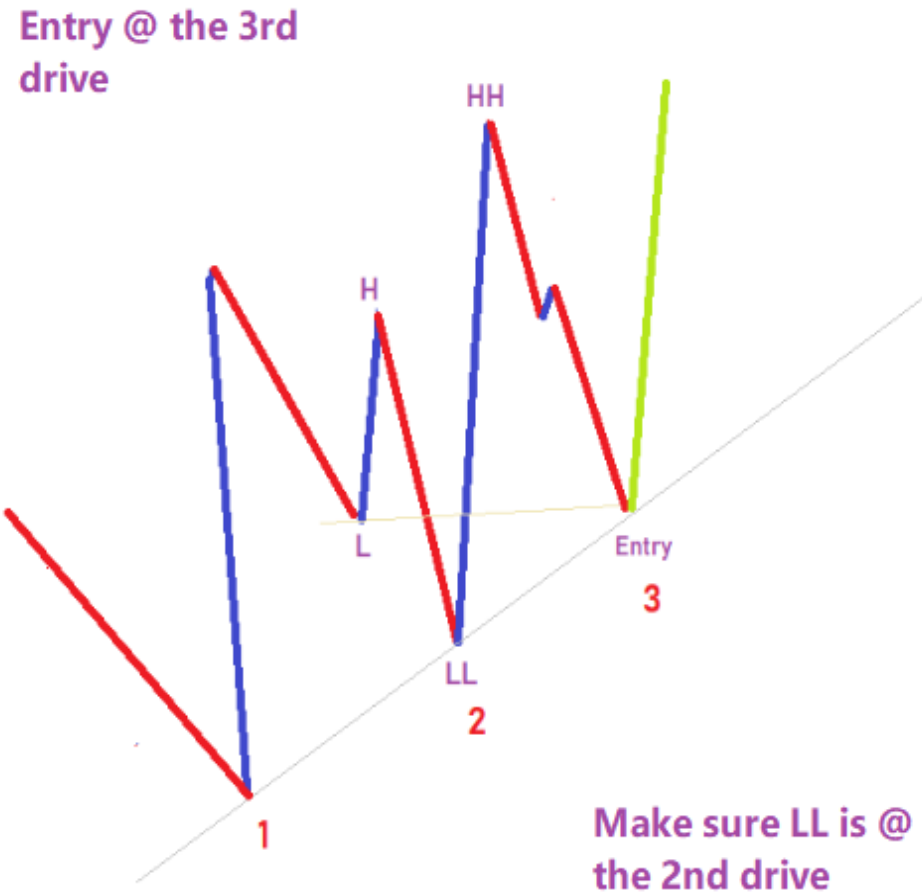

QMC (QM Continuation)

QMC is kinda same with QMR. But, its just added trendline in it.

QMC is only occurs in the continuation trend

The best to entry QMC is, after the occurrence of reversal. (Fresh)

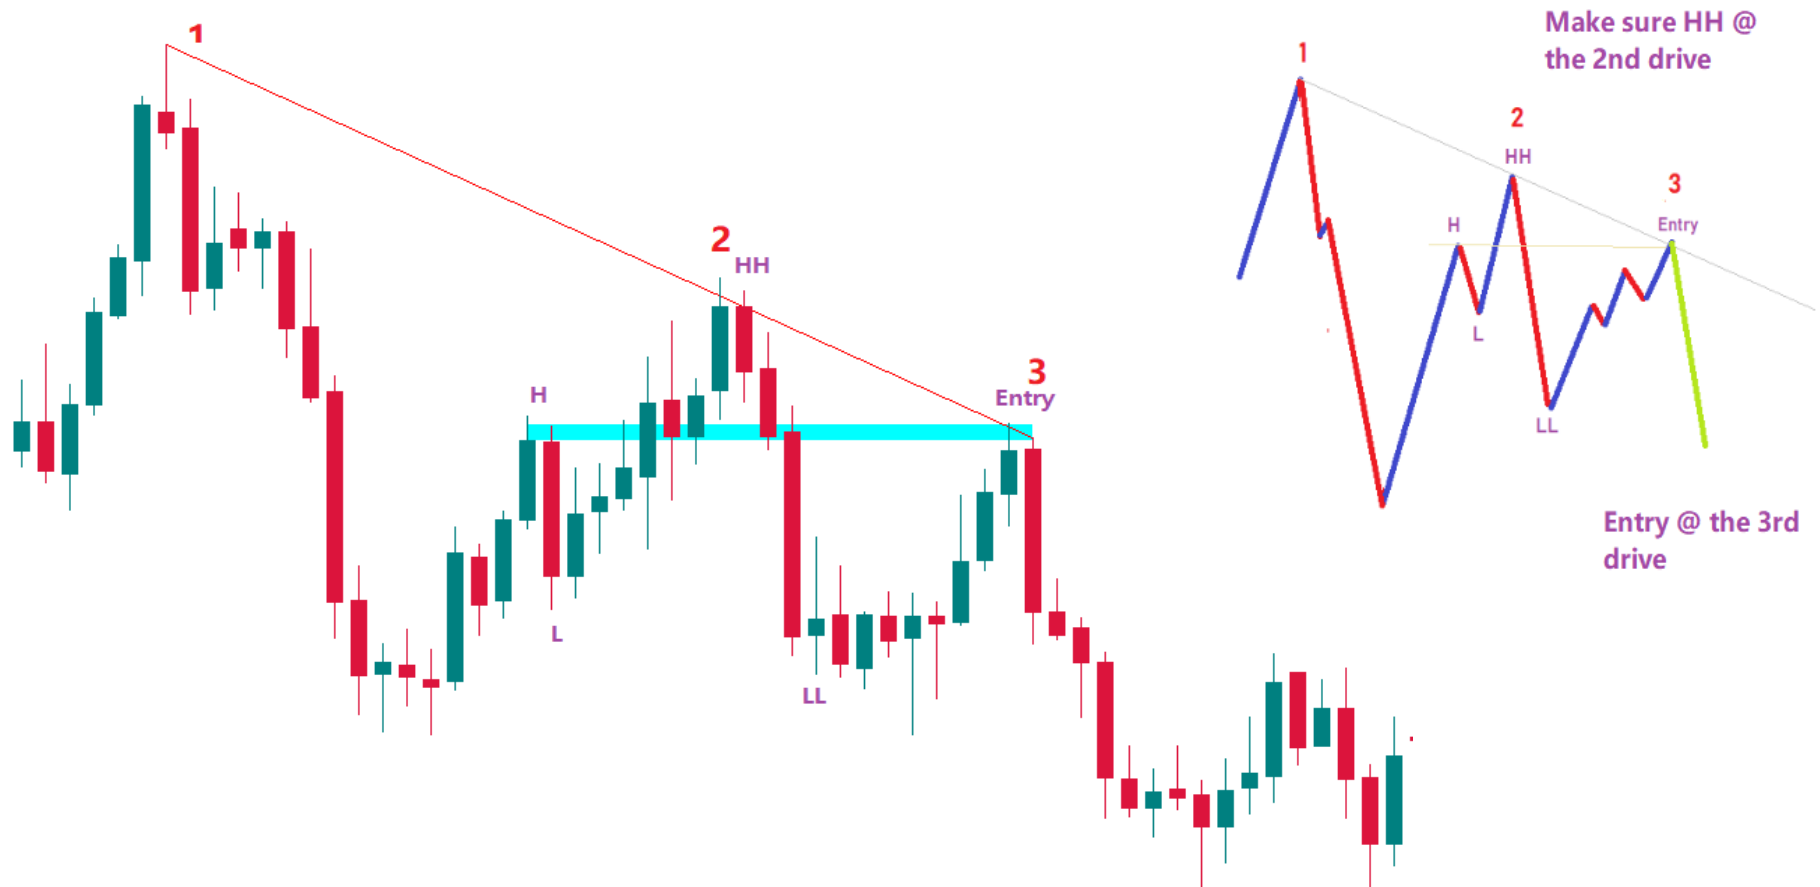

QMC Formula (Buy)

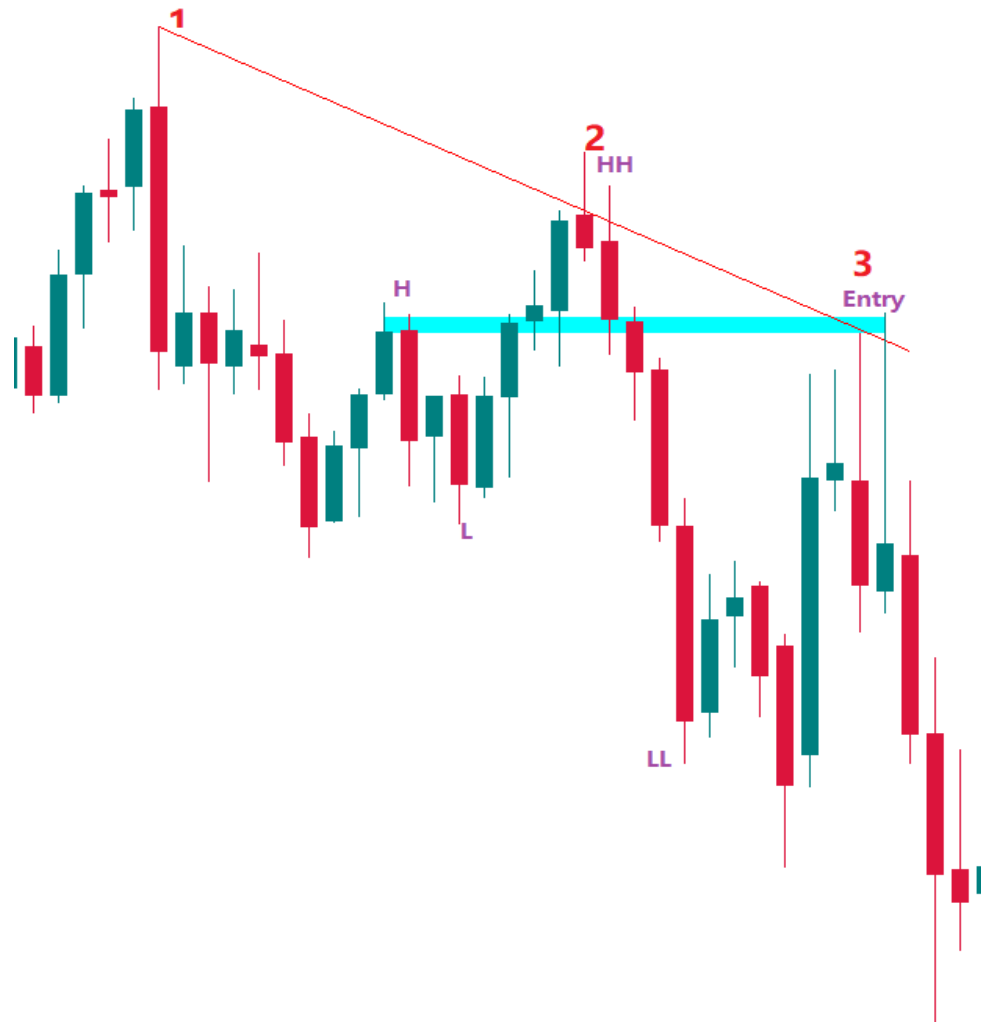

QMC Formula (Sell)

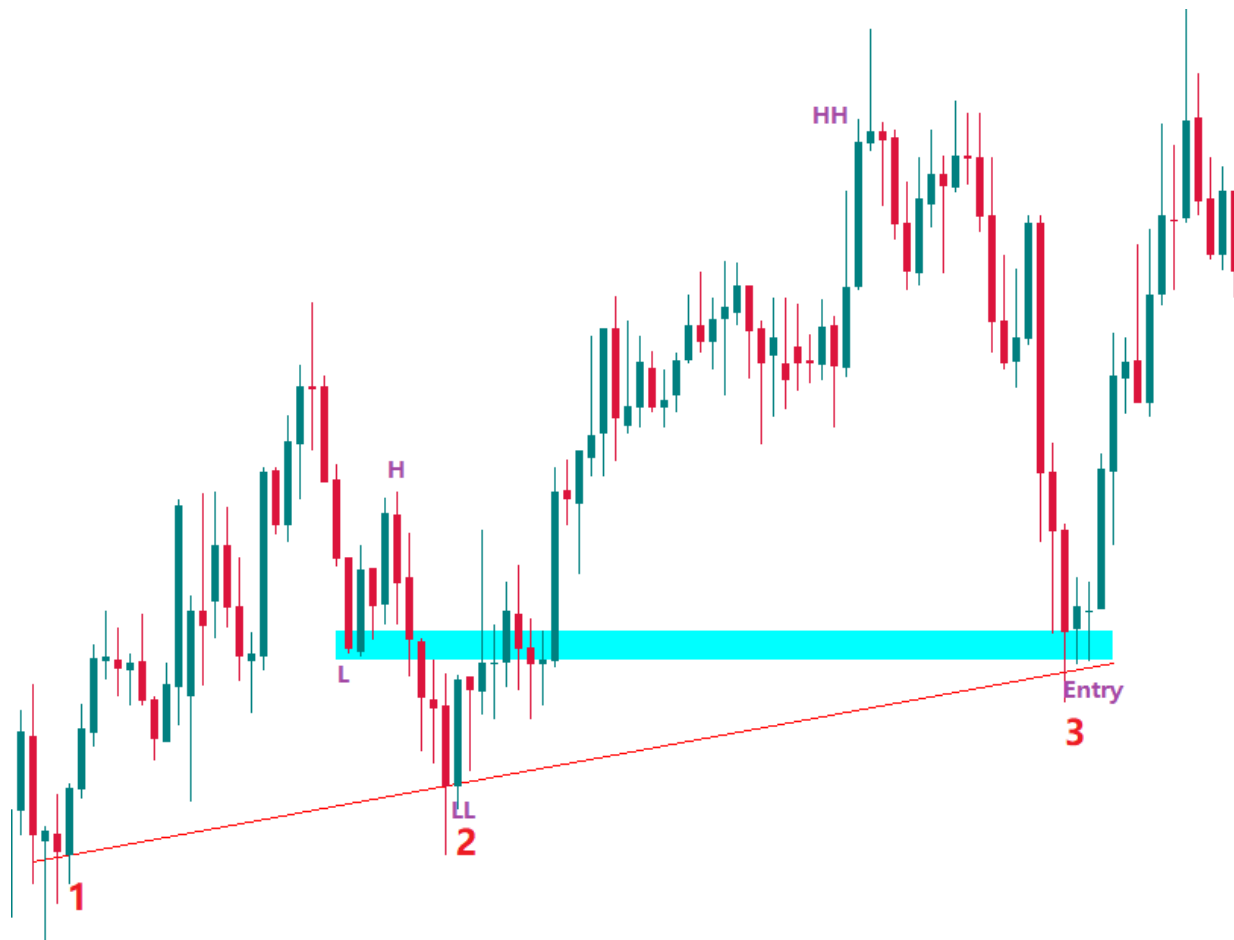

QMC (Example 1)

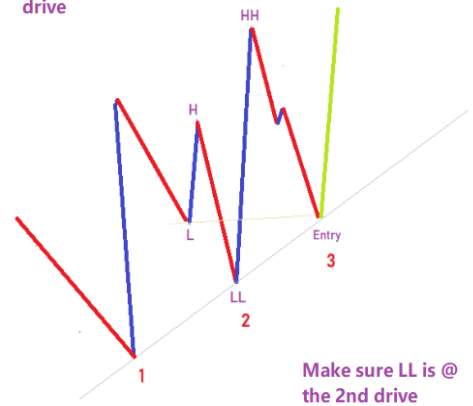

QMC (Example 2)

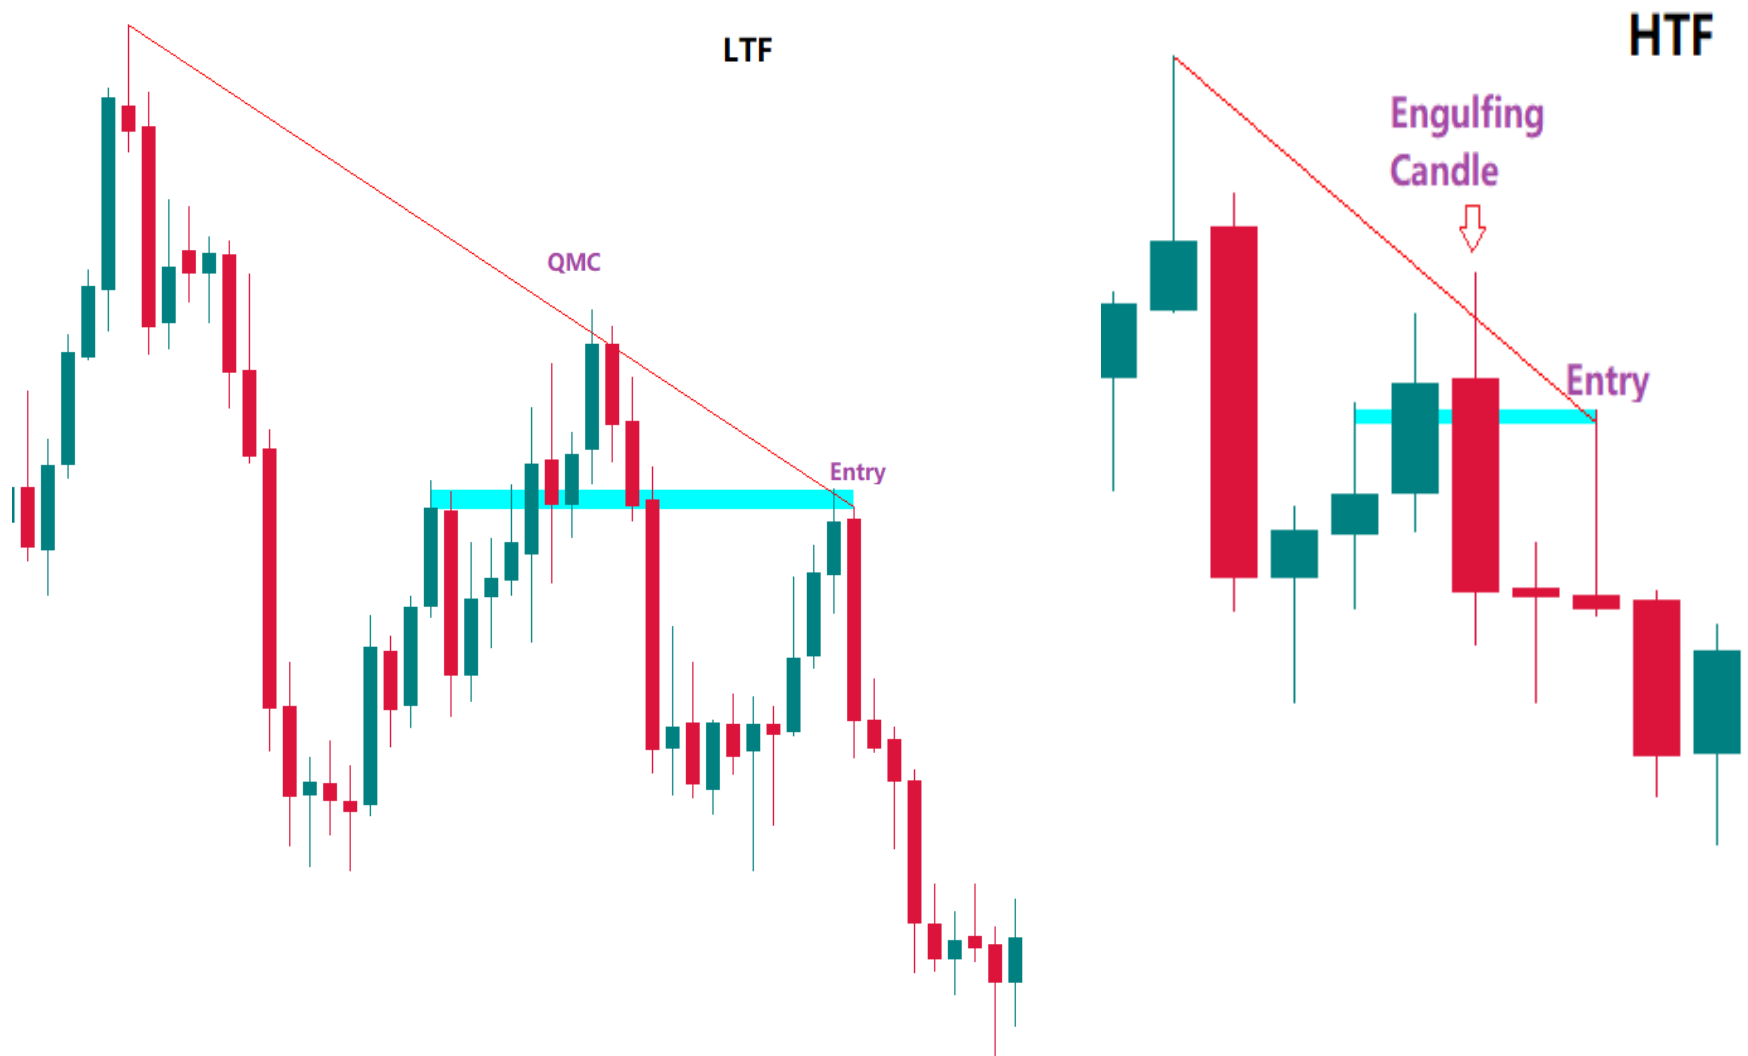

QMC (Example 3)

QMC + Confirmation 1

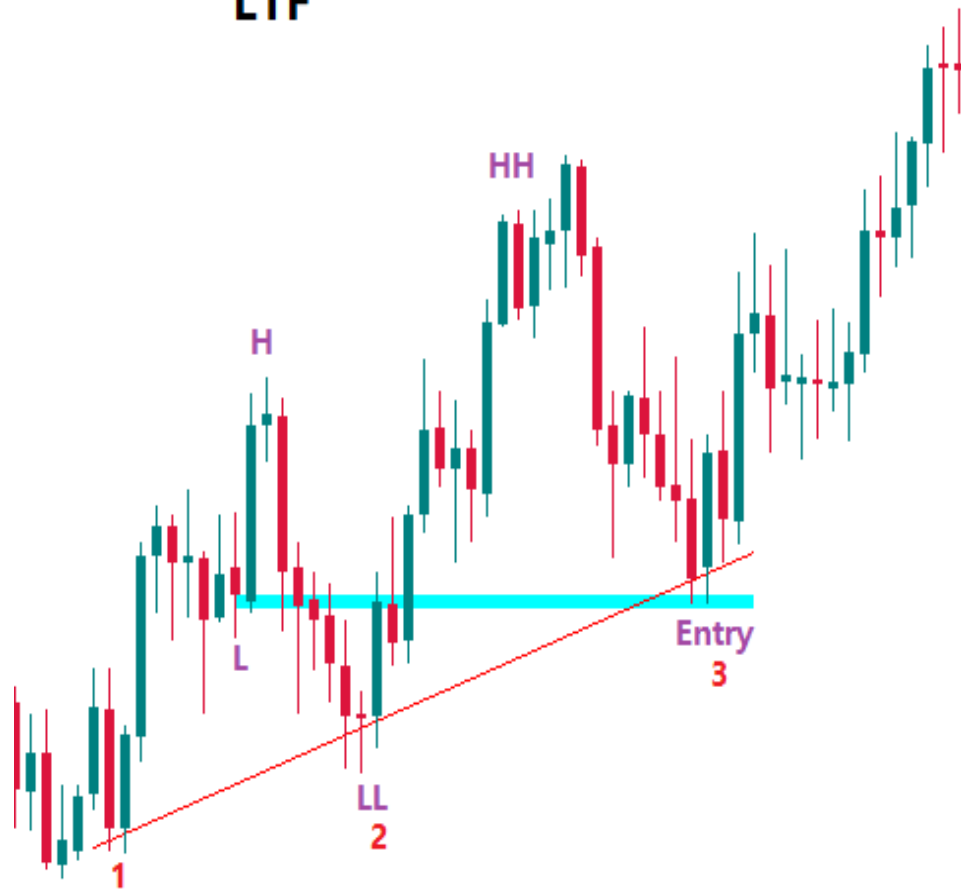

QMC + Confirmation 2

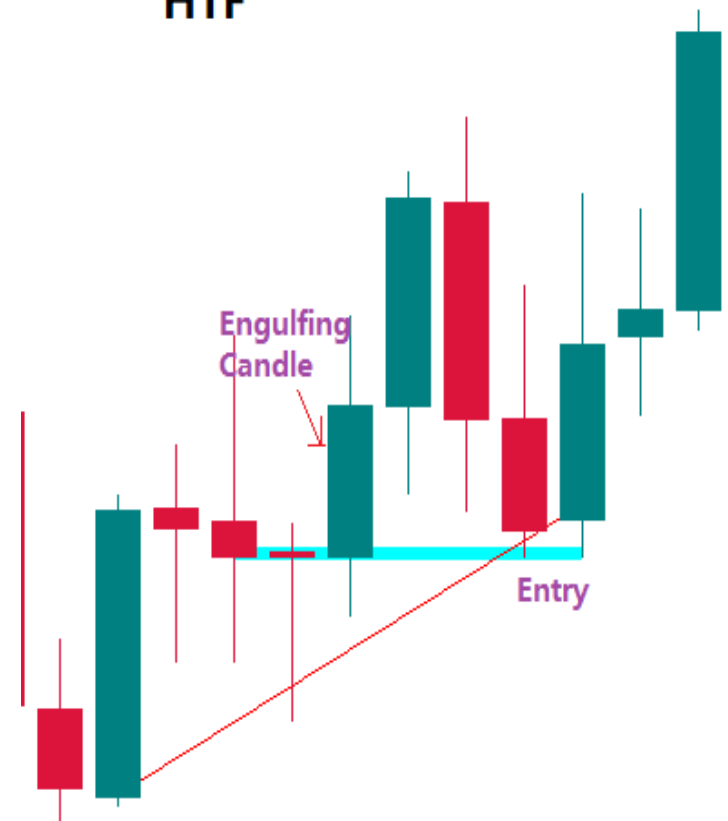

QMC + Confirmation 3

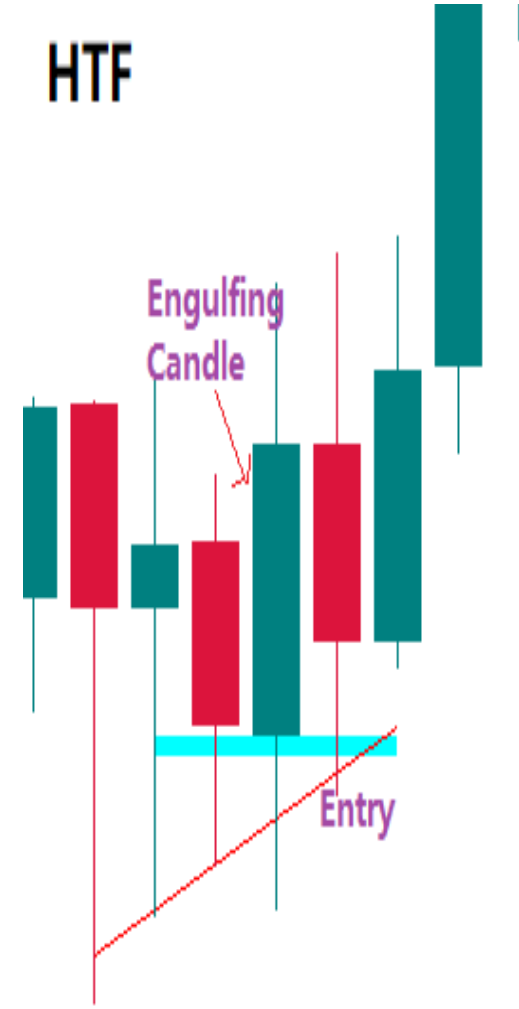

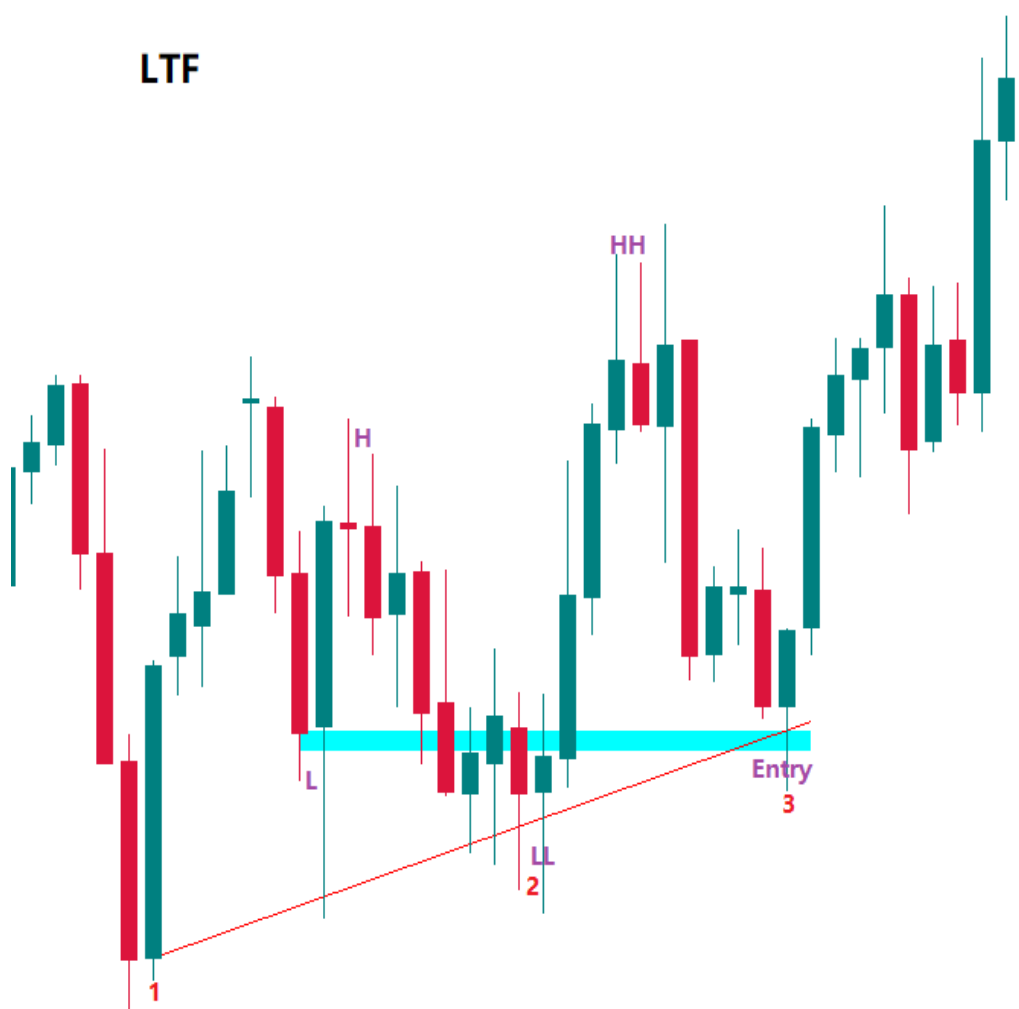

LTF

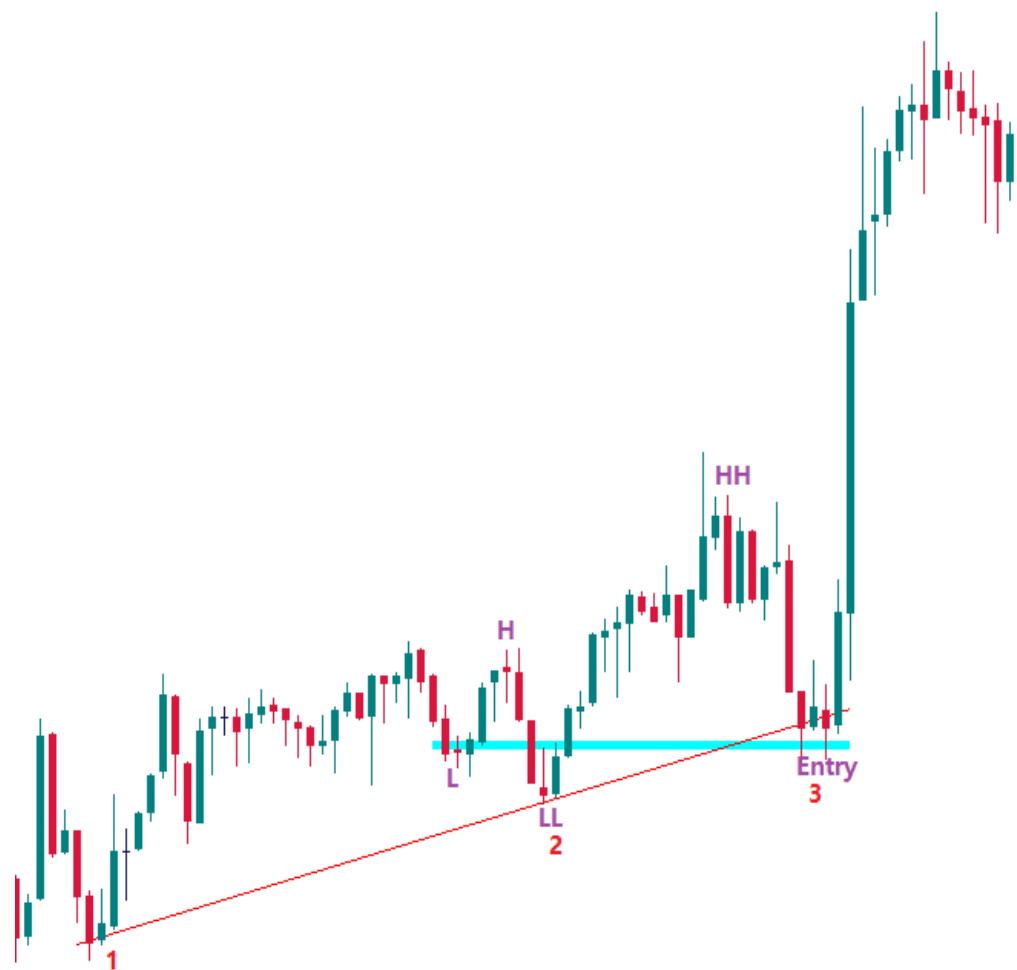

HTF

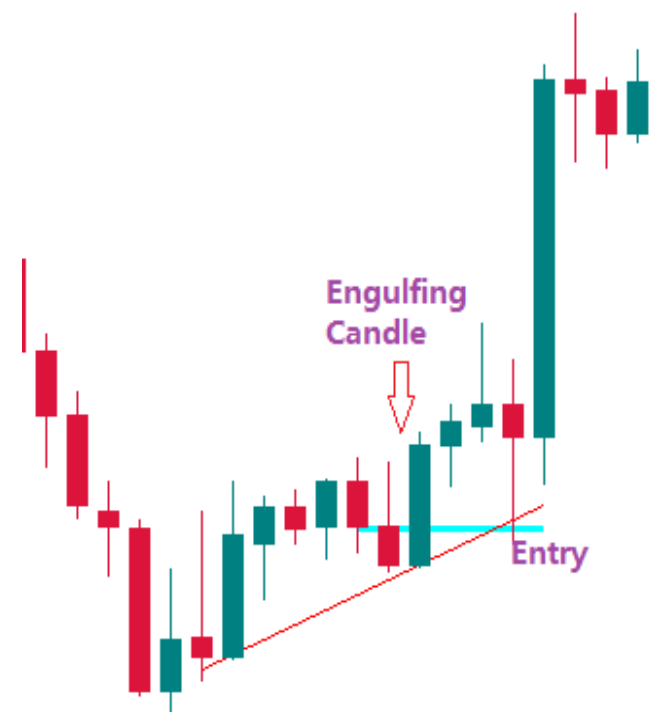

QMC + Confirmation 4

QMC + Confirmation 5

HTF

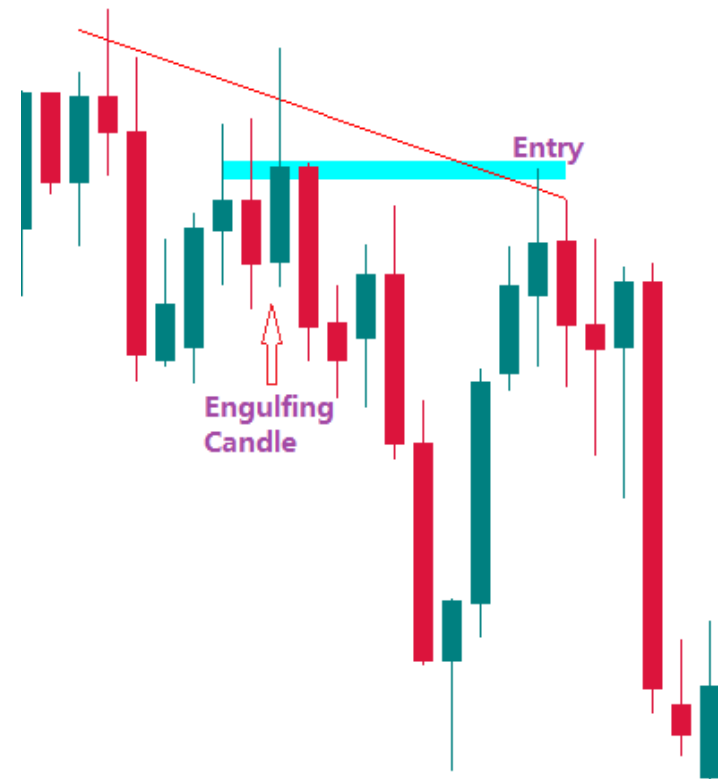

QMC + Confirmation 5

LTF

HTF

QMC Ends

QM2P

QM2P means **QMR + 2 points of trendline on the top of QM's head**

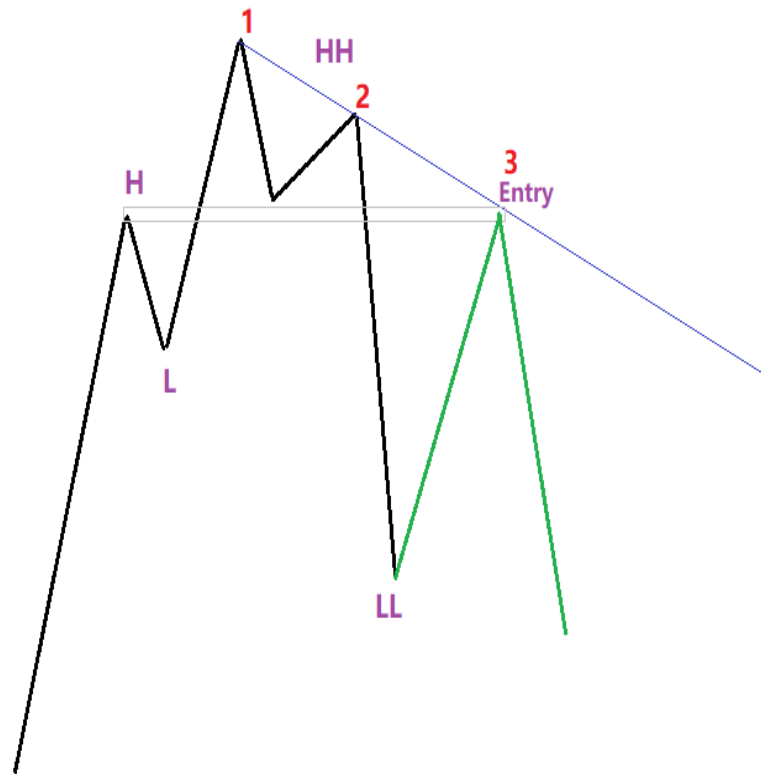

QM2P always appear in **reversal trend**

The structure of QM2P is just the same with QMR but **QM2P requires trendline.**

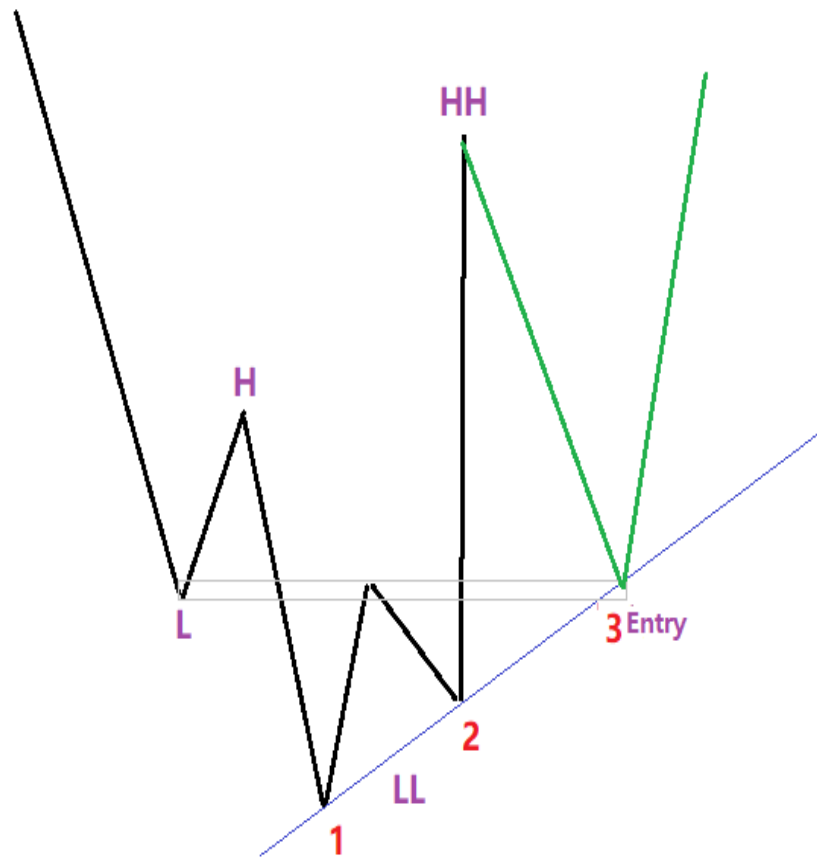

Unlike QMC, **QM2P's trendline located at the same head.**

Lets check it out

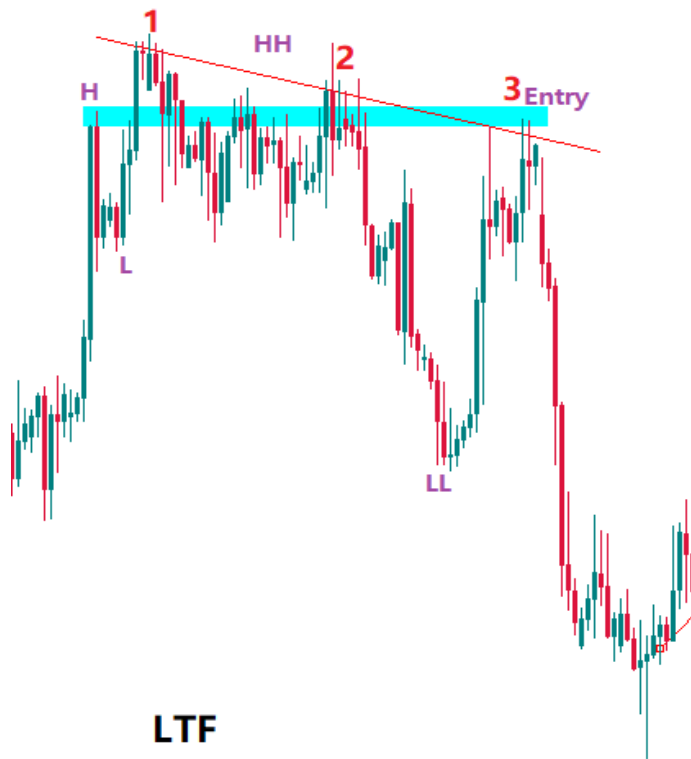

QM2P Formula (Sell)

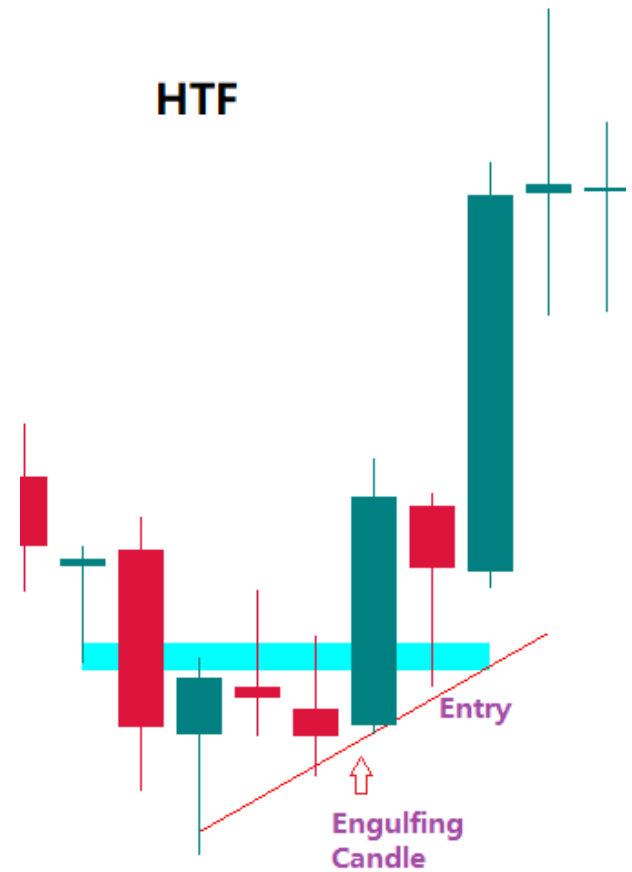

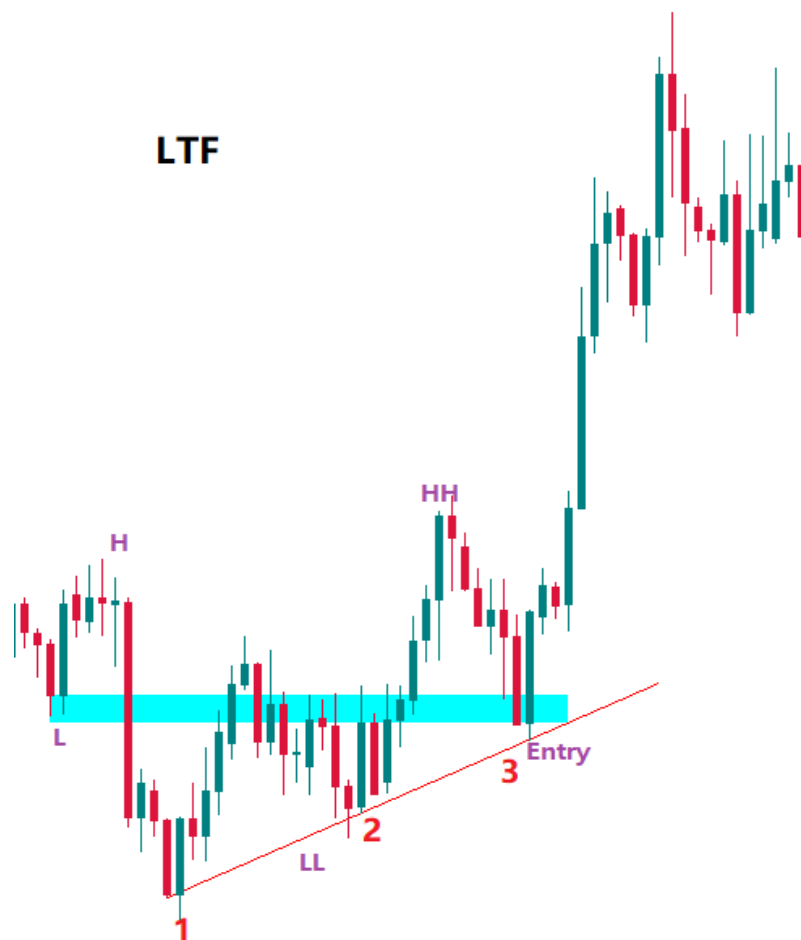

QM2P Formula (Buy)

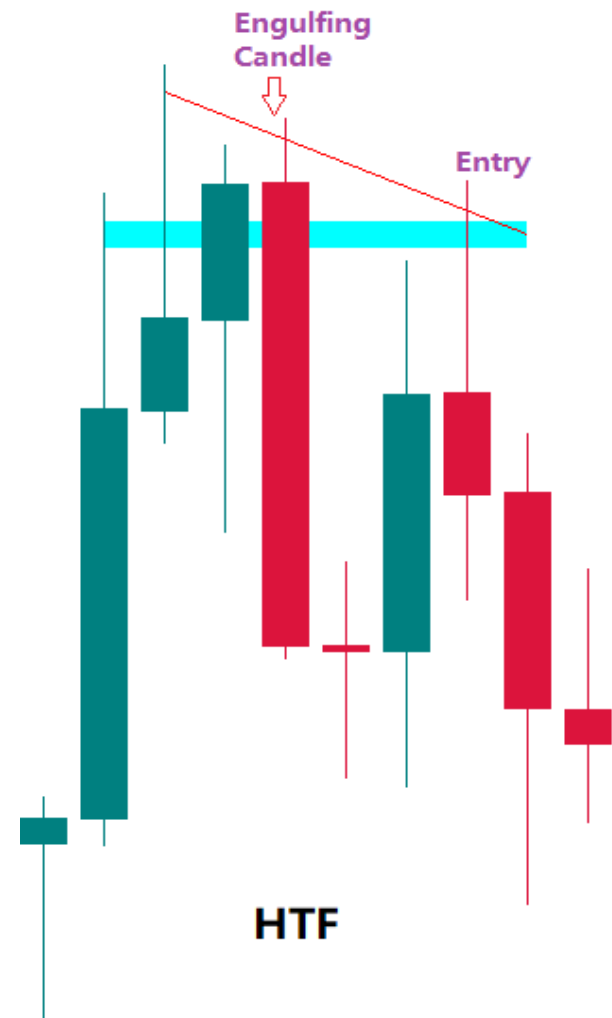

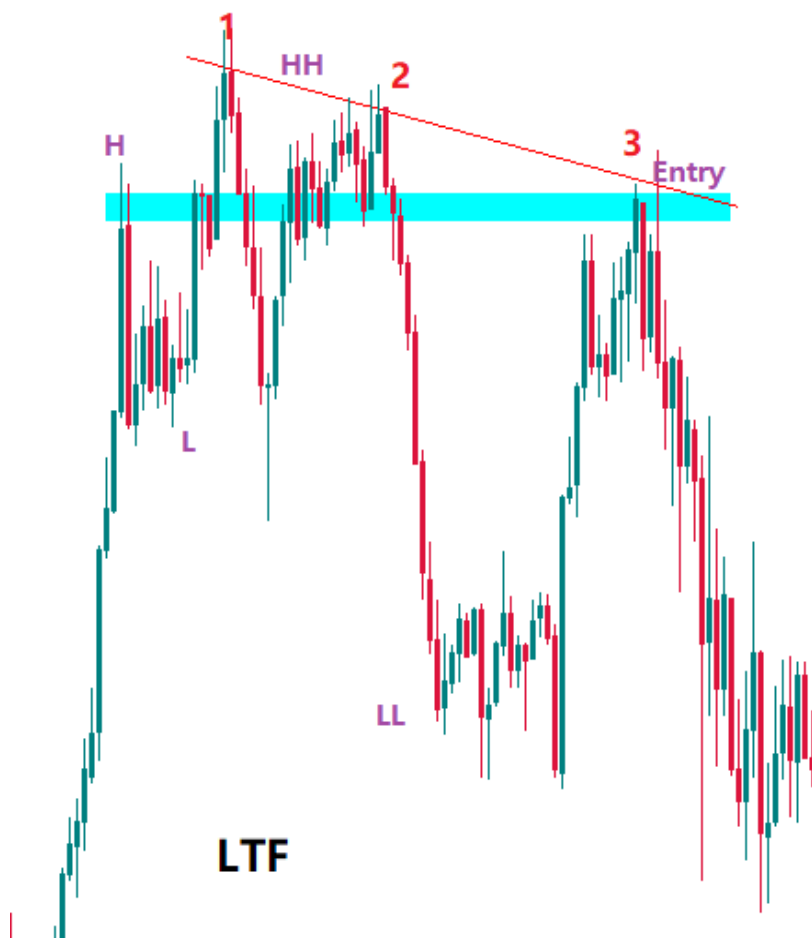

QM2P + Confirmation 1

QM2P + Confirmation 2

QM2P + Confirmation 3

QM2P + Confirmation 4

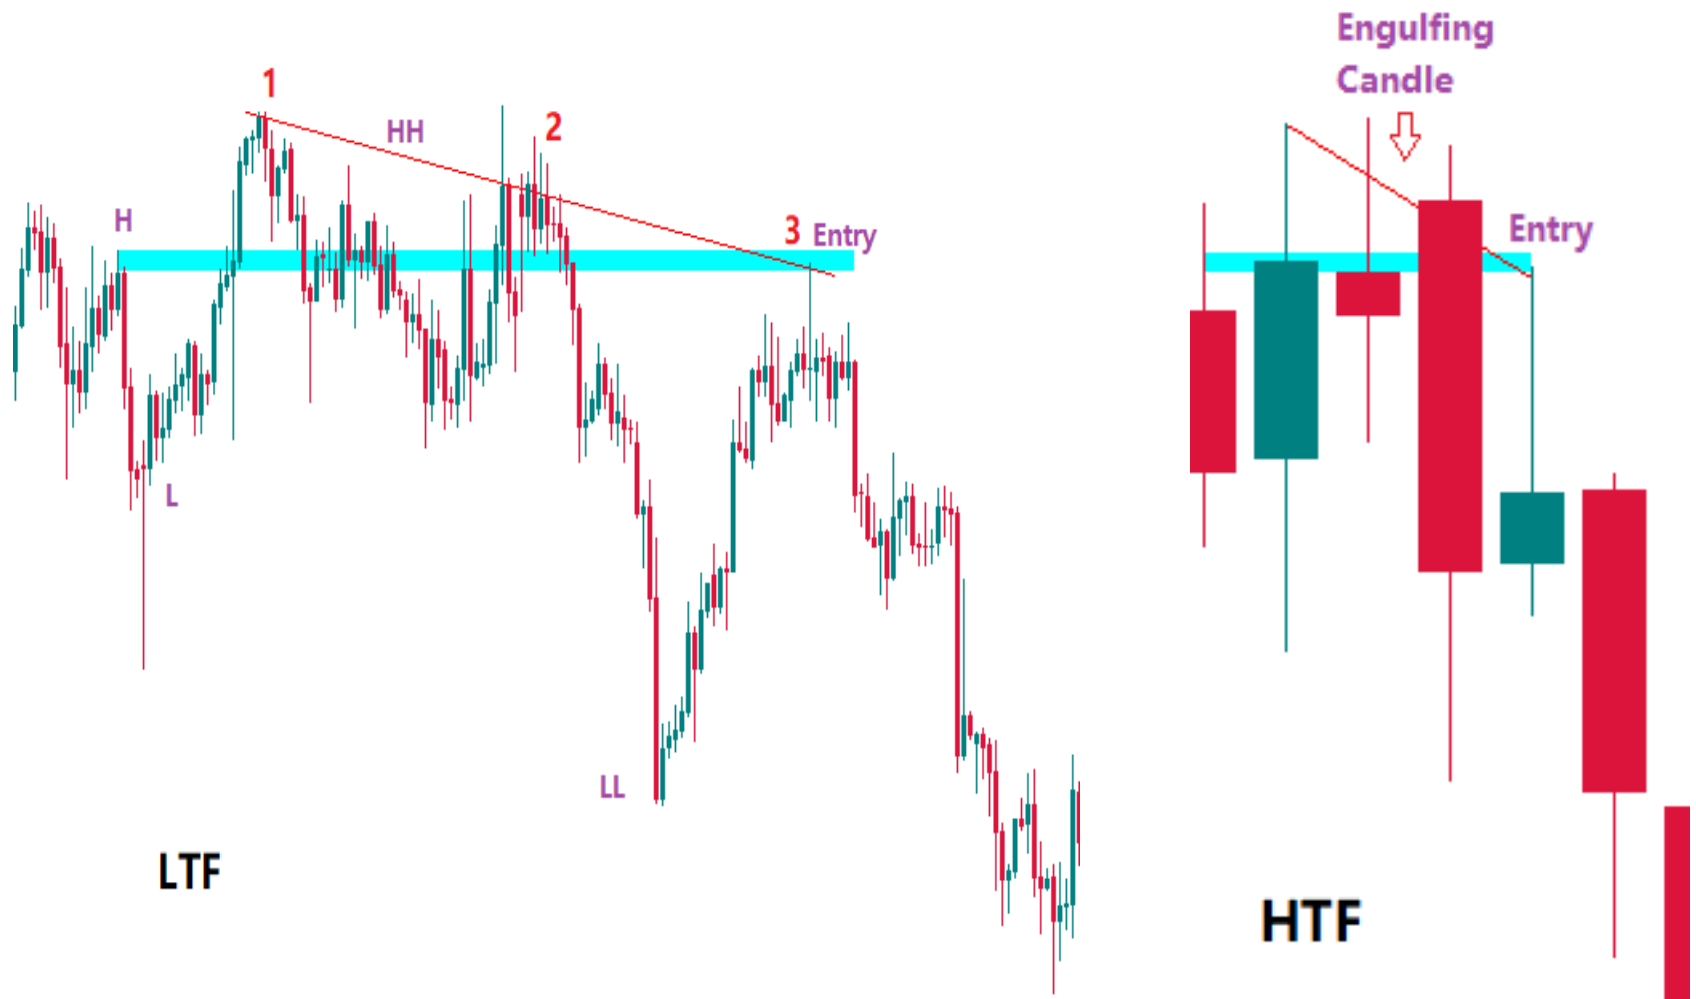

LTF

HTF

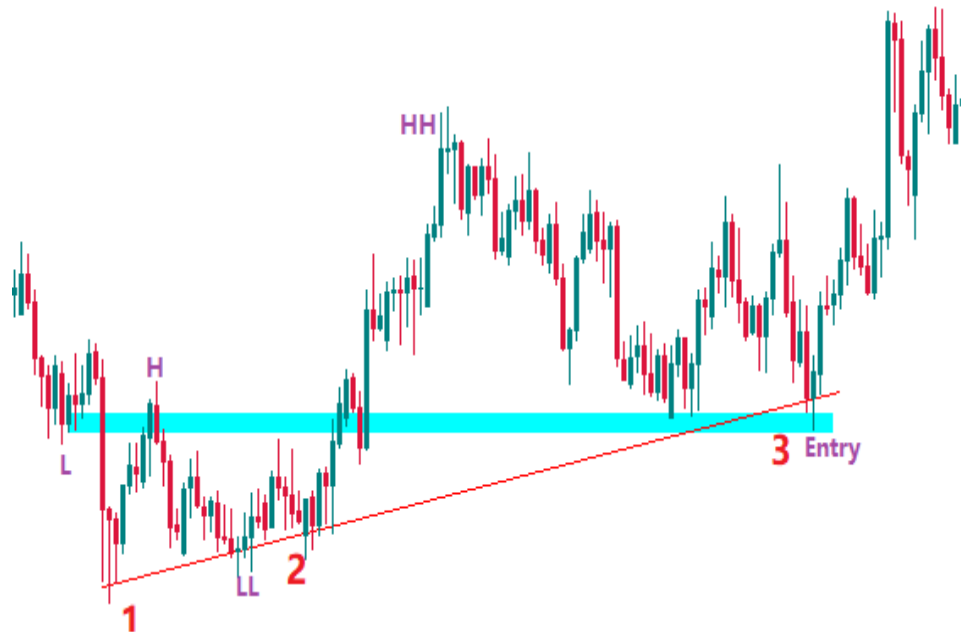

QM2P + Confirmation 5

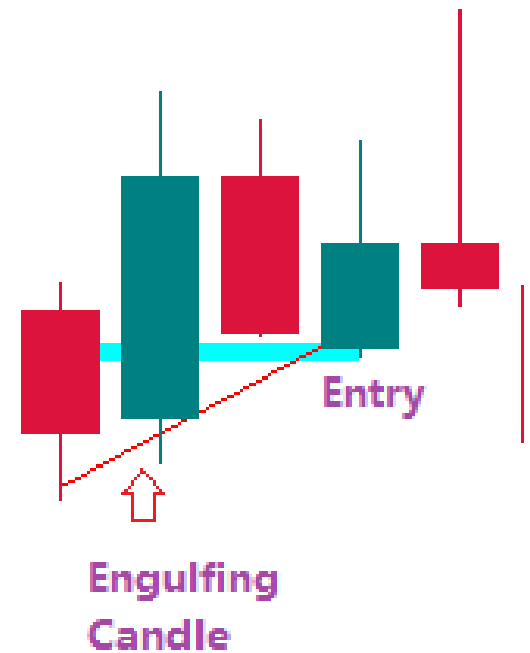

QM2P + Confirmation 6

LTF

HTF

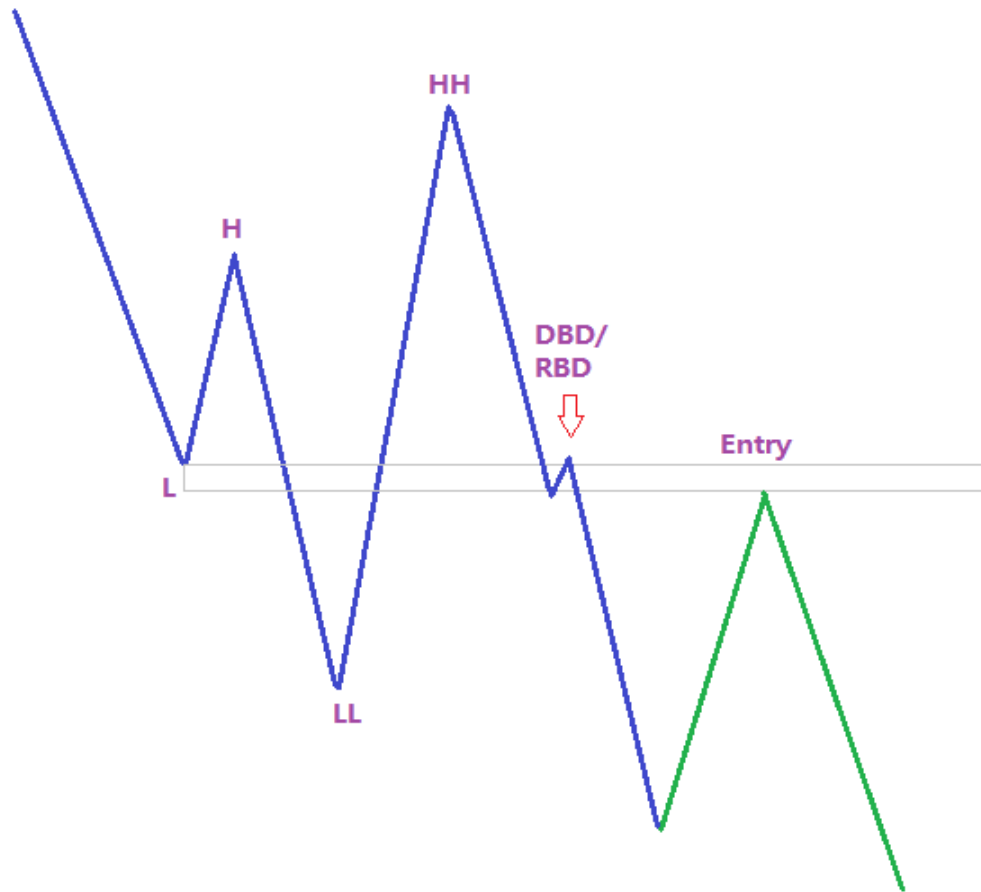

QM2P Ends

QMM (QM Manipulation)

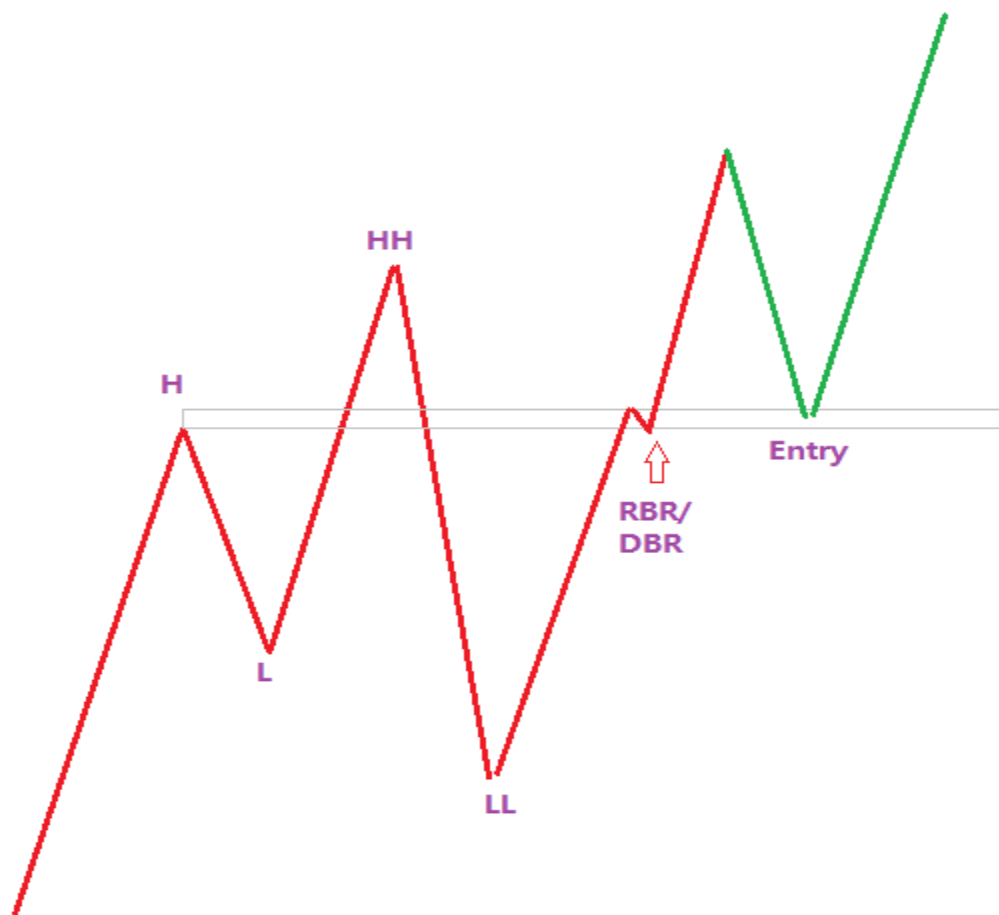

QM Manipulation occurs when the QMR failed and formed entry point in the same line with left shoulder of the failed QMR

There are so many types of QMM. But to be more secure, I like to entry at the QMM with formation of engulfing in the Higher TF

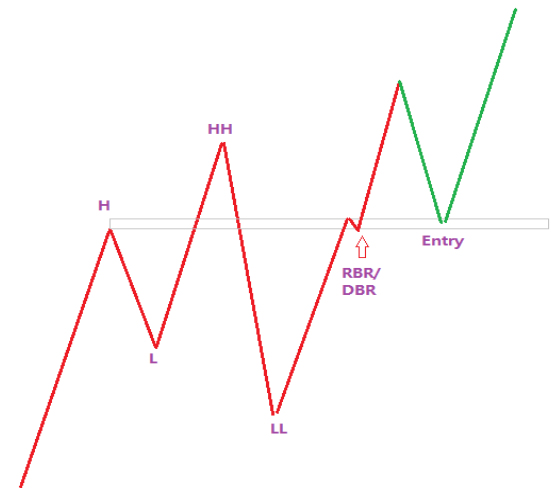

QMM Formula (Sell)

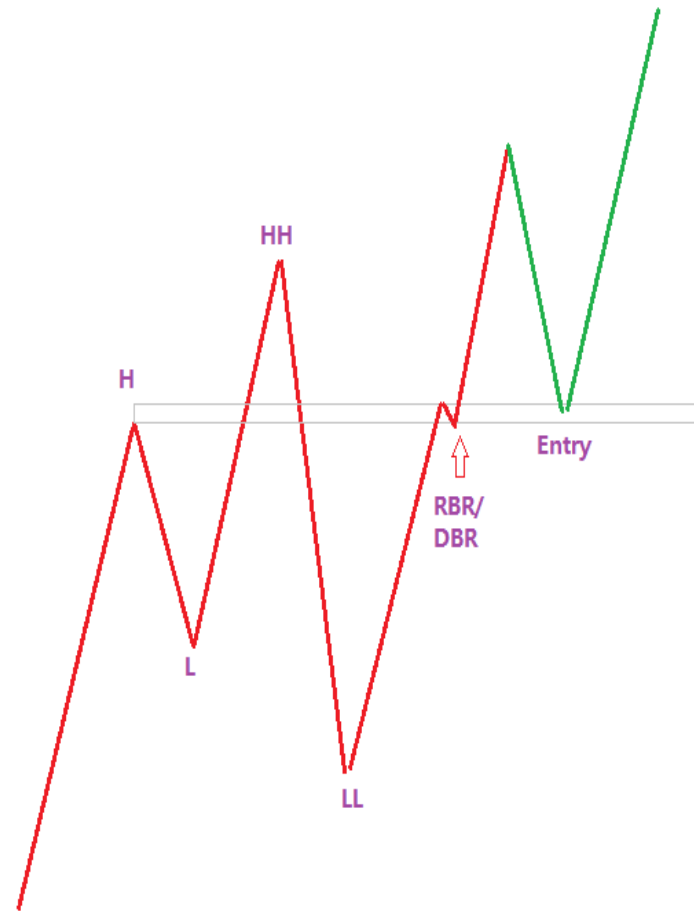

QMM Formula (Buy)

QMM Example 1

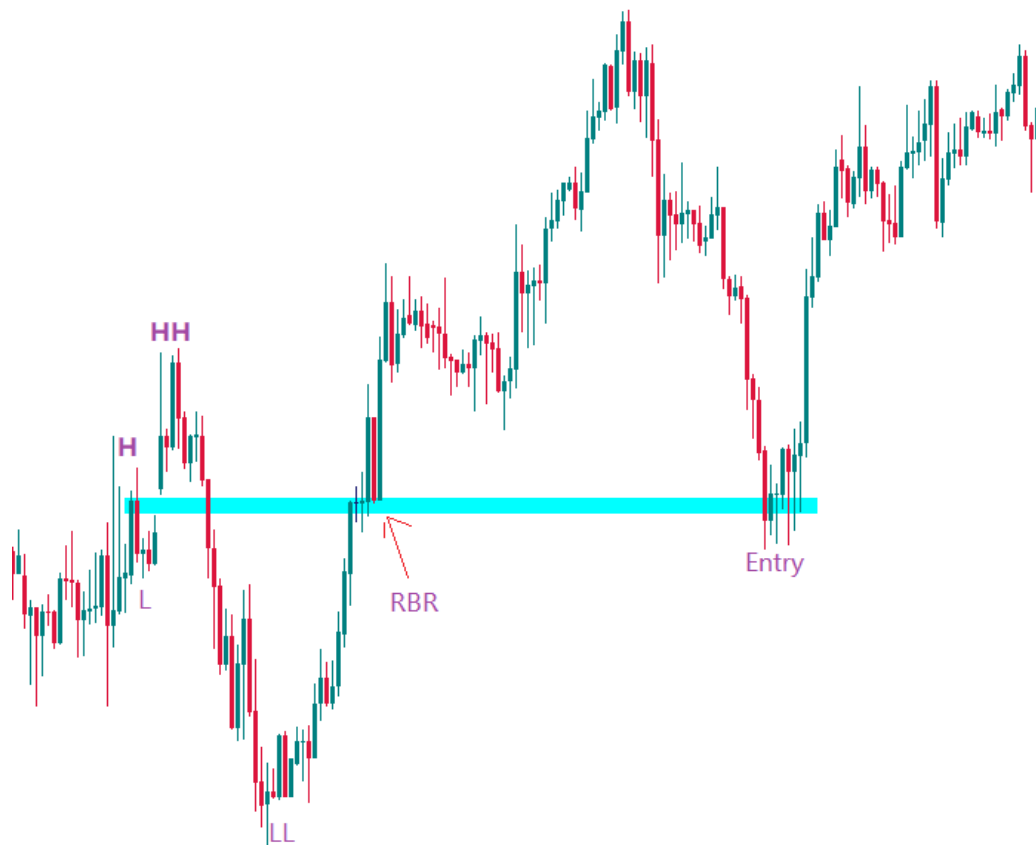

QMM Example 2

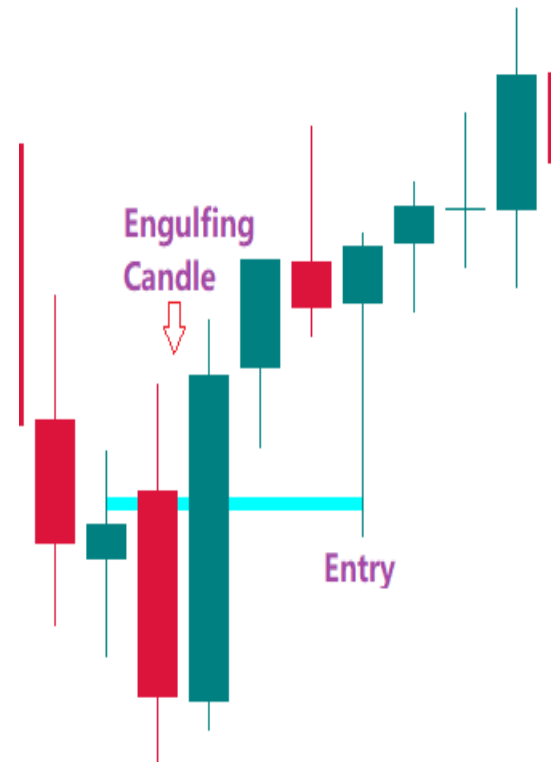

QMM Example 3

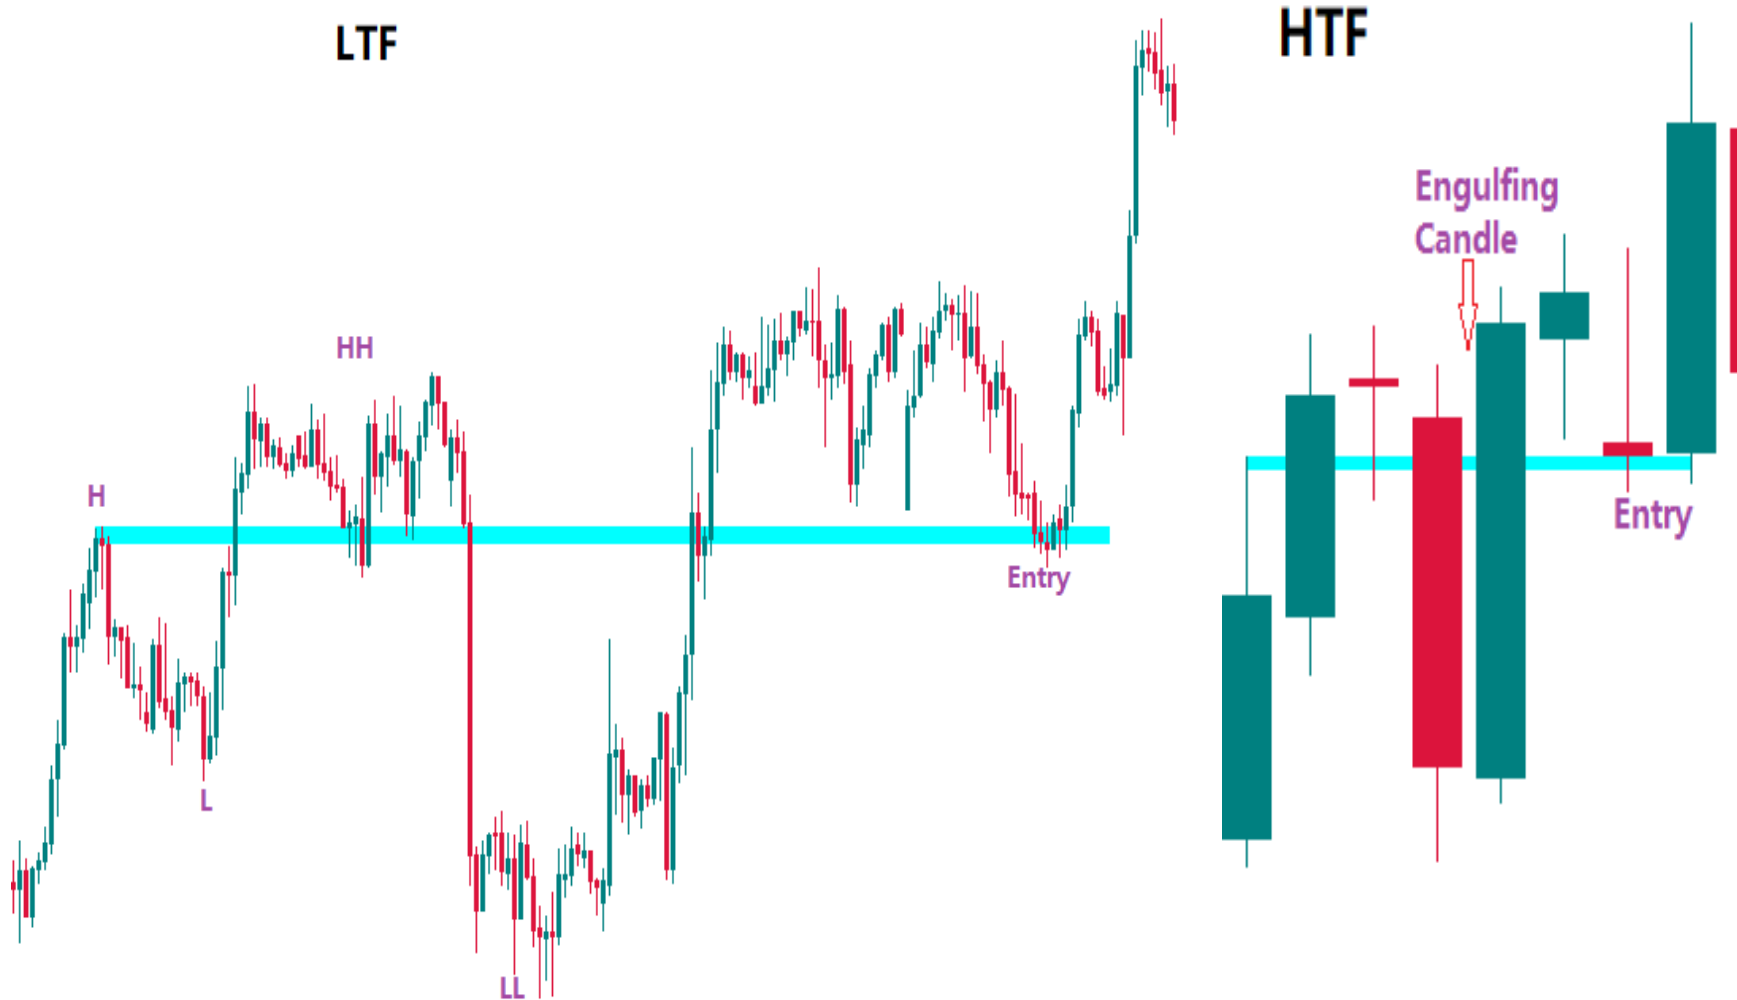

QMM + Confirmation 1

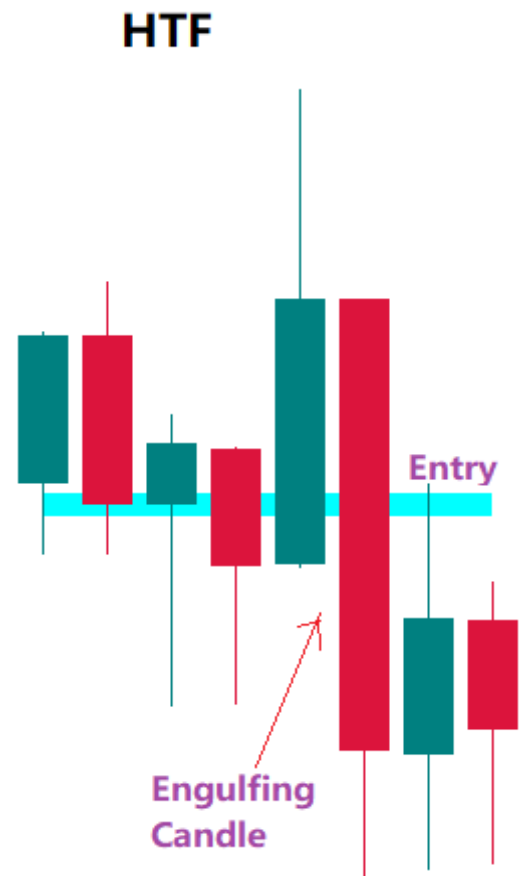

HTF

QMM + Confirmation 2

QMM + Confirmation 3

QMM Ends

Blindspot Chapter 1

It's called Blindspot because it has **no entry point** or setup.

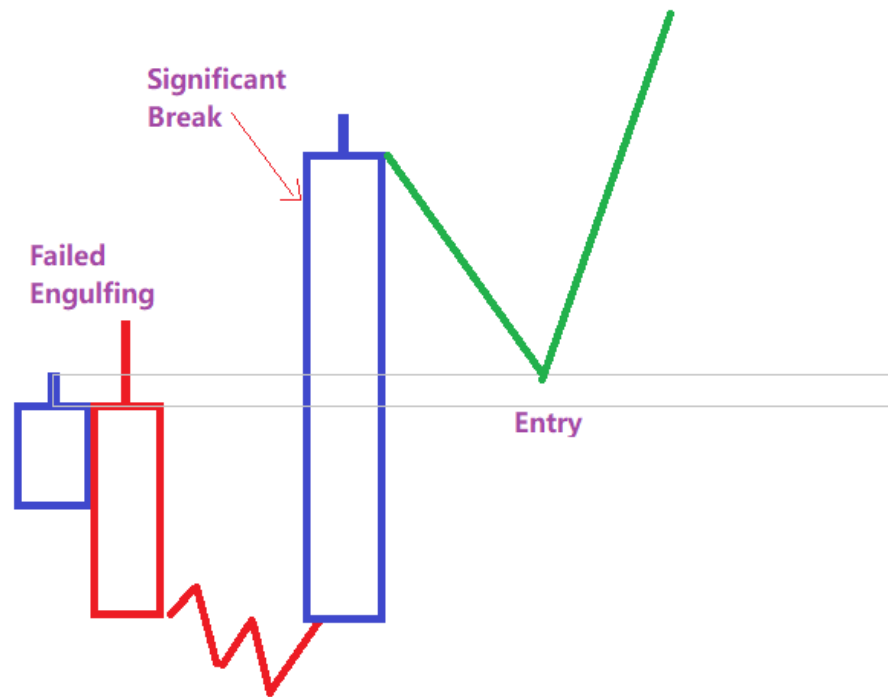

Blindspot often appear in **reversal trends**.

Blindspot is also called swap. But, not all types of swaps can be trusted.

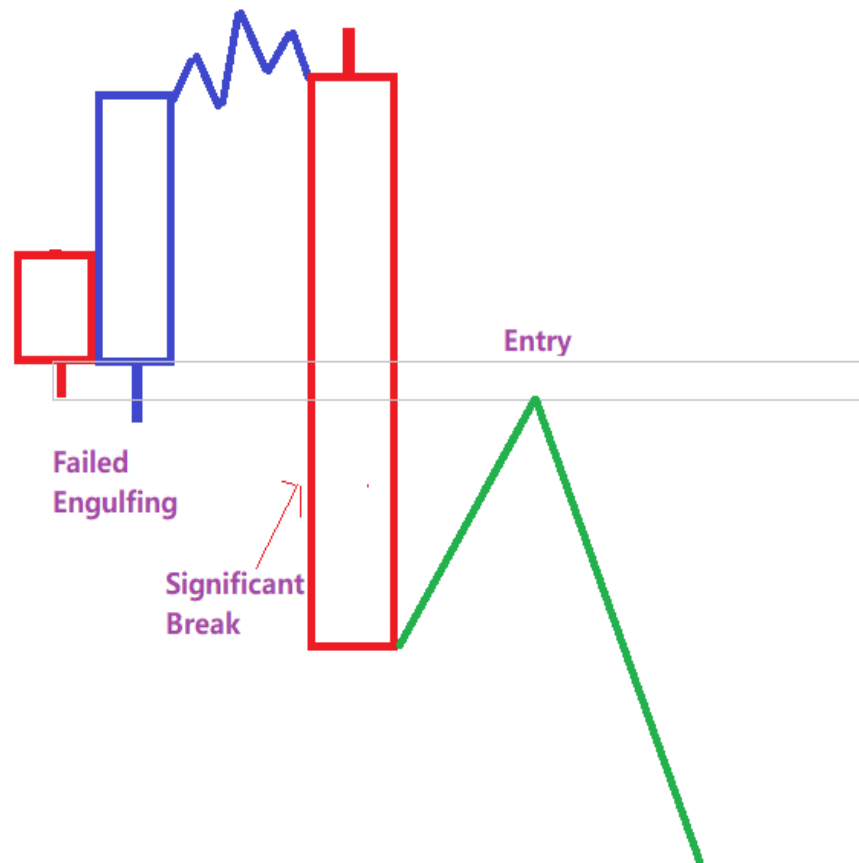

That is why I called it blindspot. It has **no entry point** and **price hides something in each TF**.

As usual, I prefer entry with **confirmation**

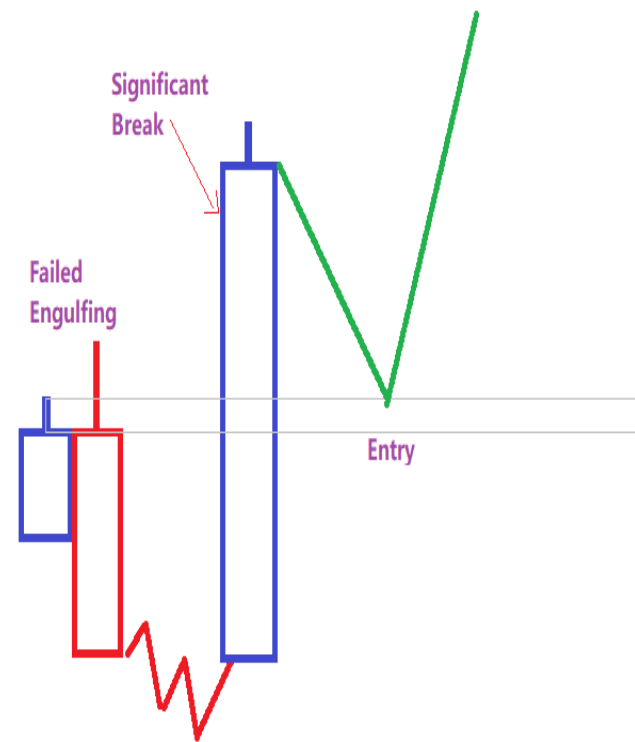

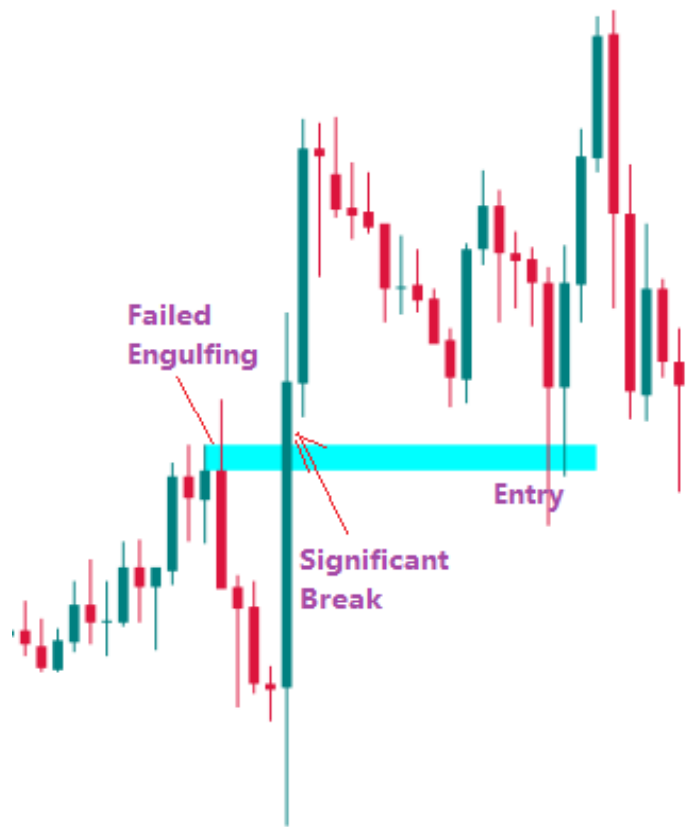

Blindspot Formula (Buy)

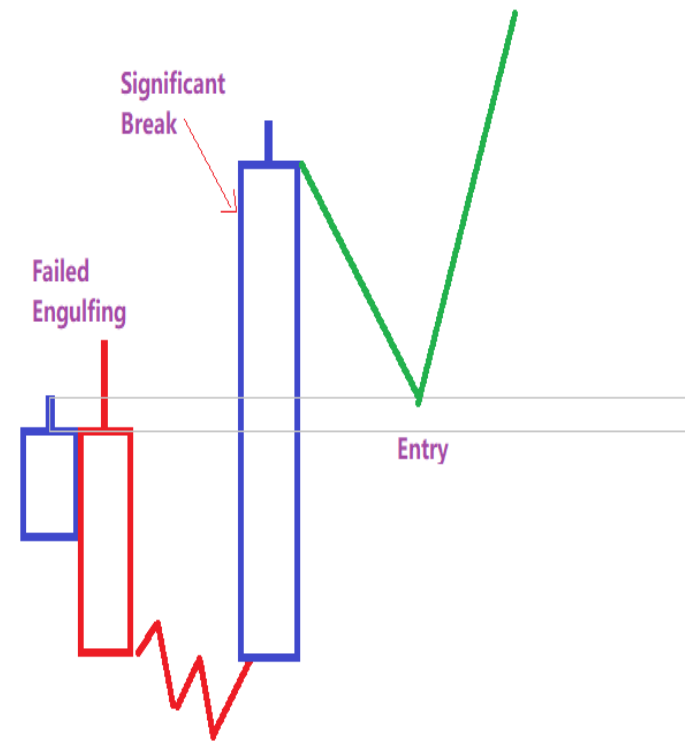

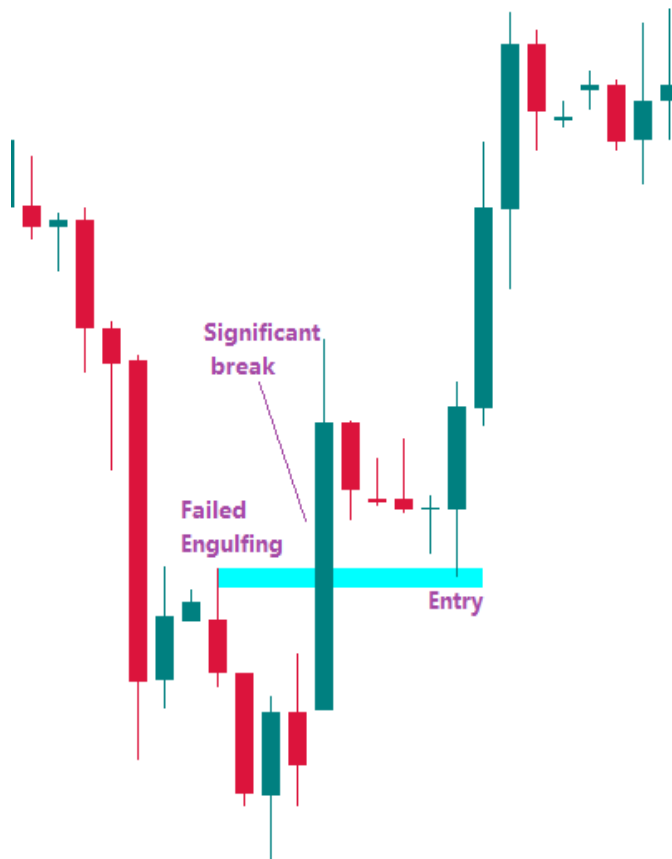

Blindspot Formula (Sell)

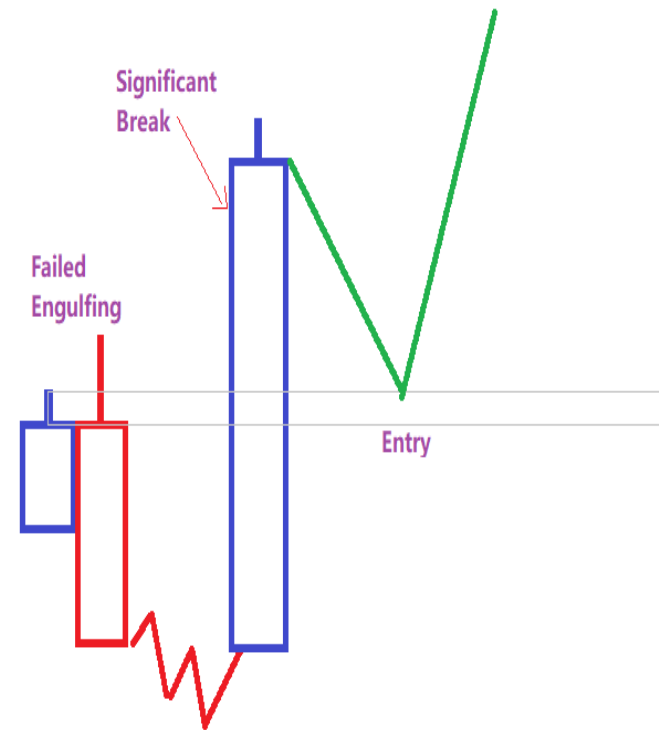

Blindspot (Example 1)

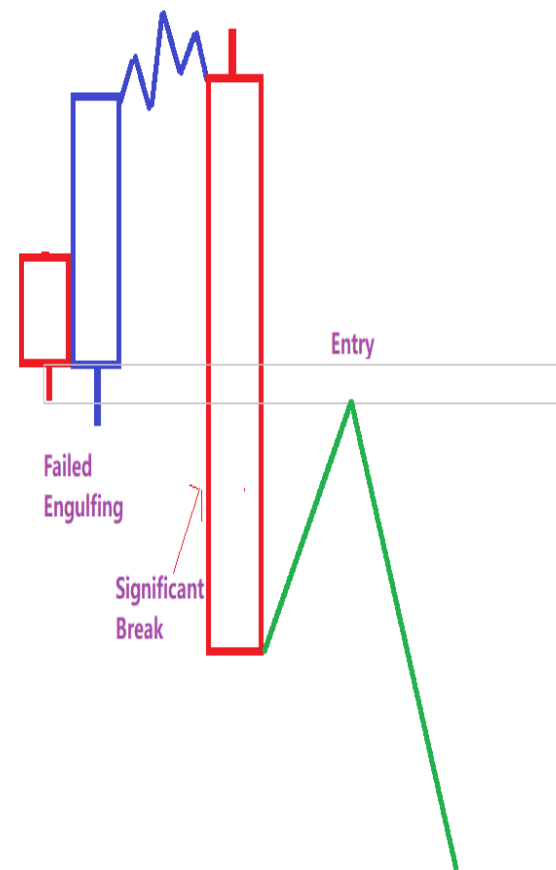

Blindspot (Example 2)

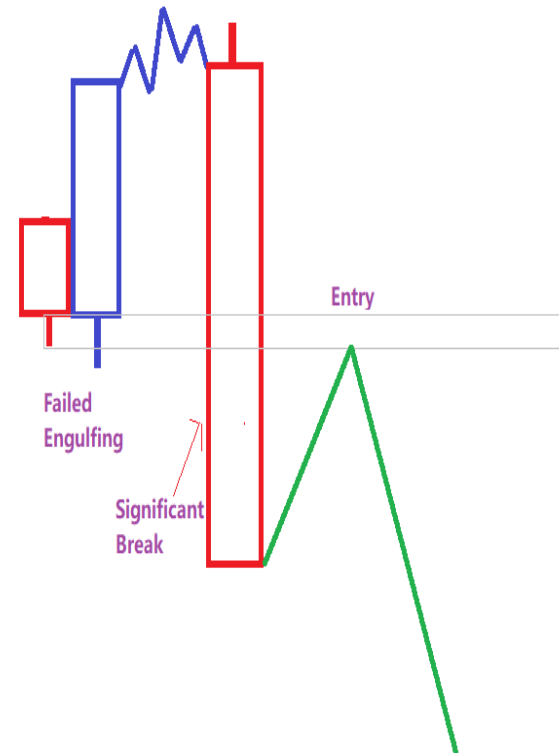

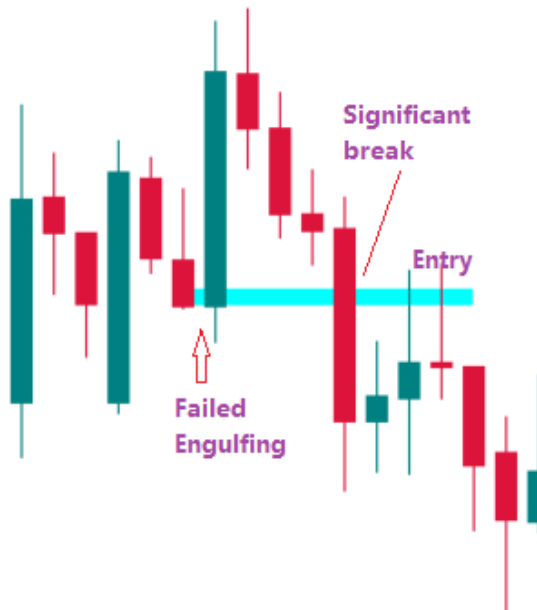

Blindspot (Example 3)

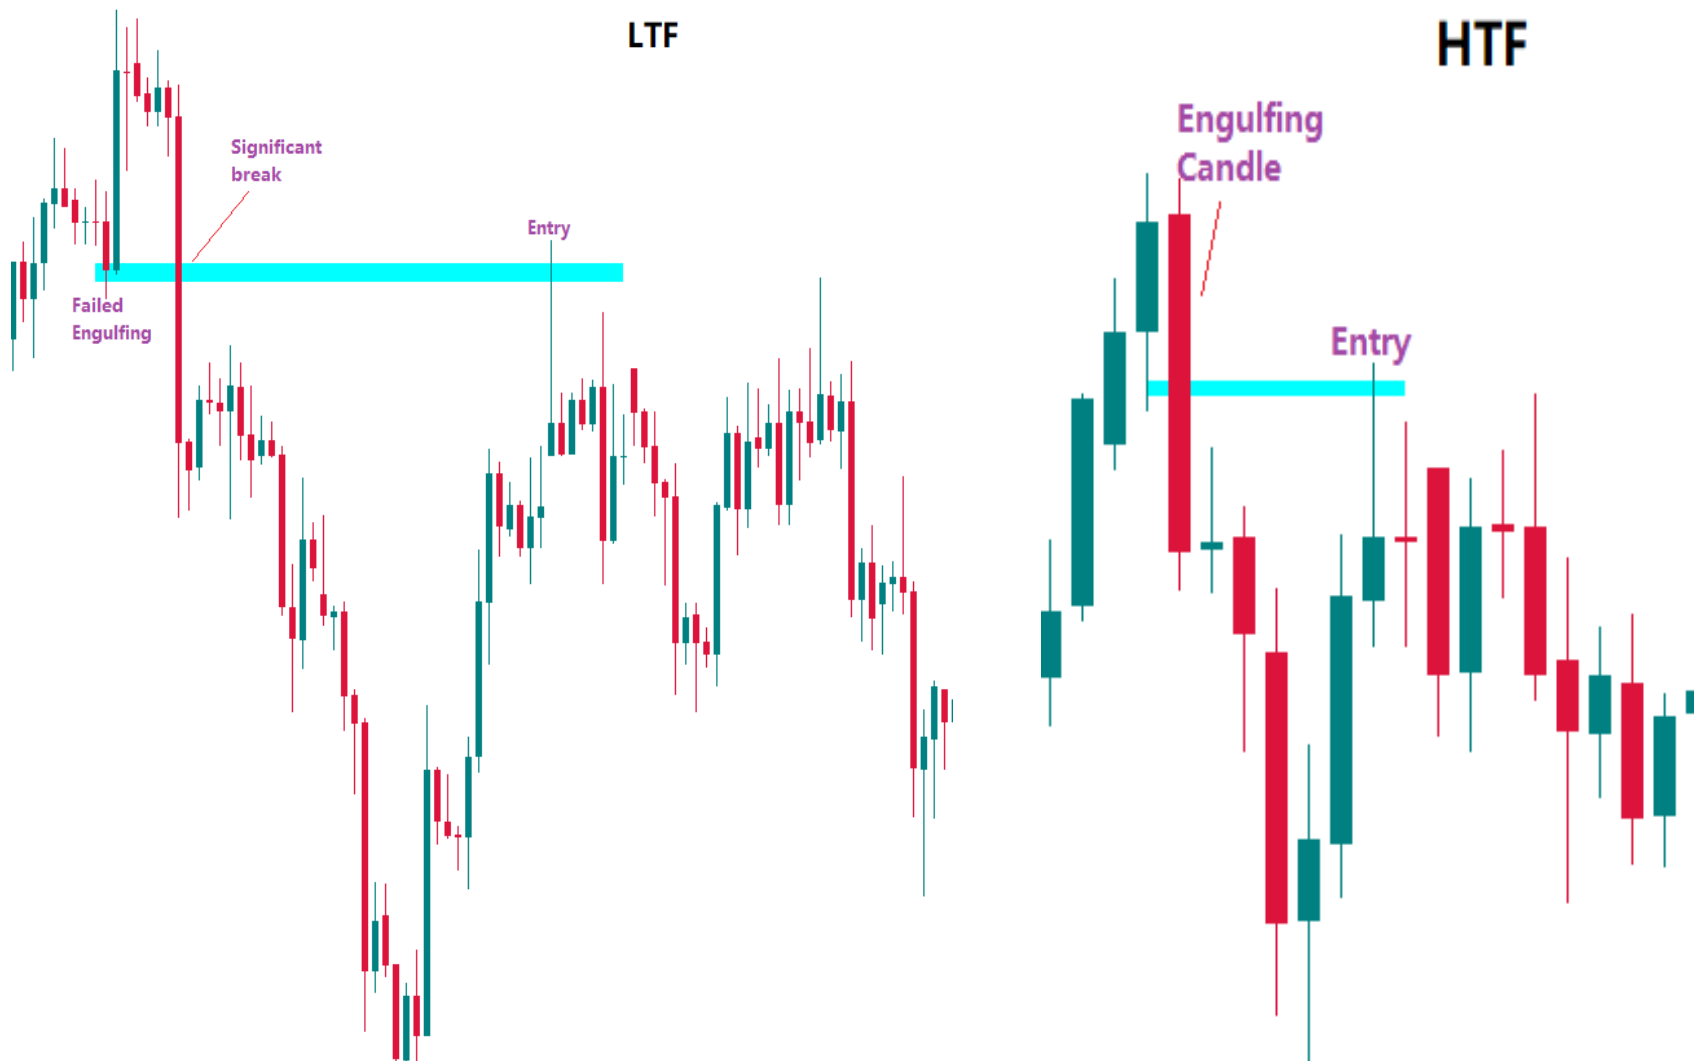

Blindspot (Example 4)

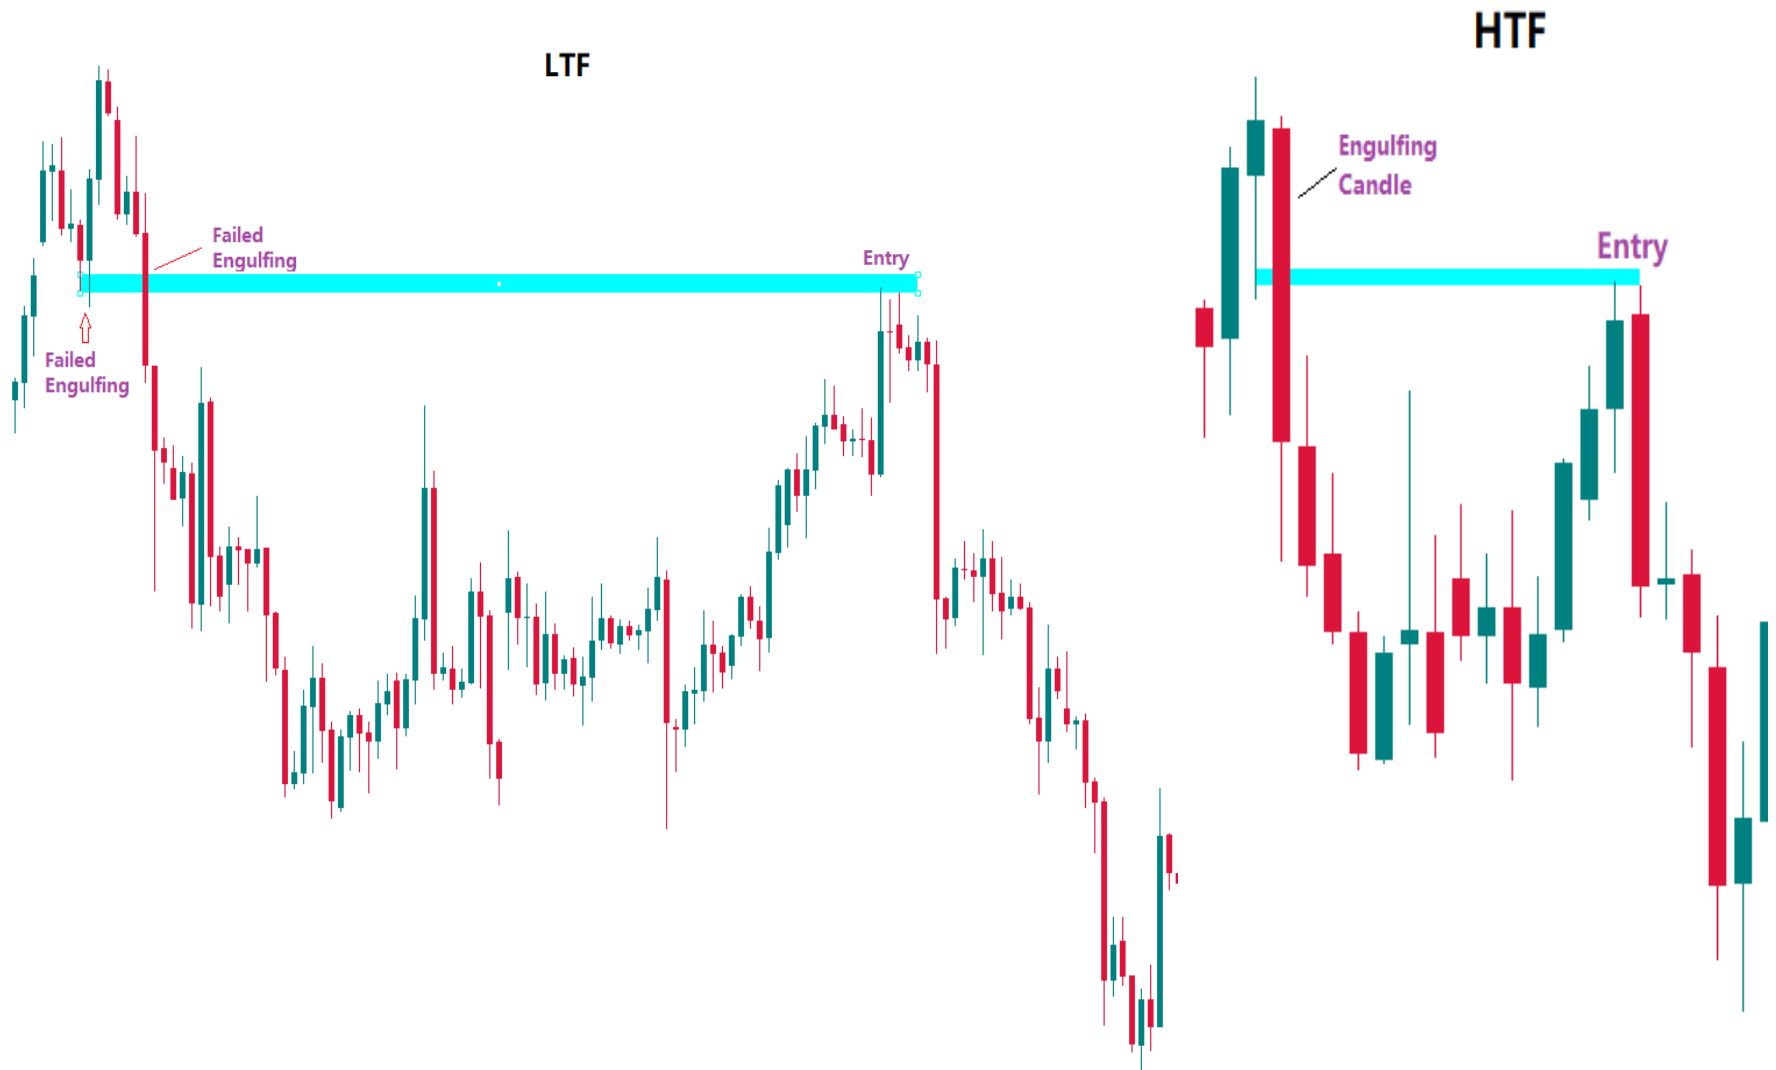

Blindspot (Example 5)

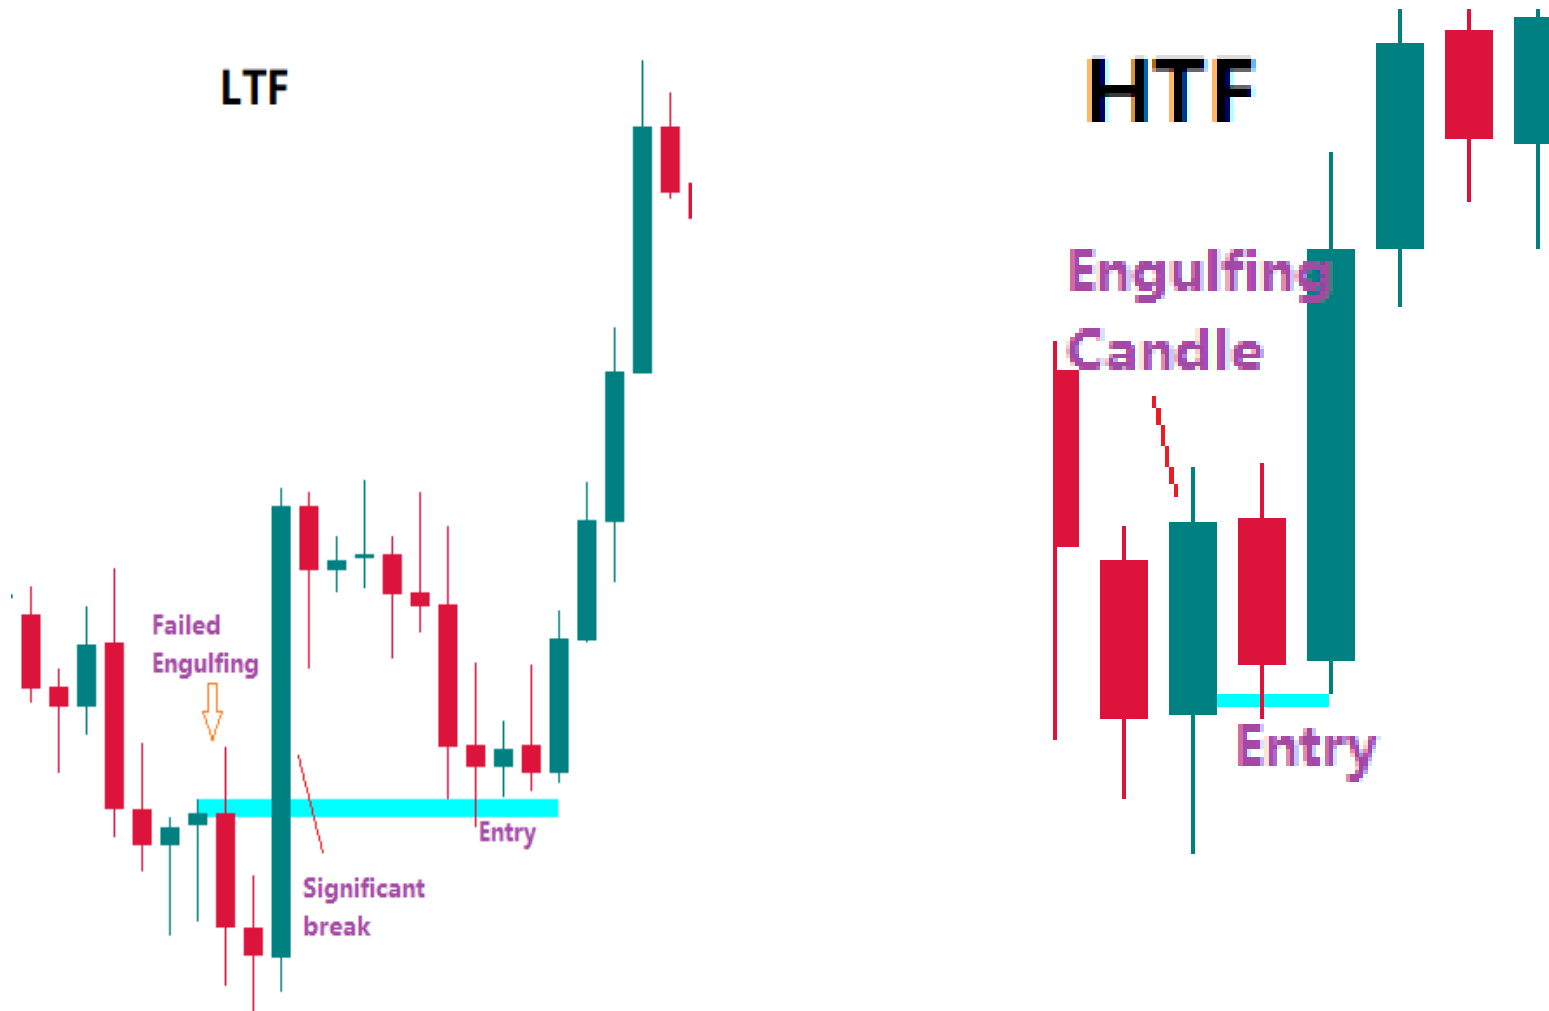

Blindspot + Confirmation 1

Blindspot + Confirmation 2

Blindspot + Confirmation 3

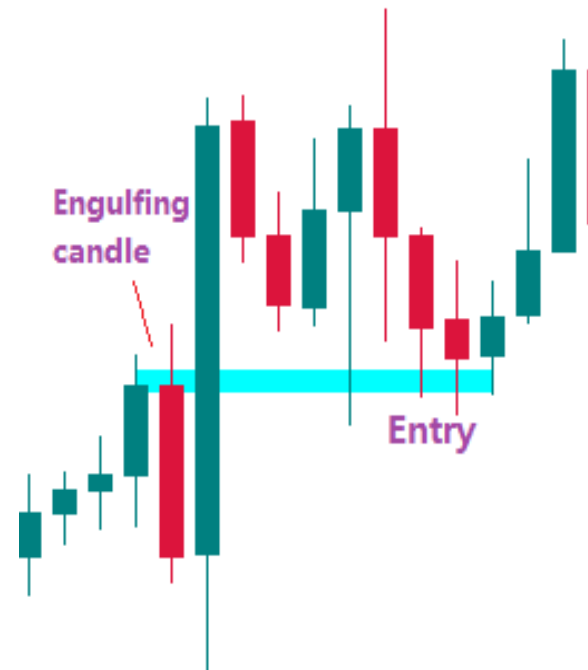

Blindspot + Confirmation 4

LTF

HTF

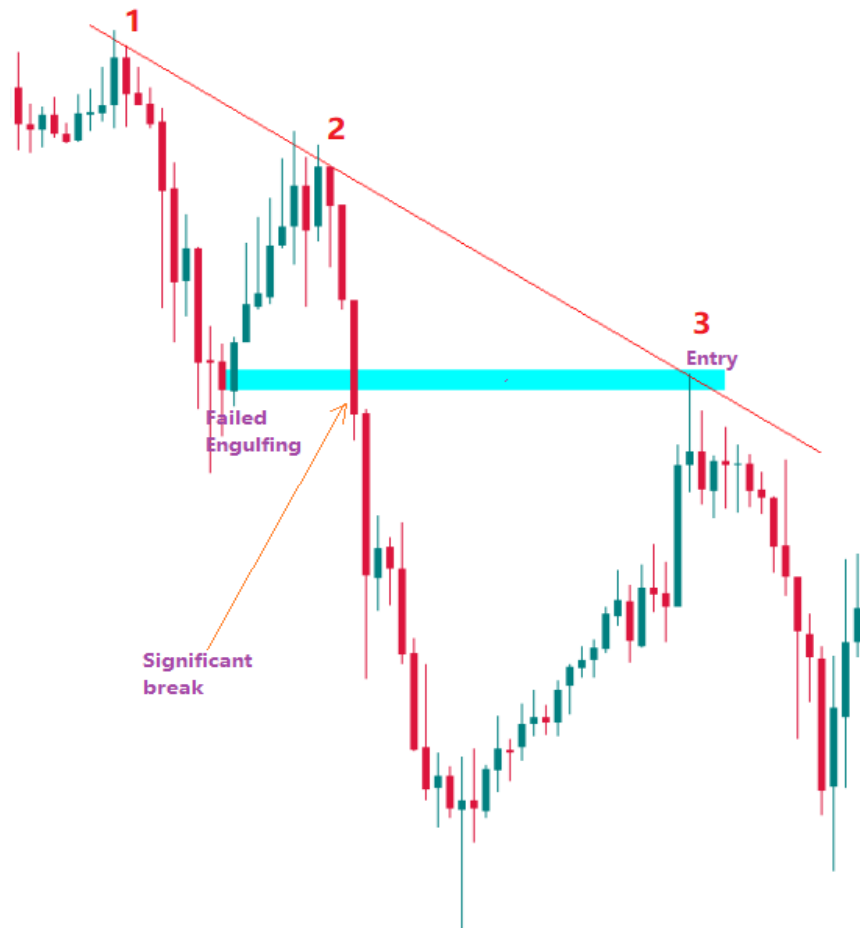

Blindspot Chapter 1 Ends

Blindspot Chapter 2

Blindspot 2 is just the same as Blindspot 1.

Its only **added trendline** as **confirmation** or **confluence** for more confidence.

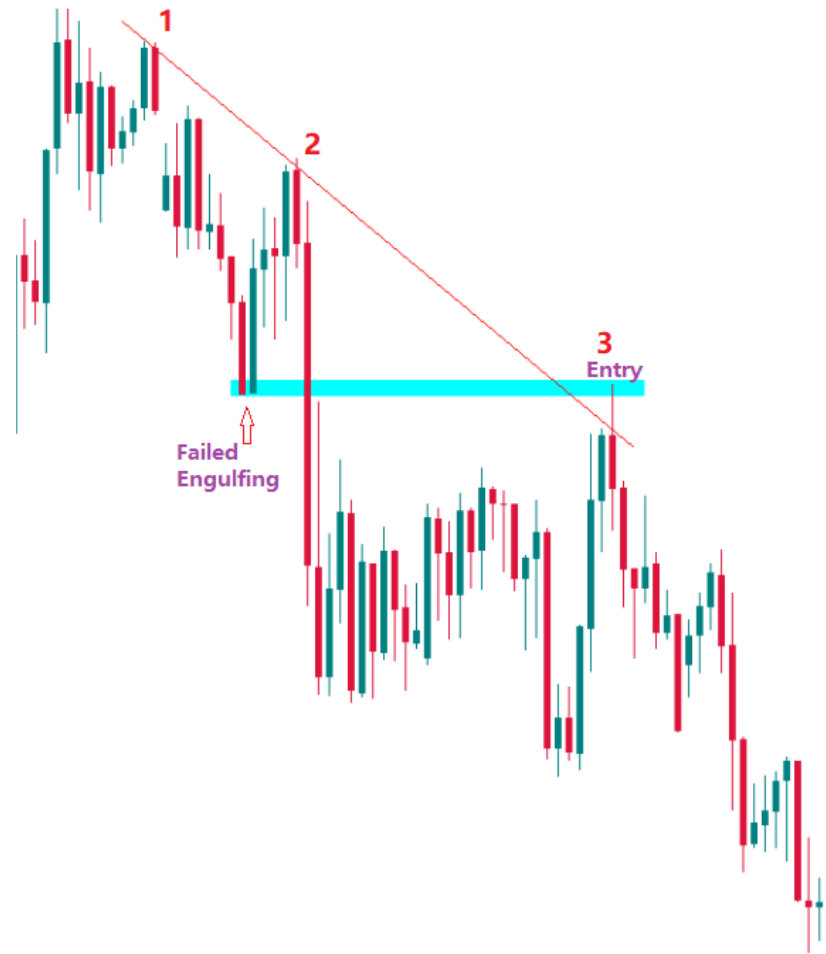

Blindspot 2 (Example 1)

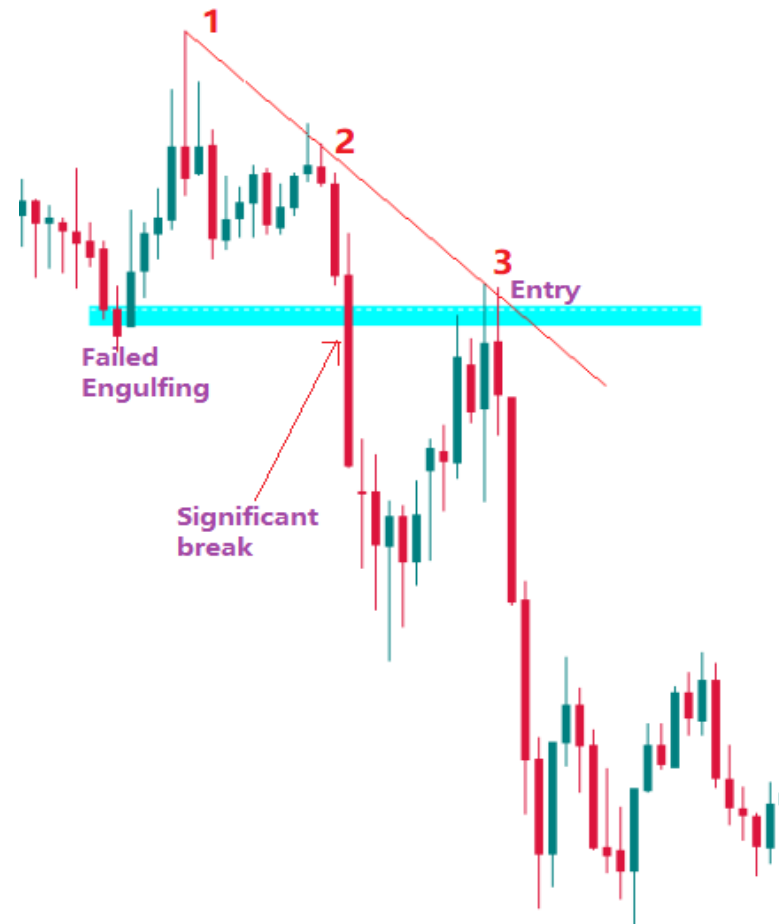

Blindspot 2 (Example 2)

Blindspot 2 (Example 3)

Blindspot 2 (Example 4)

Blindspot 2 (Example 5)

Blindspot 2 (Example 6)

Blindspot 2 (Example 7)

Blindspot Chapter 2 Ends

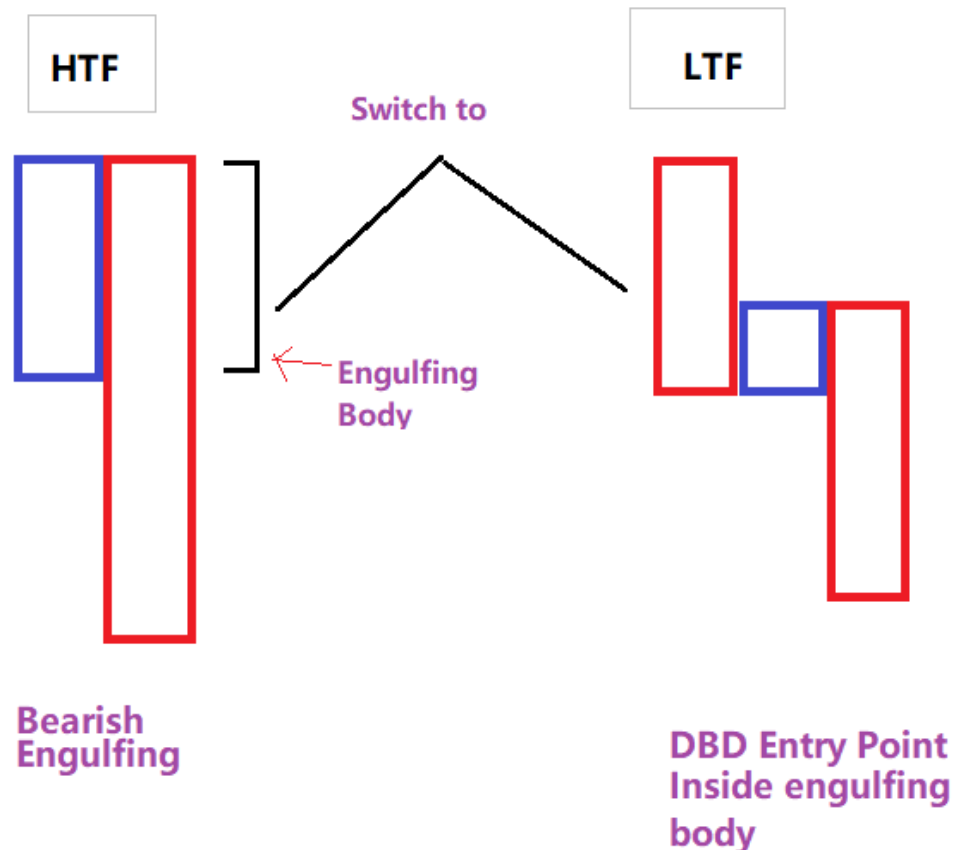

Manipulation Entry Formula

Manipulation is in the category of reversal.

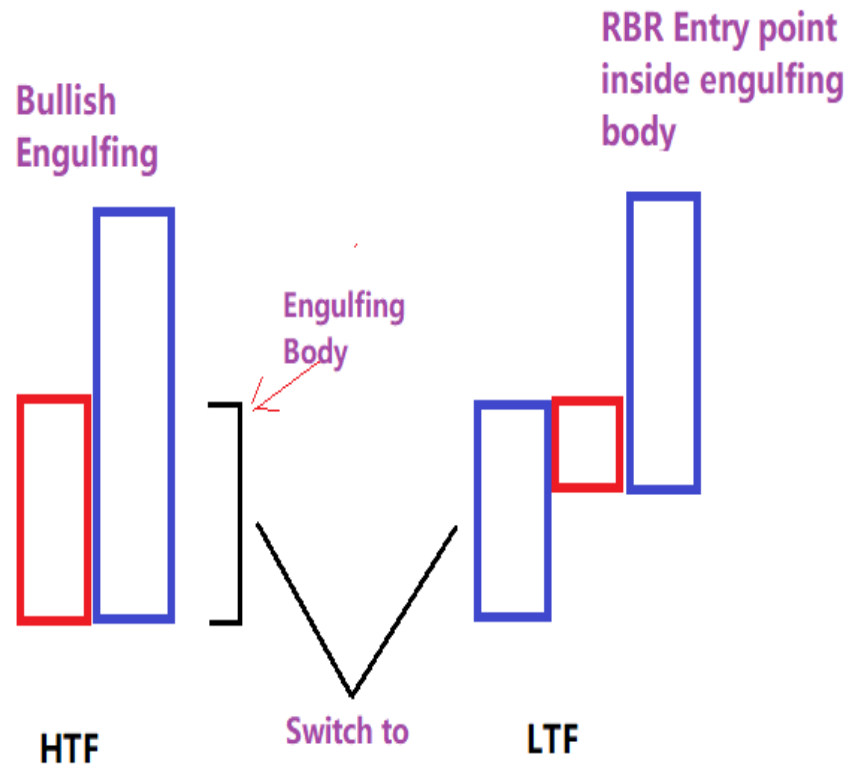

This setup is more high risk than QMR.

The valid manipulation always appears in HTF

Manipulation Formula (Sell)

Manipulation Formula (Buy)

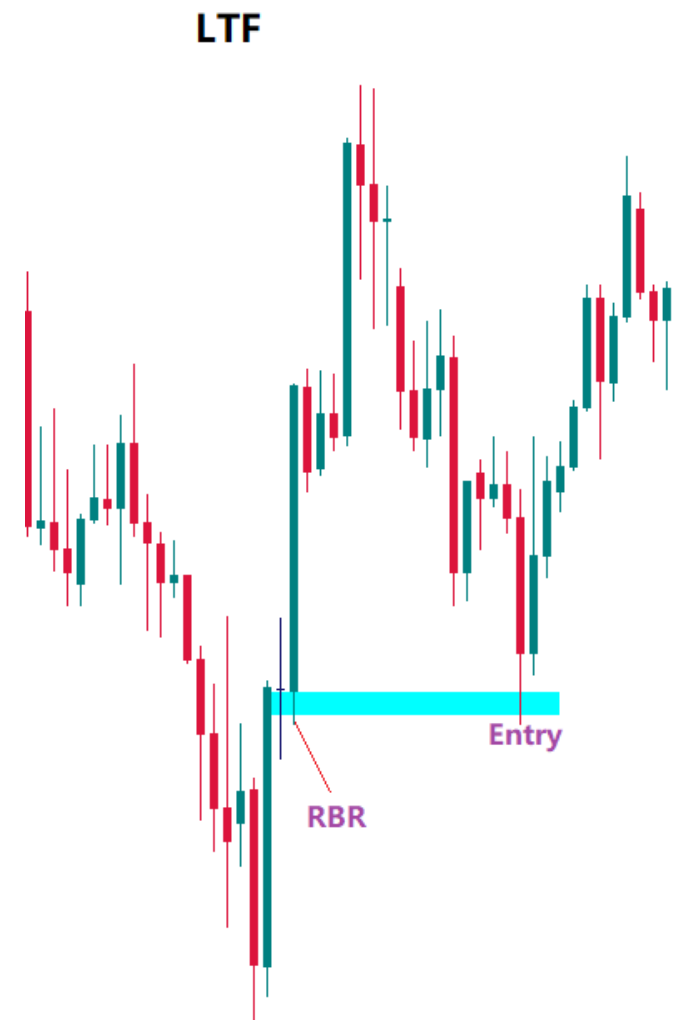

Manipulation (Example 1)

Manipulation (Example 2)

Manipulation (Example 3)

Manipulation Entry Formula Ends

CLAB

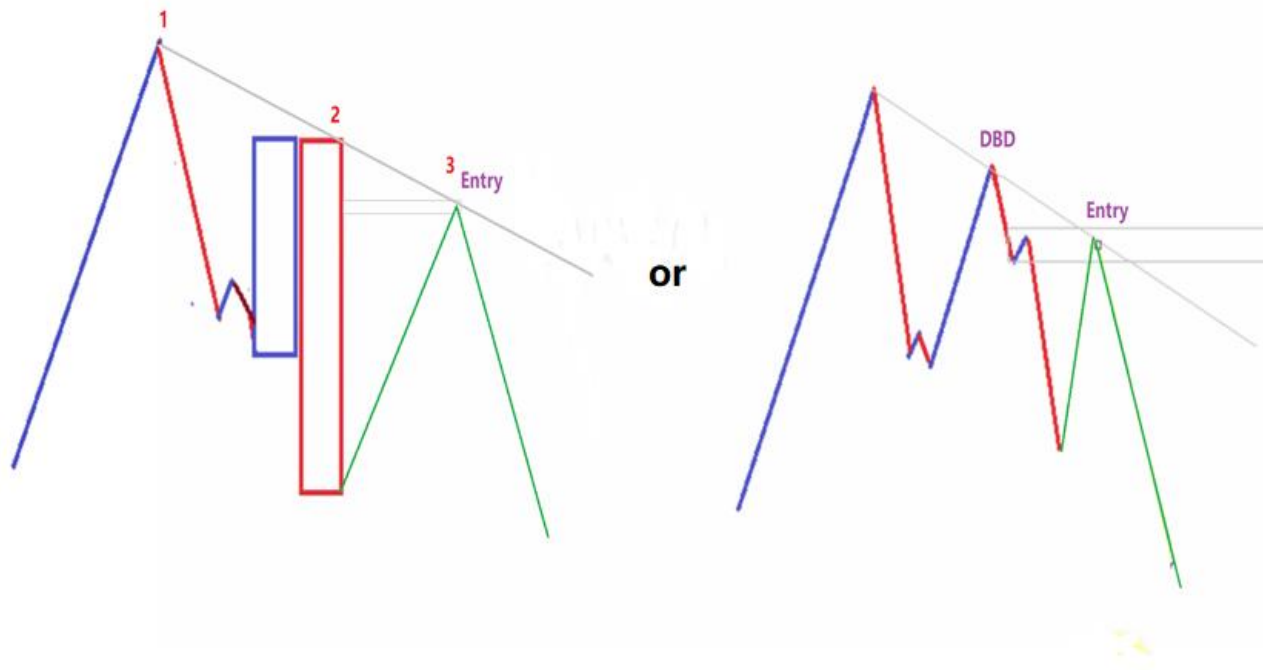

CLAB is stands for **Confirmation Like a Boss.**

Clab is not a setup, but it's an **introduction of the confirmation**

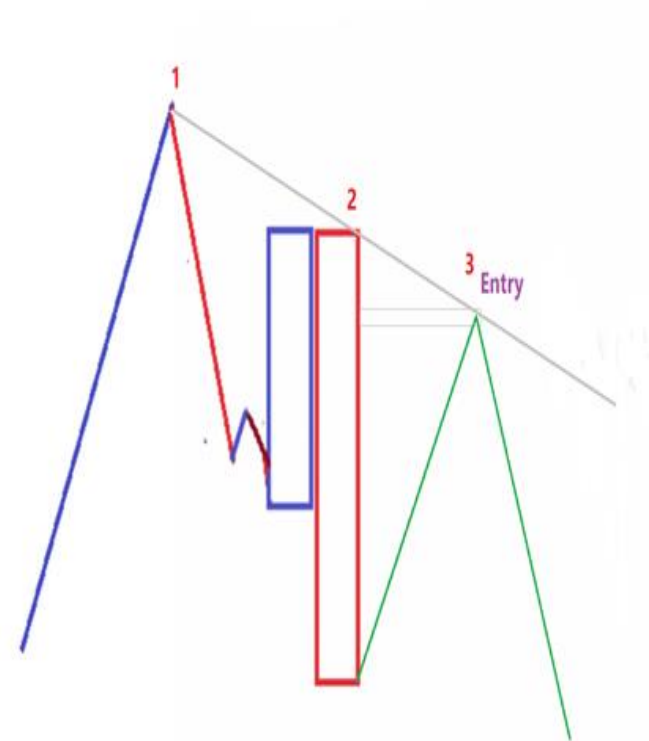

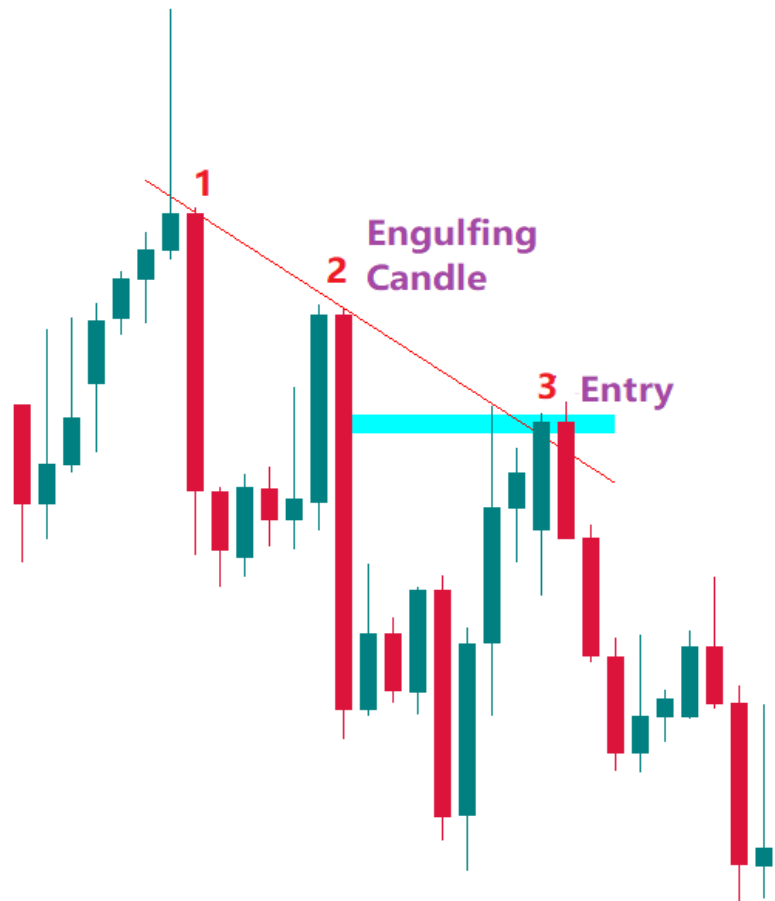

It involves **Engulfing** and **confluence.**

Lets take a look!

CLAB Formula

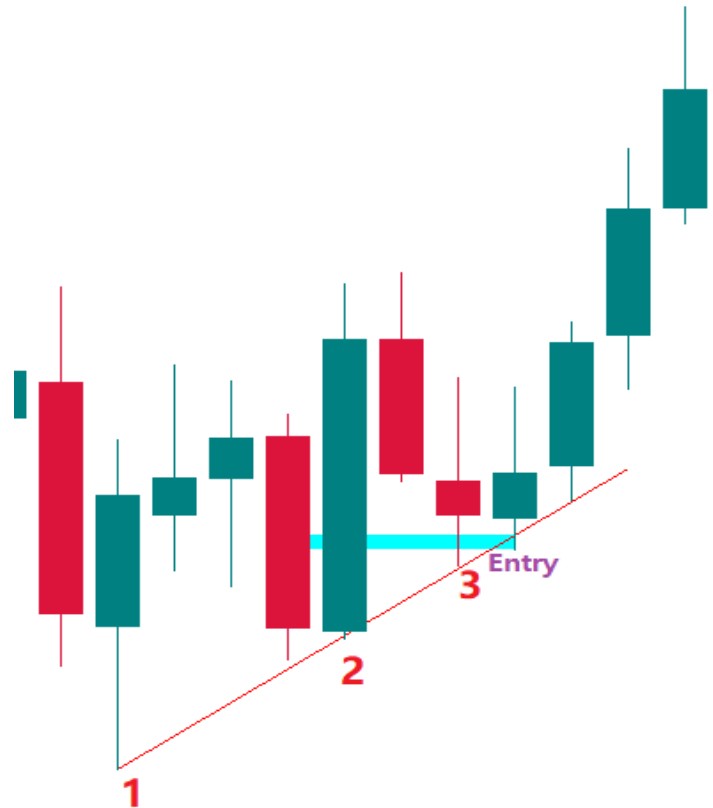

CLAB (Example 1)

CLAB (Example 2)

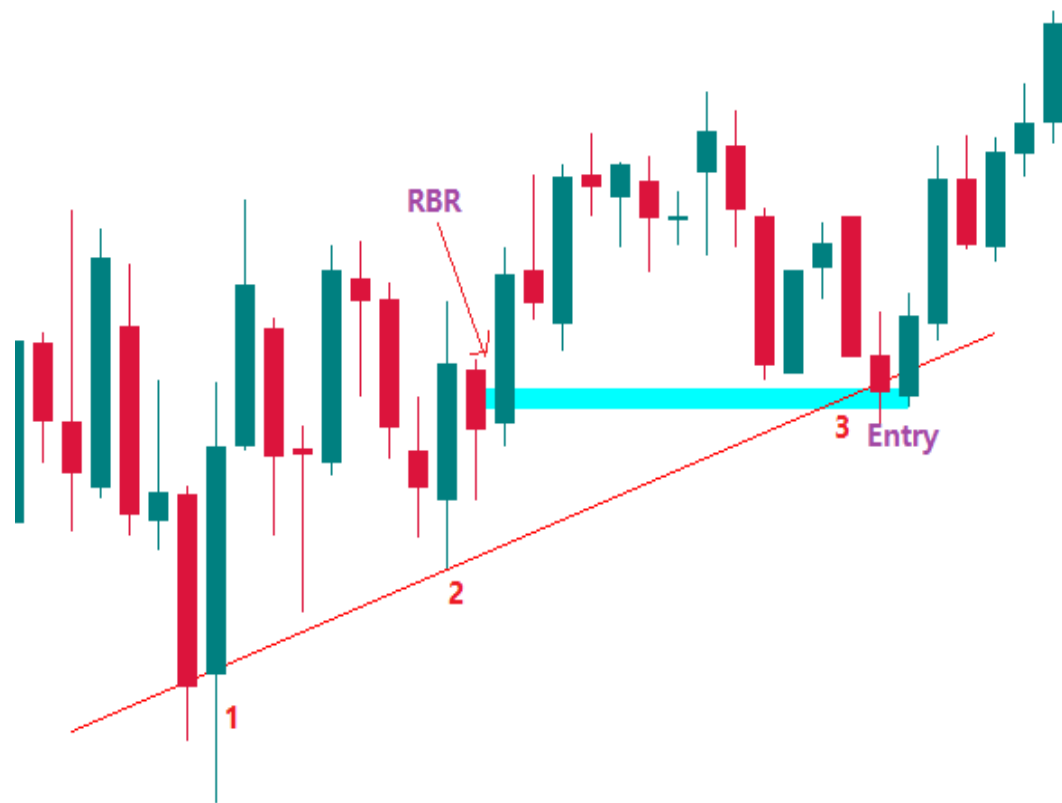

CLAB (Example 3)

CLAB (Example 4)

CLAB (Example 5)

CLAB Ends

CK1 (Single Confluence)

CK1 is a single confluence and the combination of strong SnR + trendline

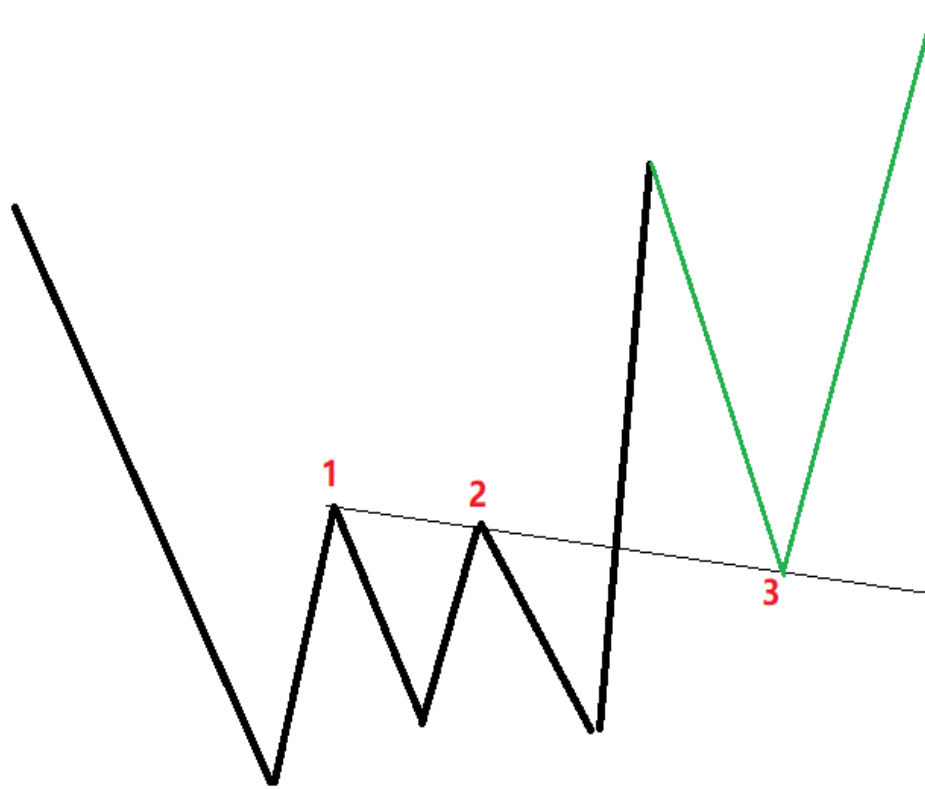

There's formula how to use CK1

CK1 also is the origin of CK2 and CK3

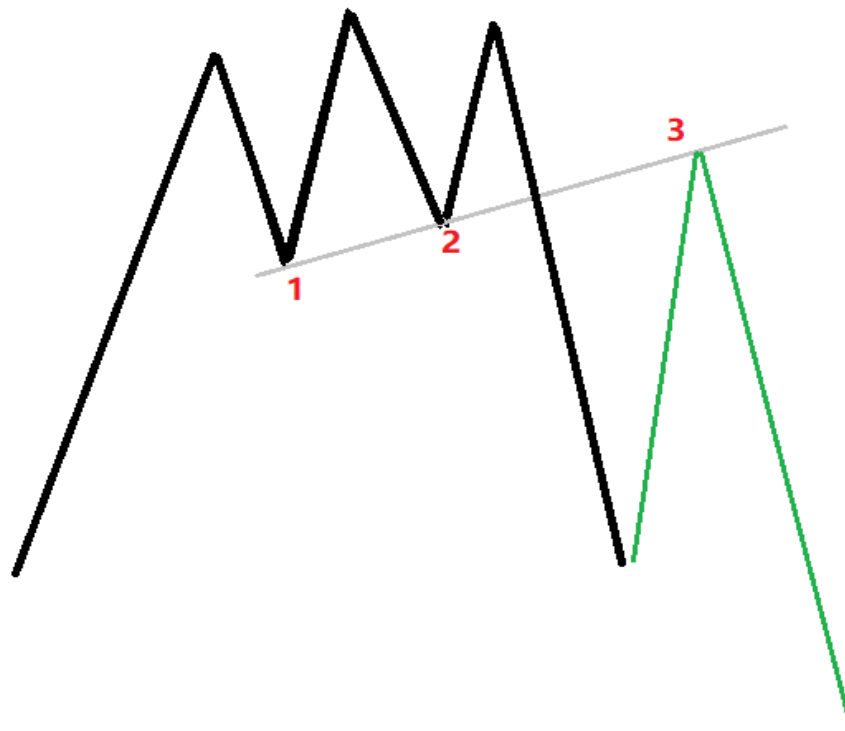

CK1 Formula

Any setup + CK1

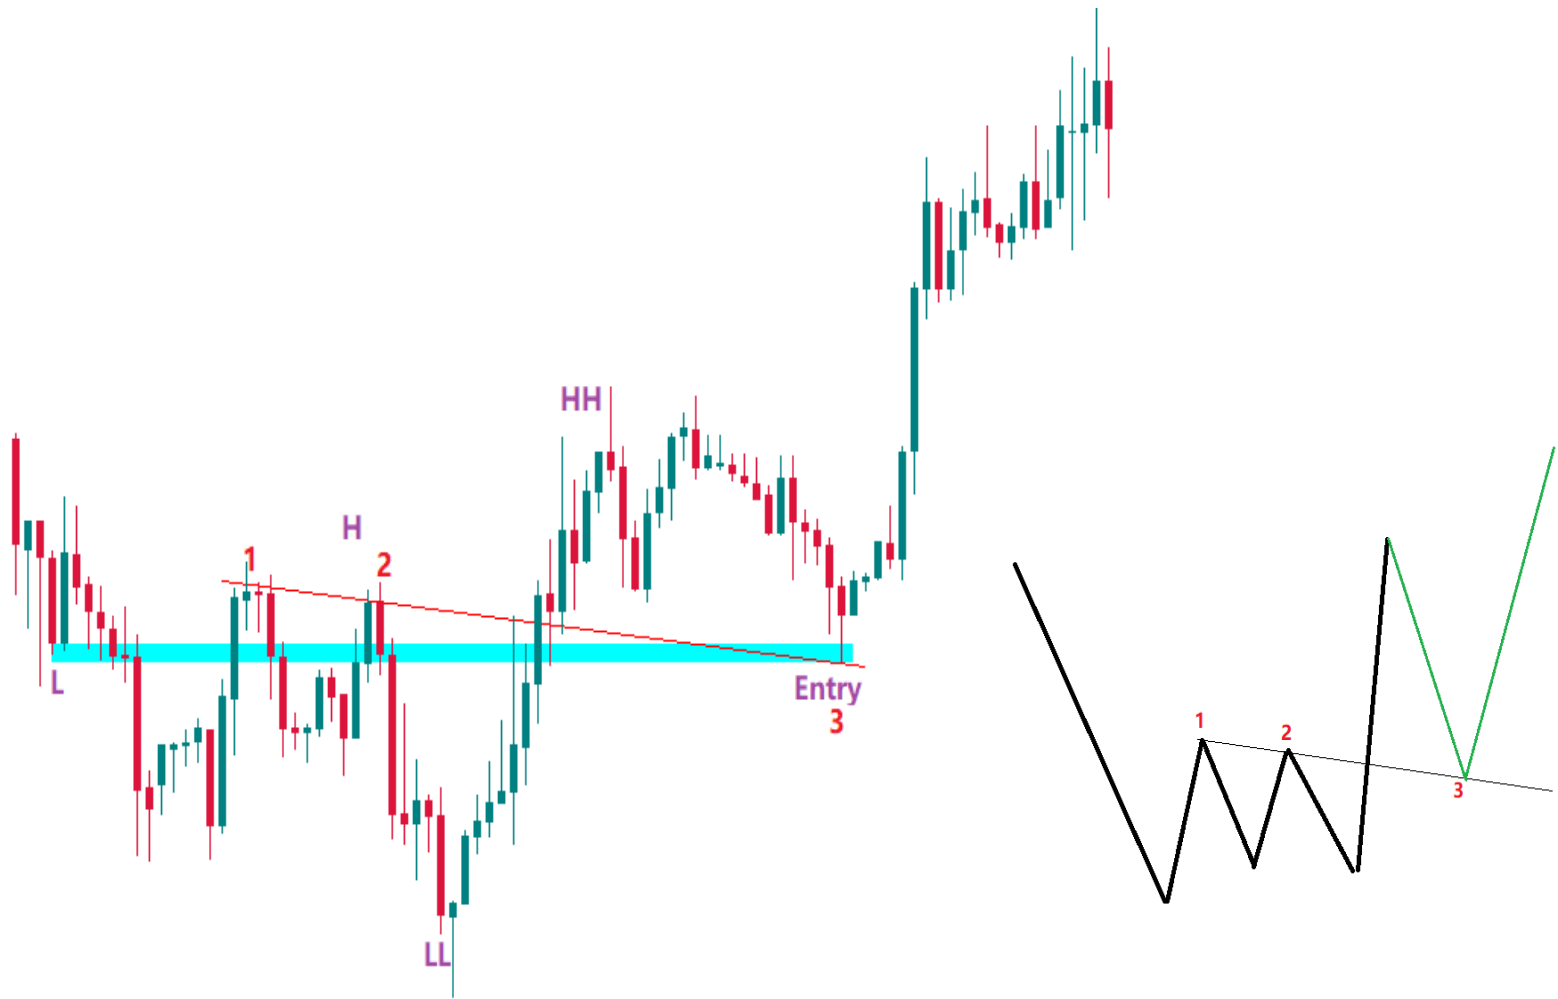

CK1 Formula (Buy)

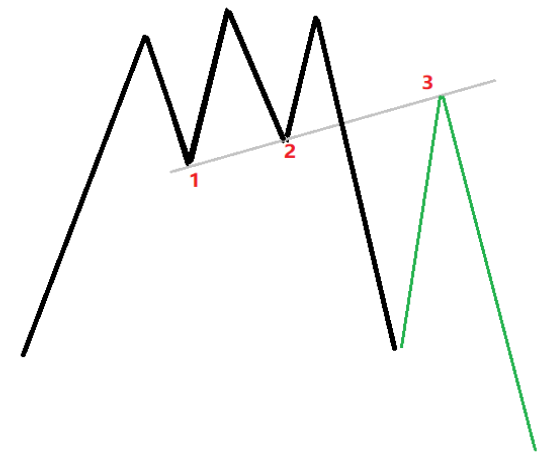

CK1 Formula (Sell)

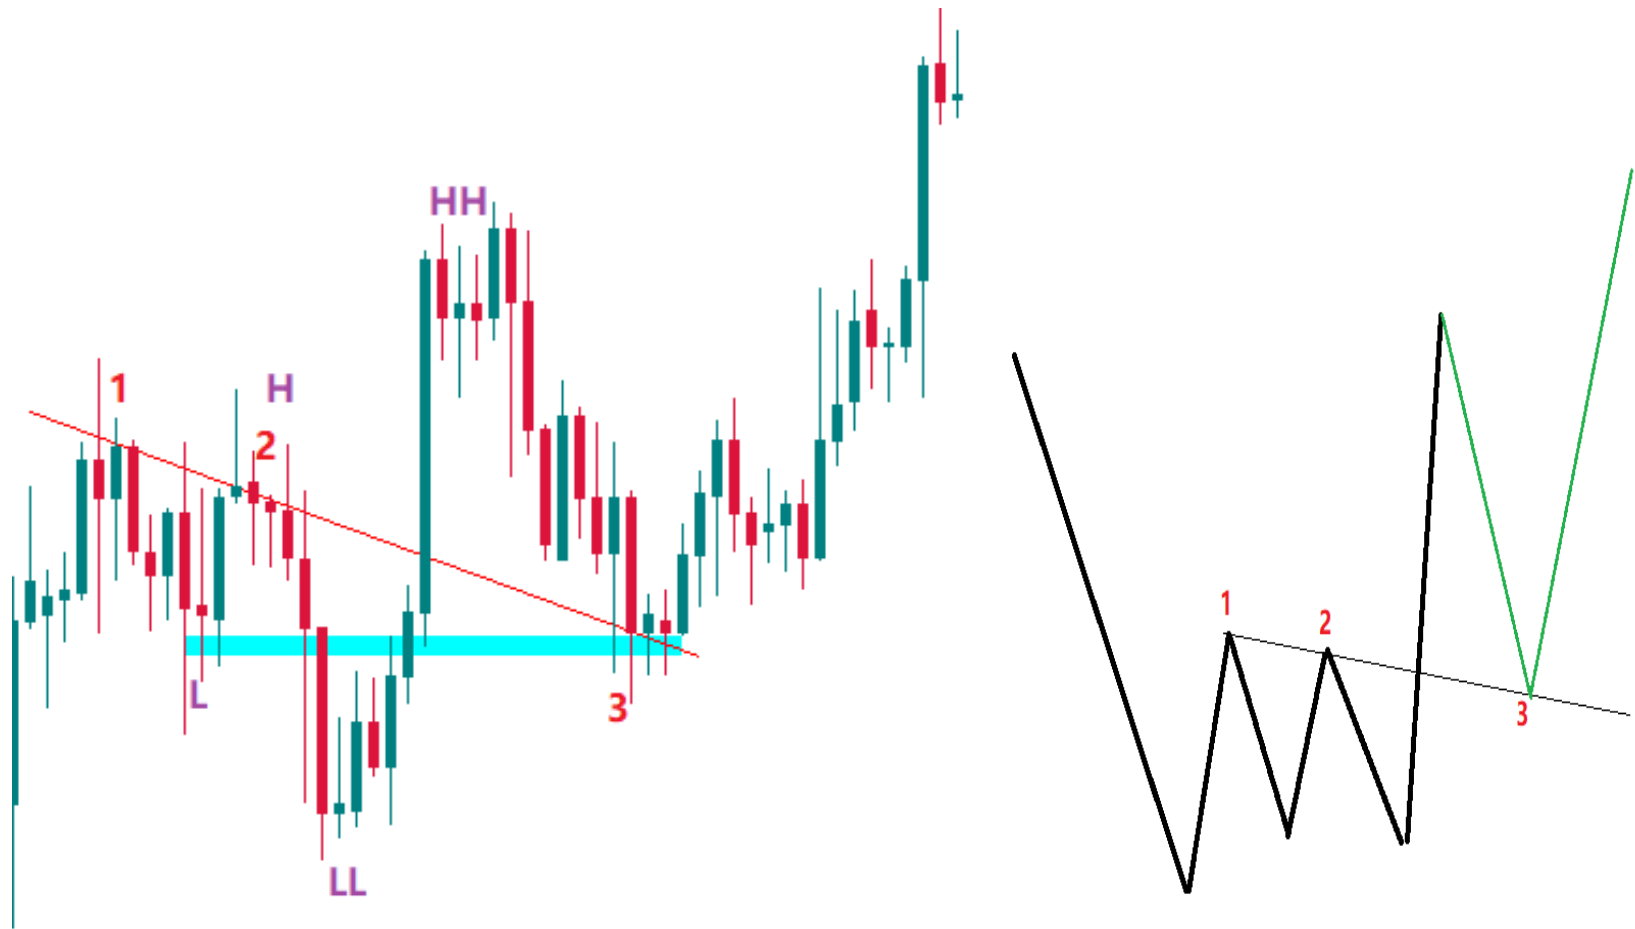

CK1 (Example 1)

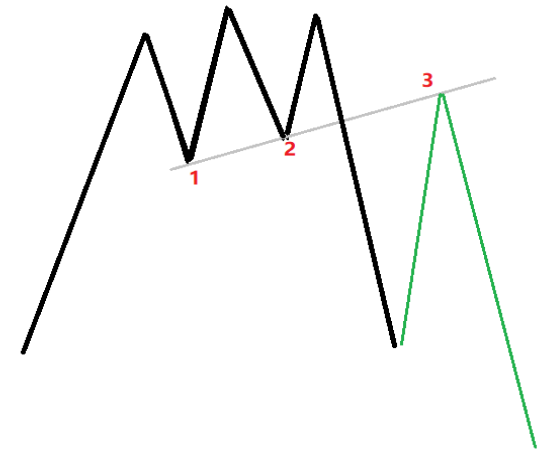

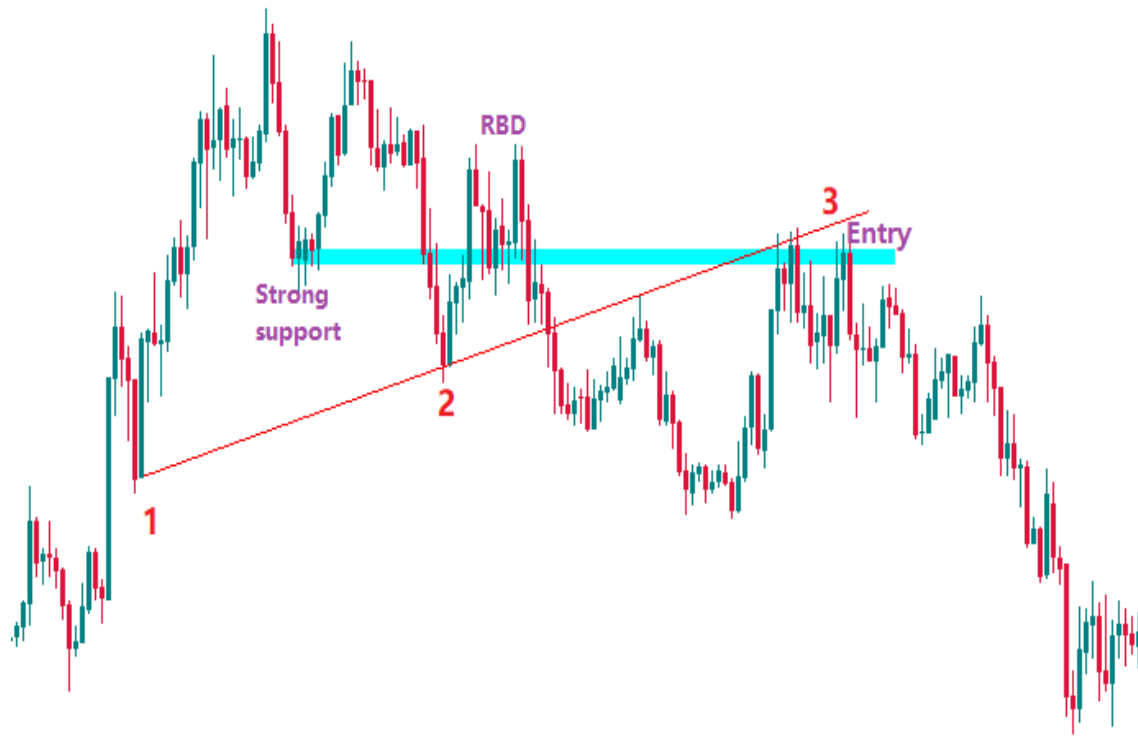

CK1 (Example 2)

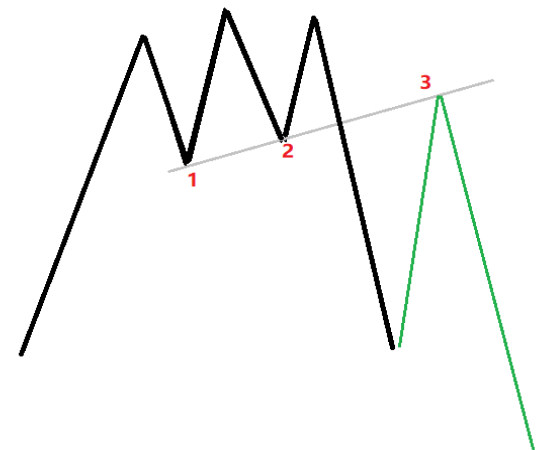

CK1 (Example 3)

CK1 (Example 4)

CK1 (Example 5)

CK1 Ends

CK2

CK2 means Double confluence or double confirmation

The confluence must involve strong SnR

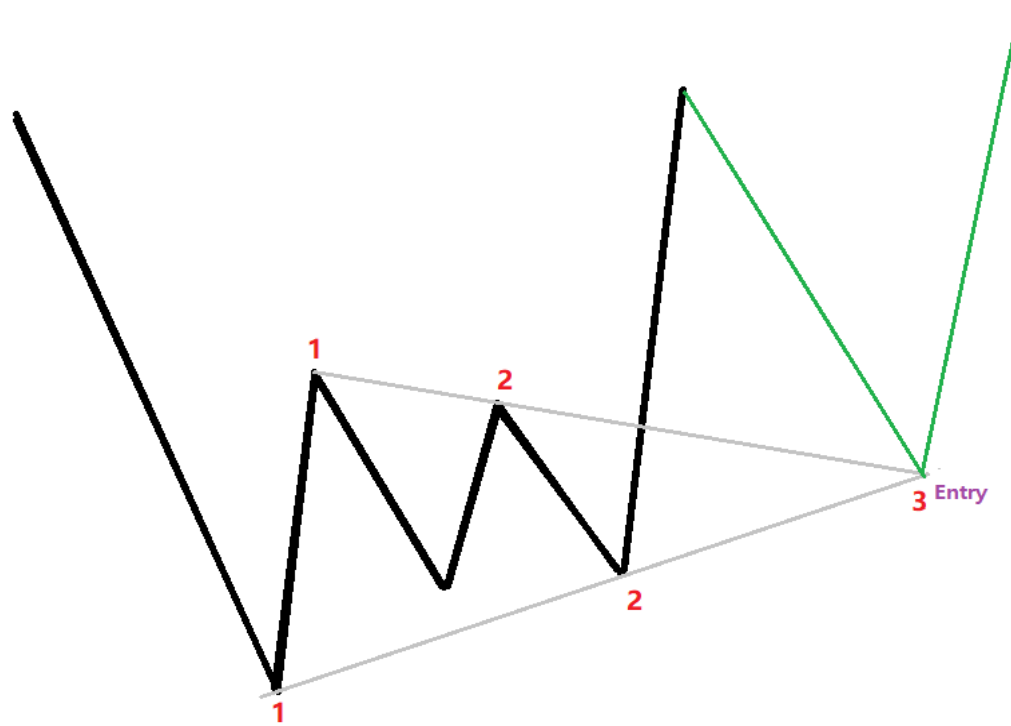

There are 2 types of CK2.

1. CK2 Align
2. CK2 Cross

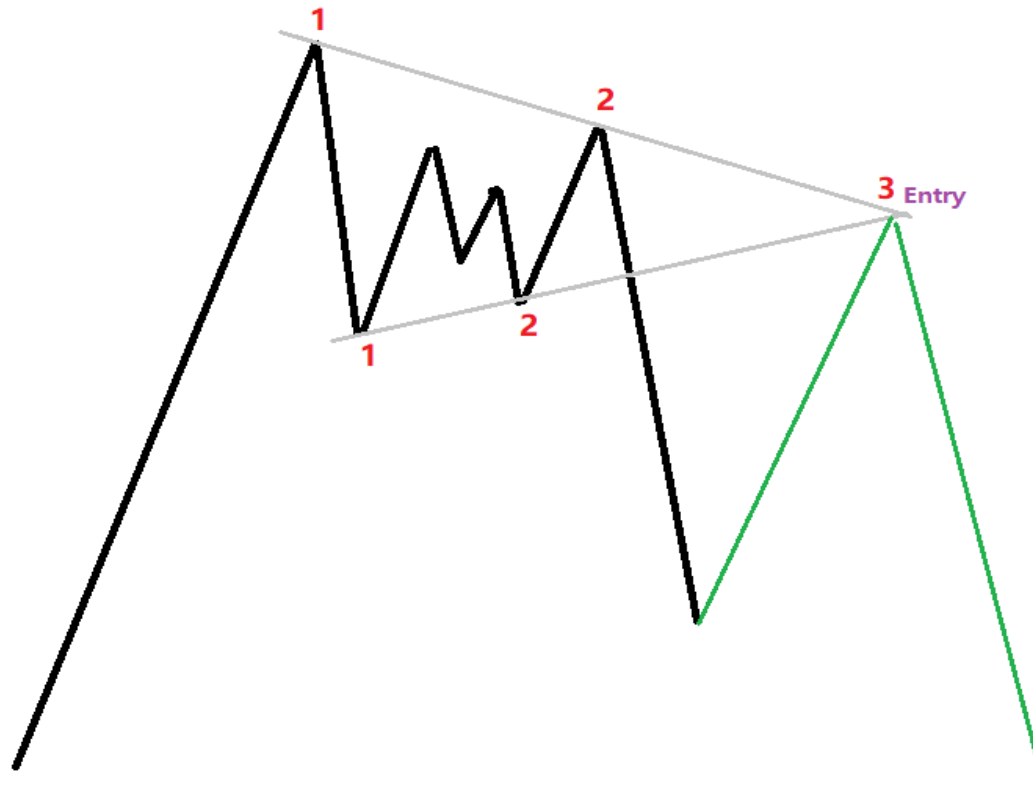

CK2 Formula

Any setup + CK2

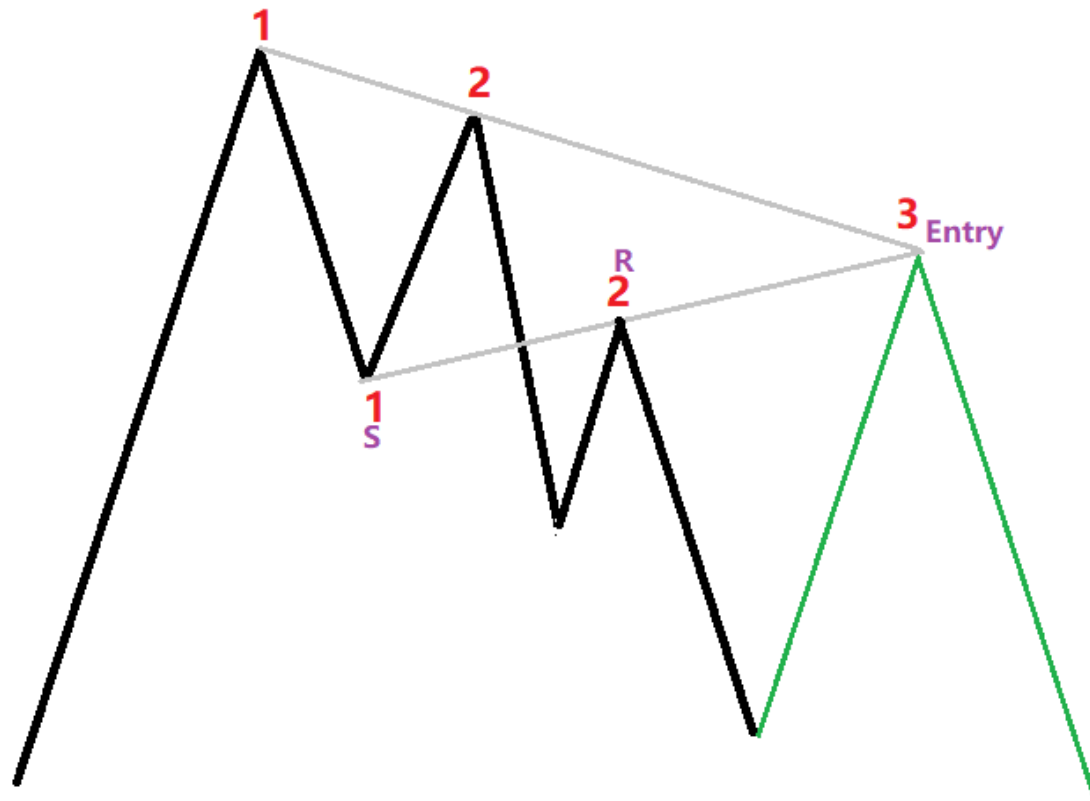

CK2 Formula Align (Buy)

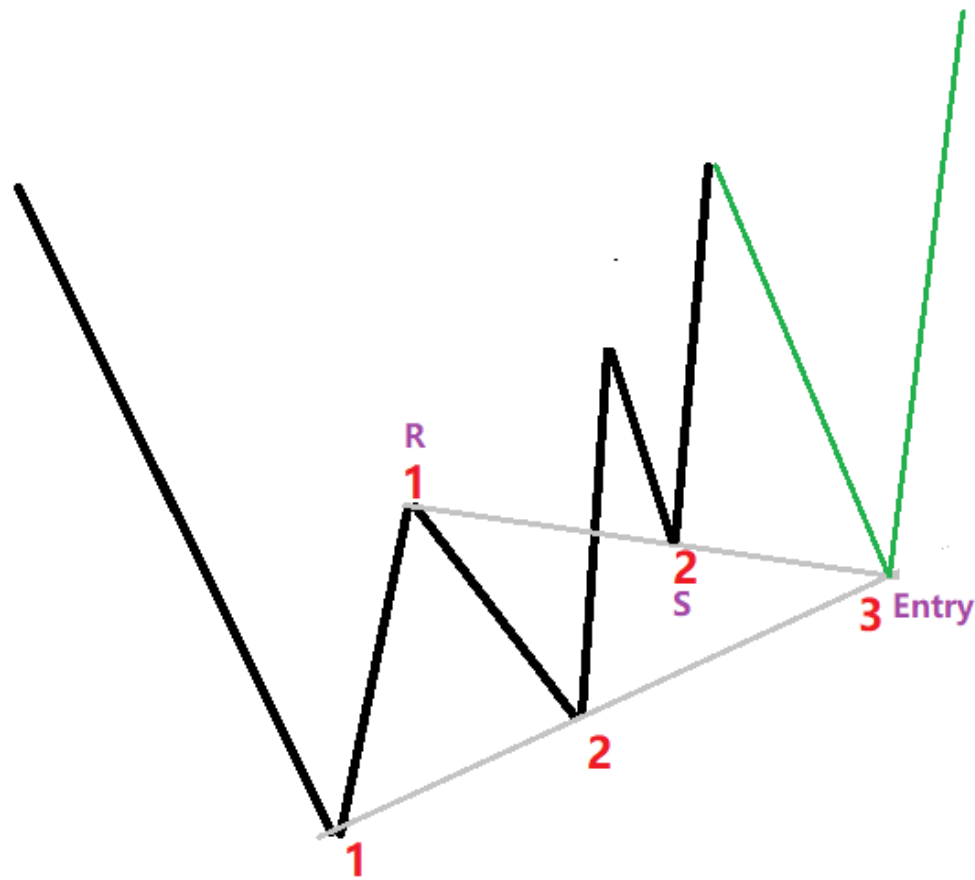

CK2 Formula Align (Sell)

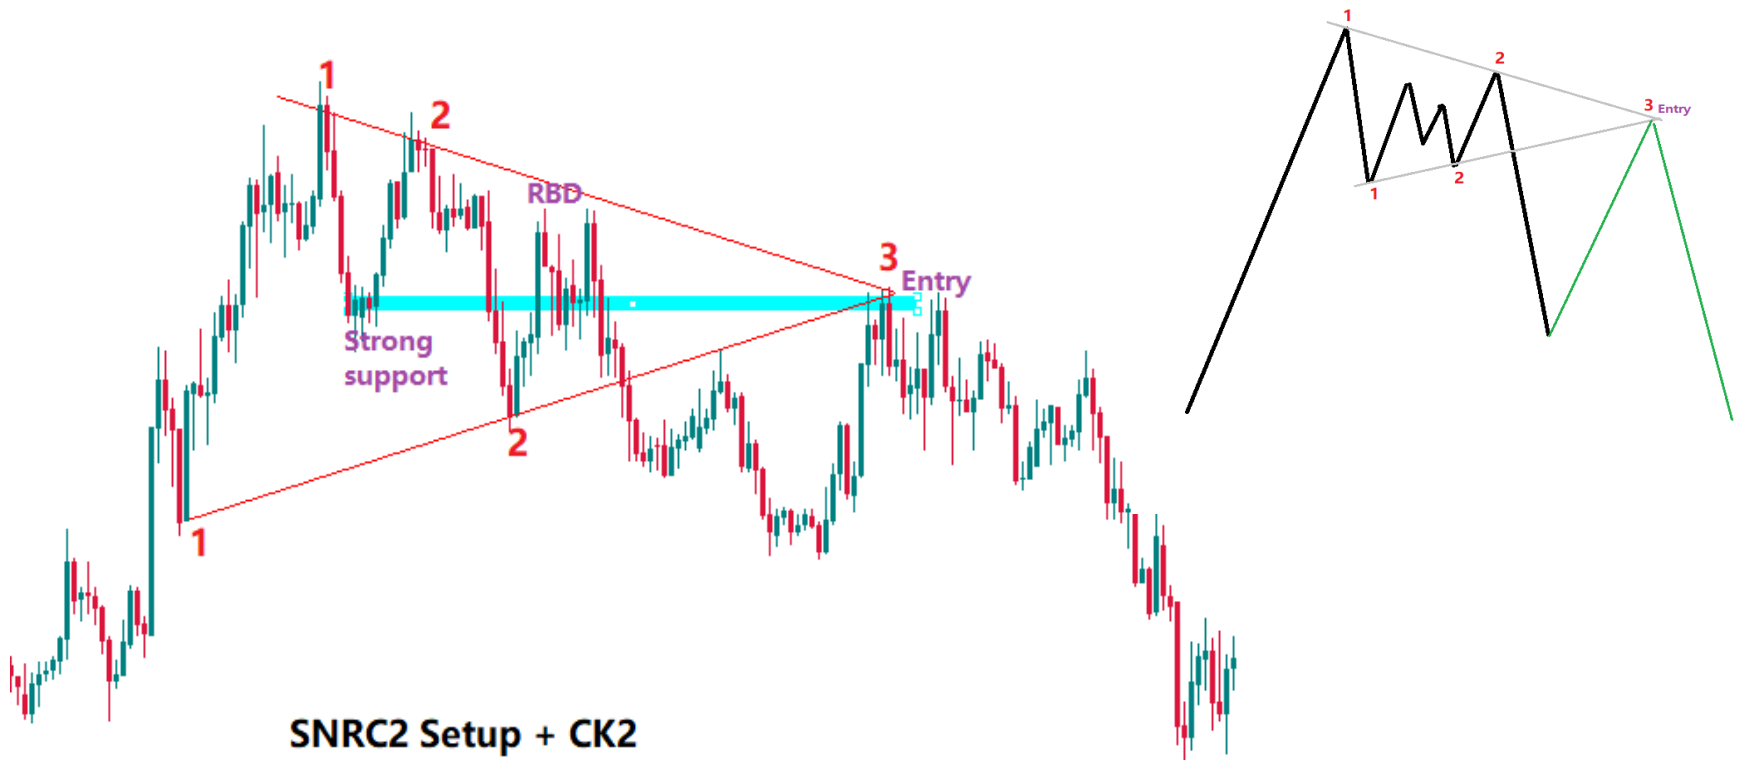

CK2 Formula Cross (Sell)

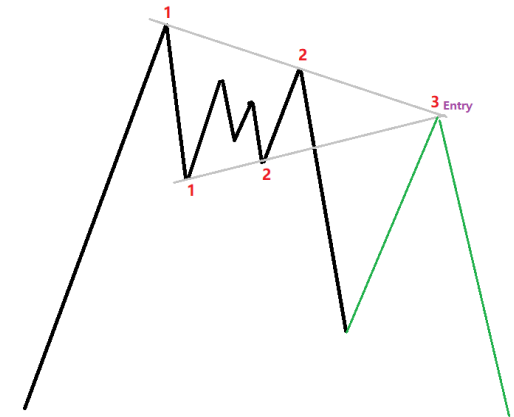

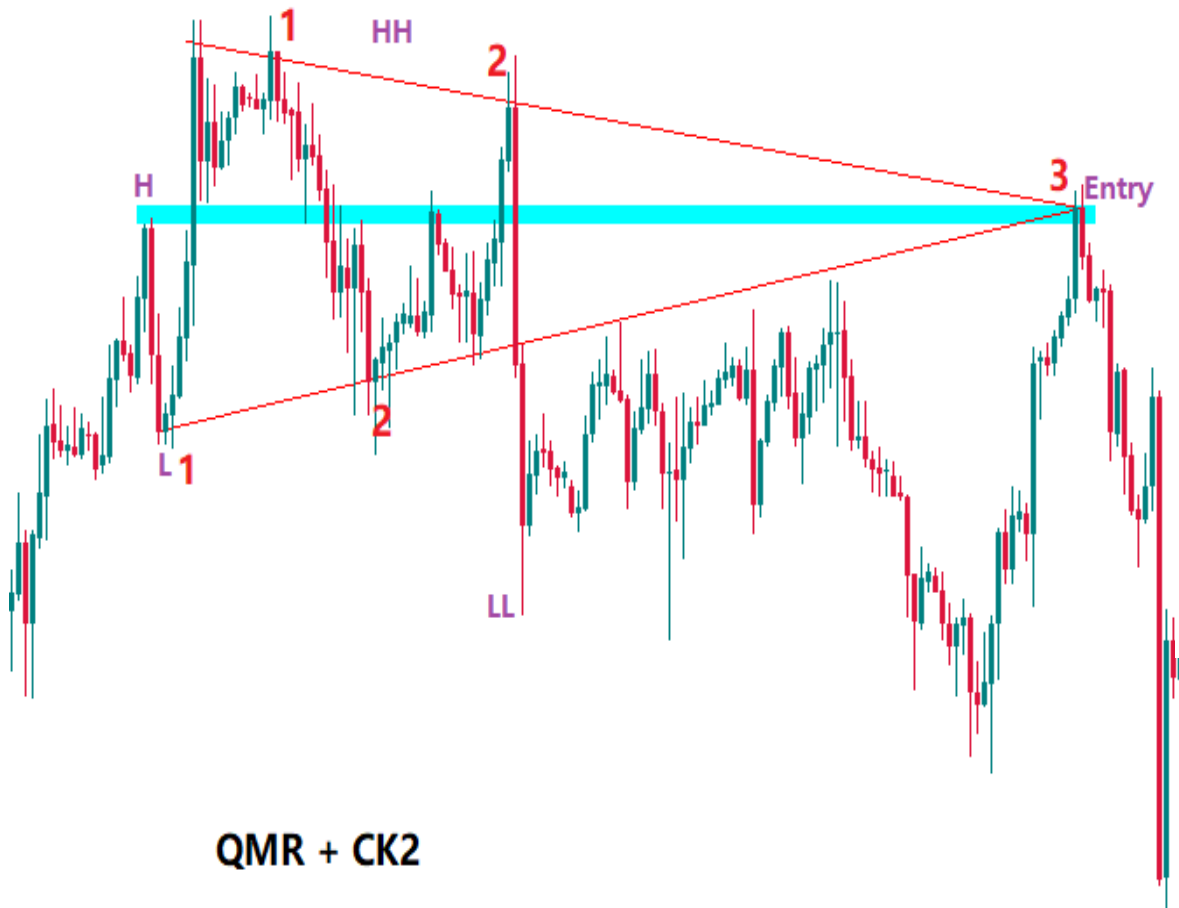

CK2 Formula Cross (Buy)

CK2 (Example 1)

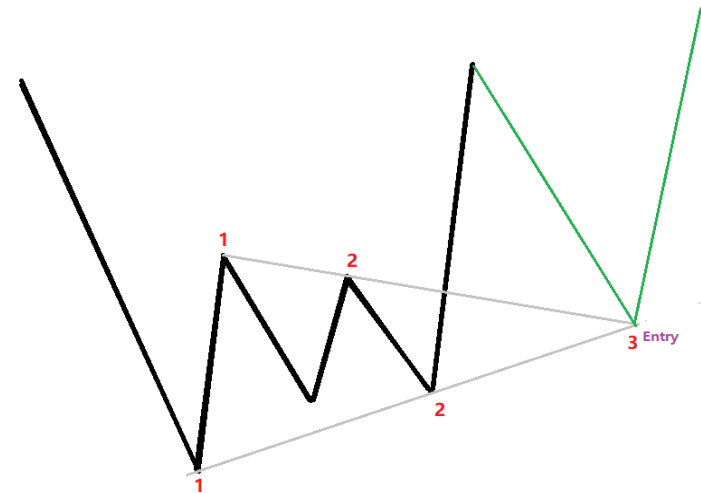

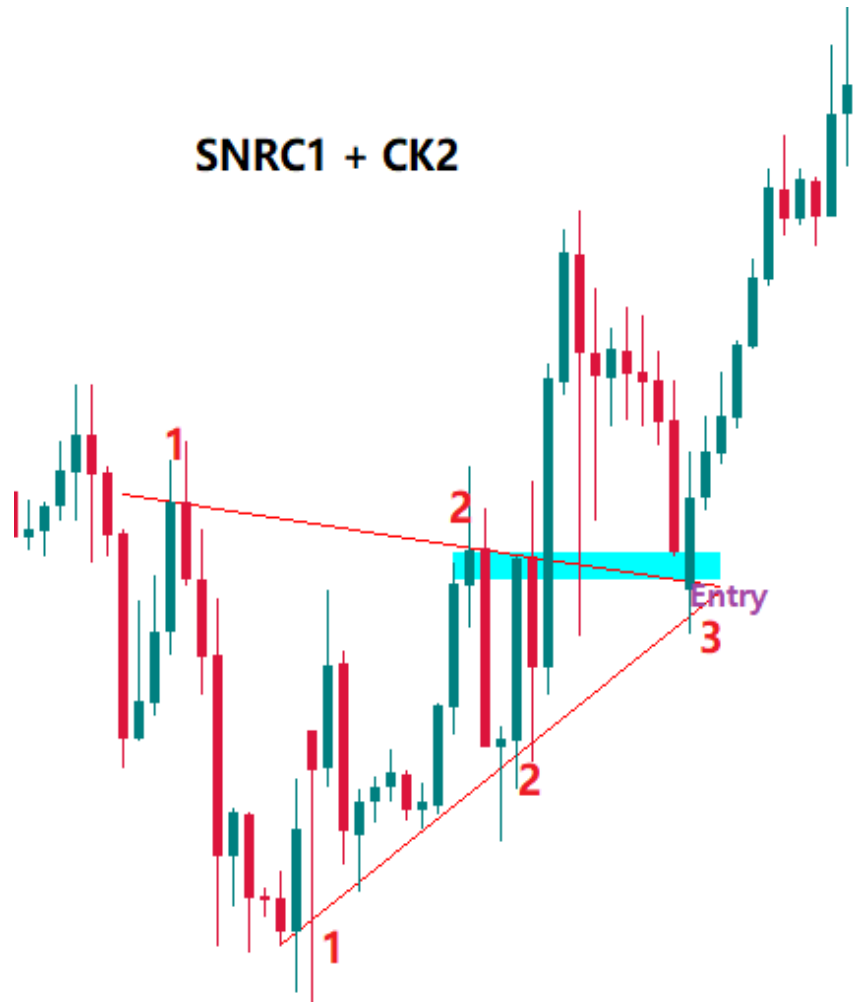

CK2 (Example 2)

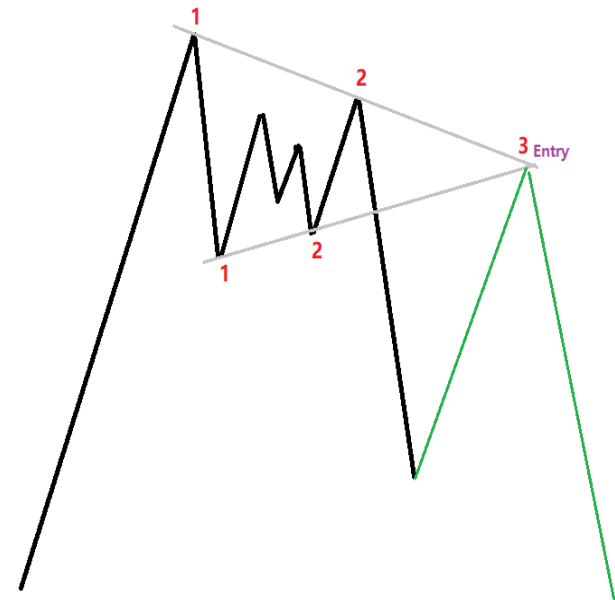

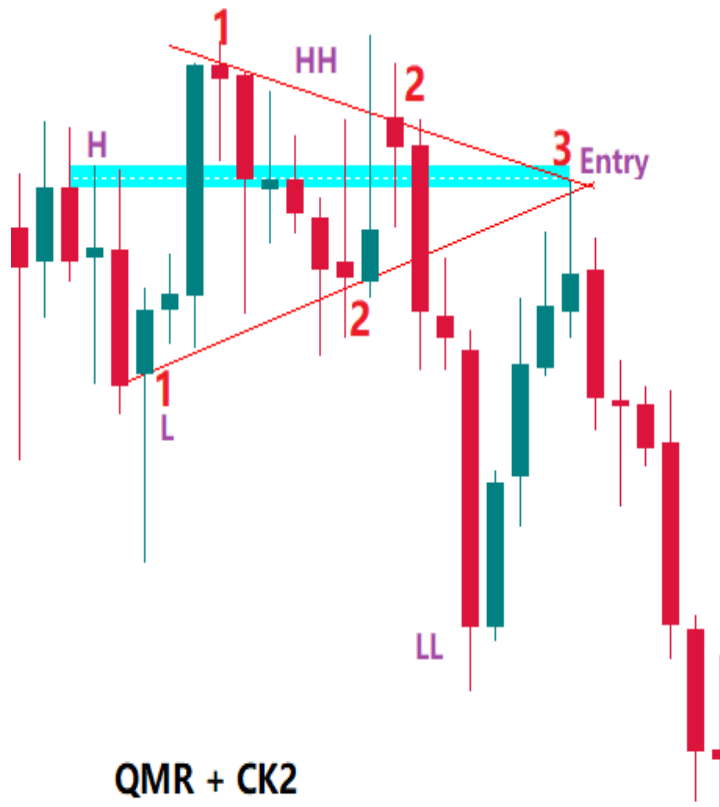

QMR + CK2

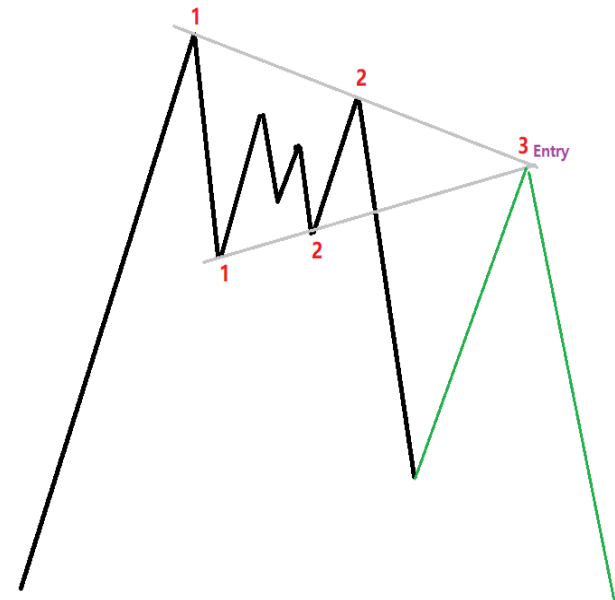

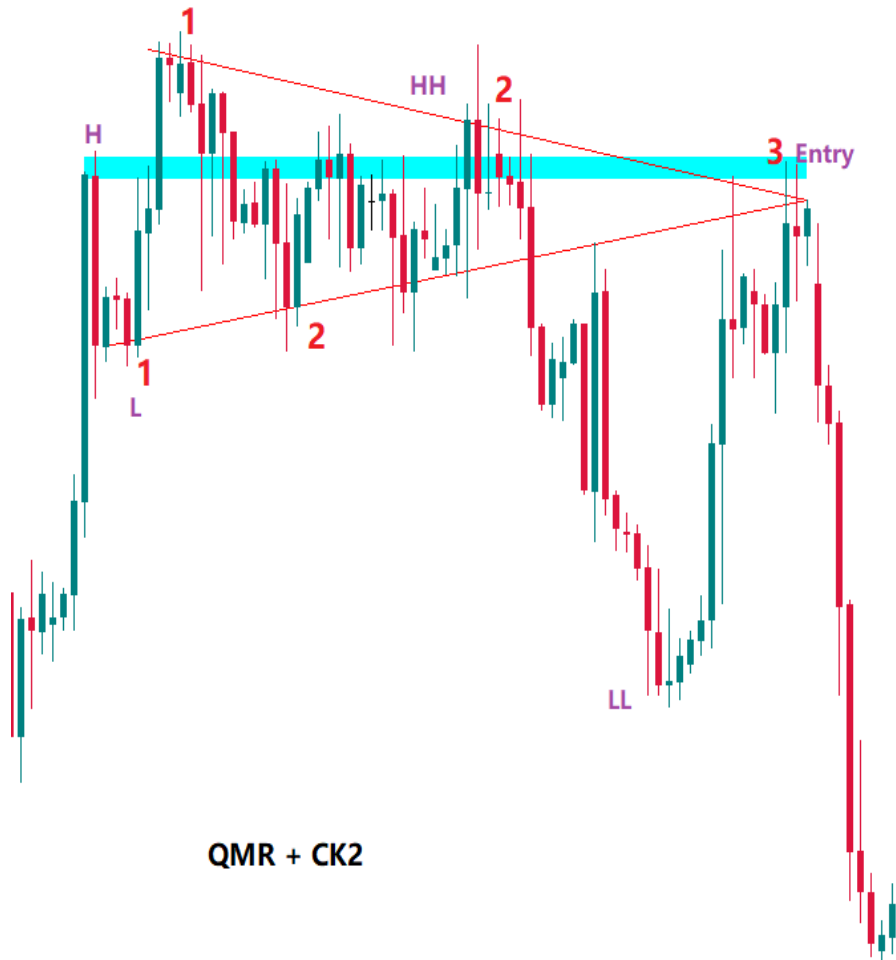

CK2 (Example 3)

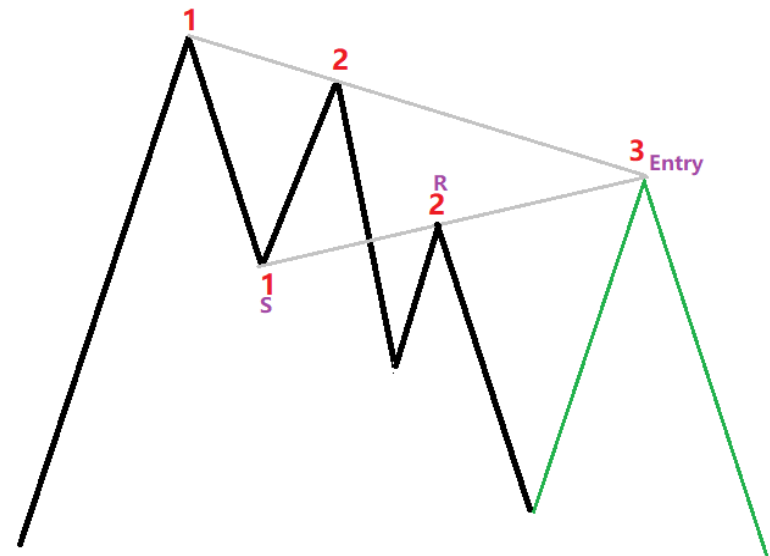

CK2 (Example 4)

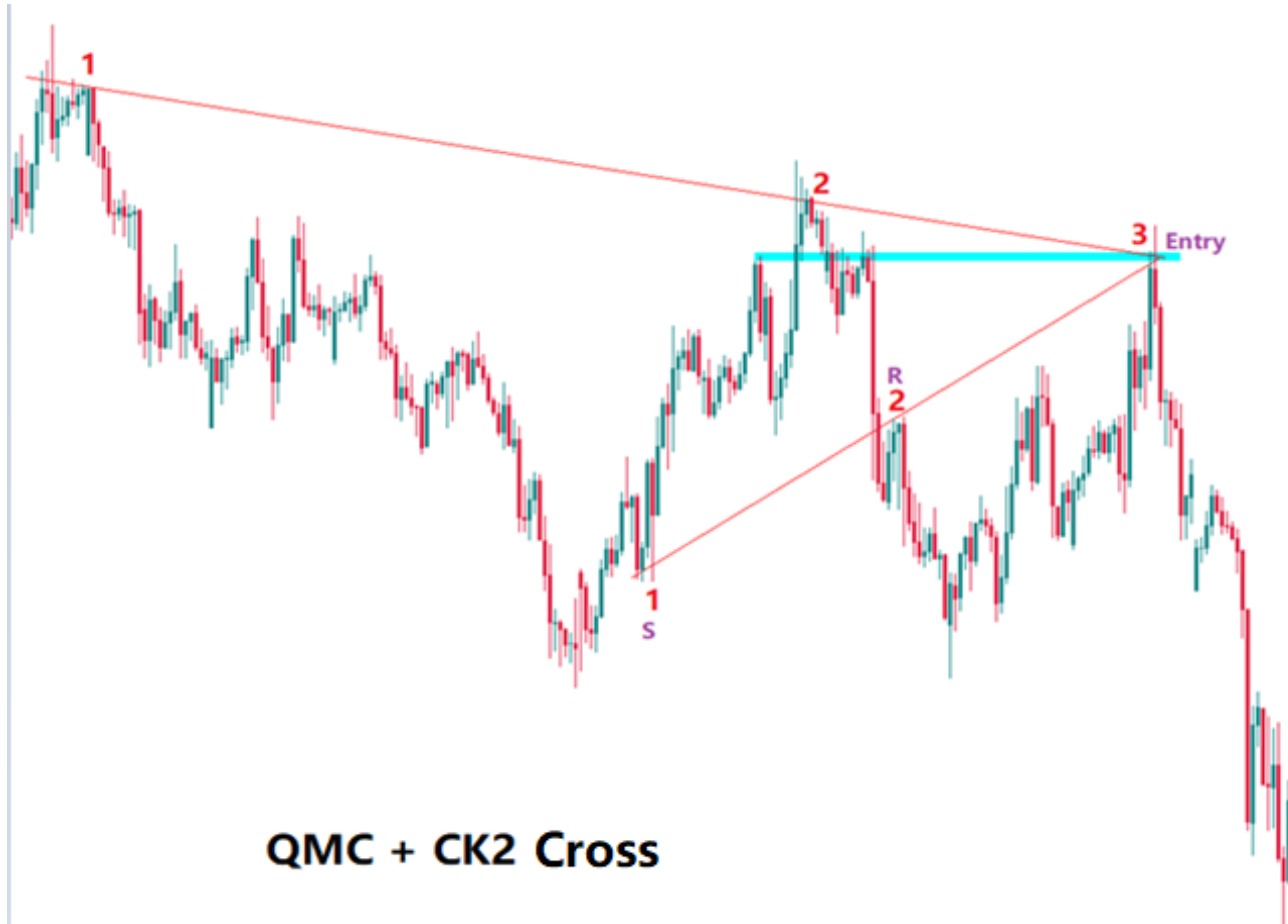

CK2 (Example 5)

CK2 (Example 6)

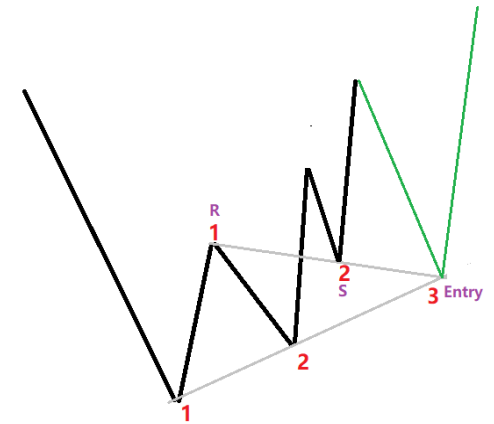

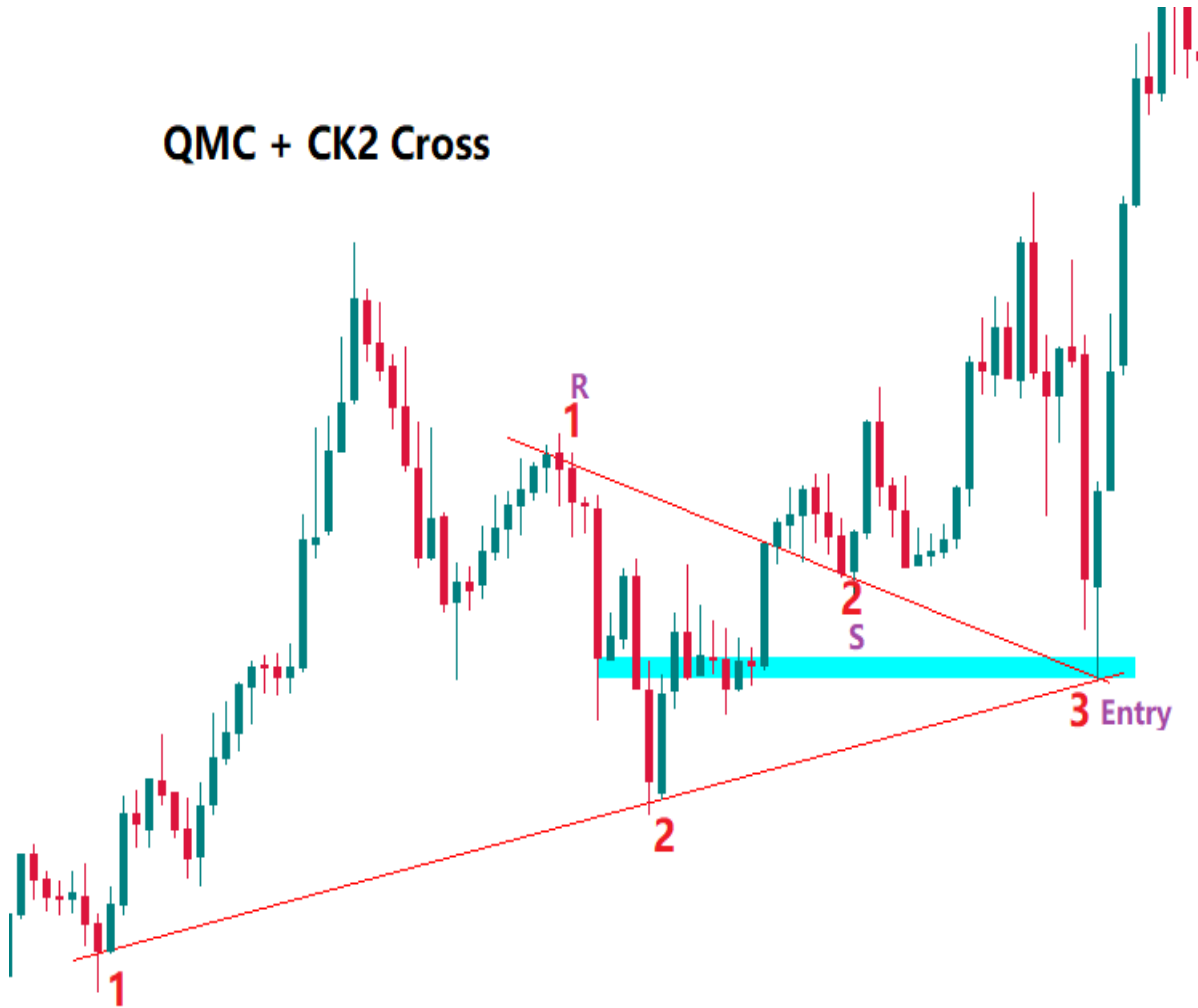

CK2 (Example 7)

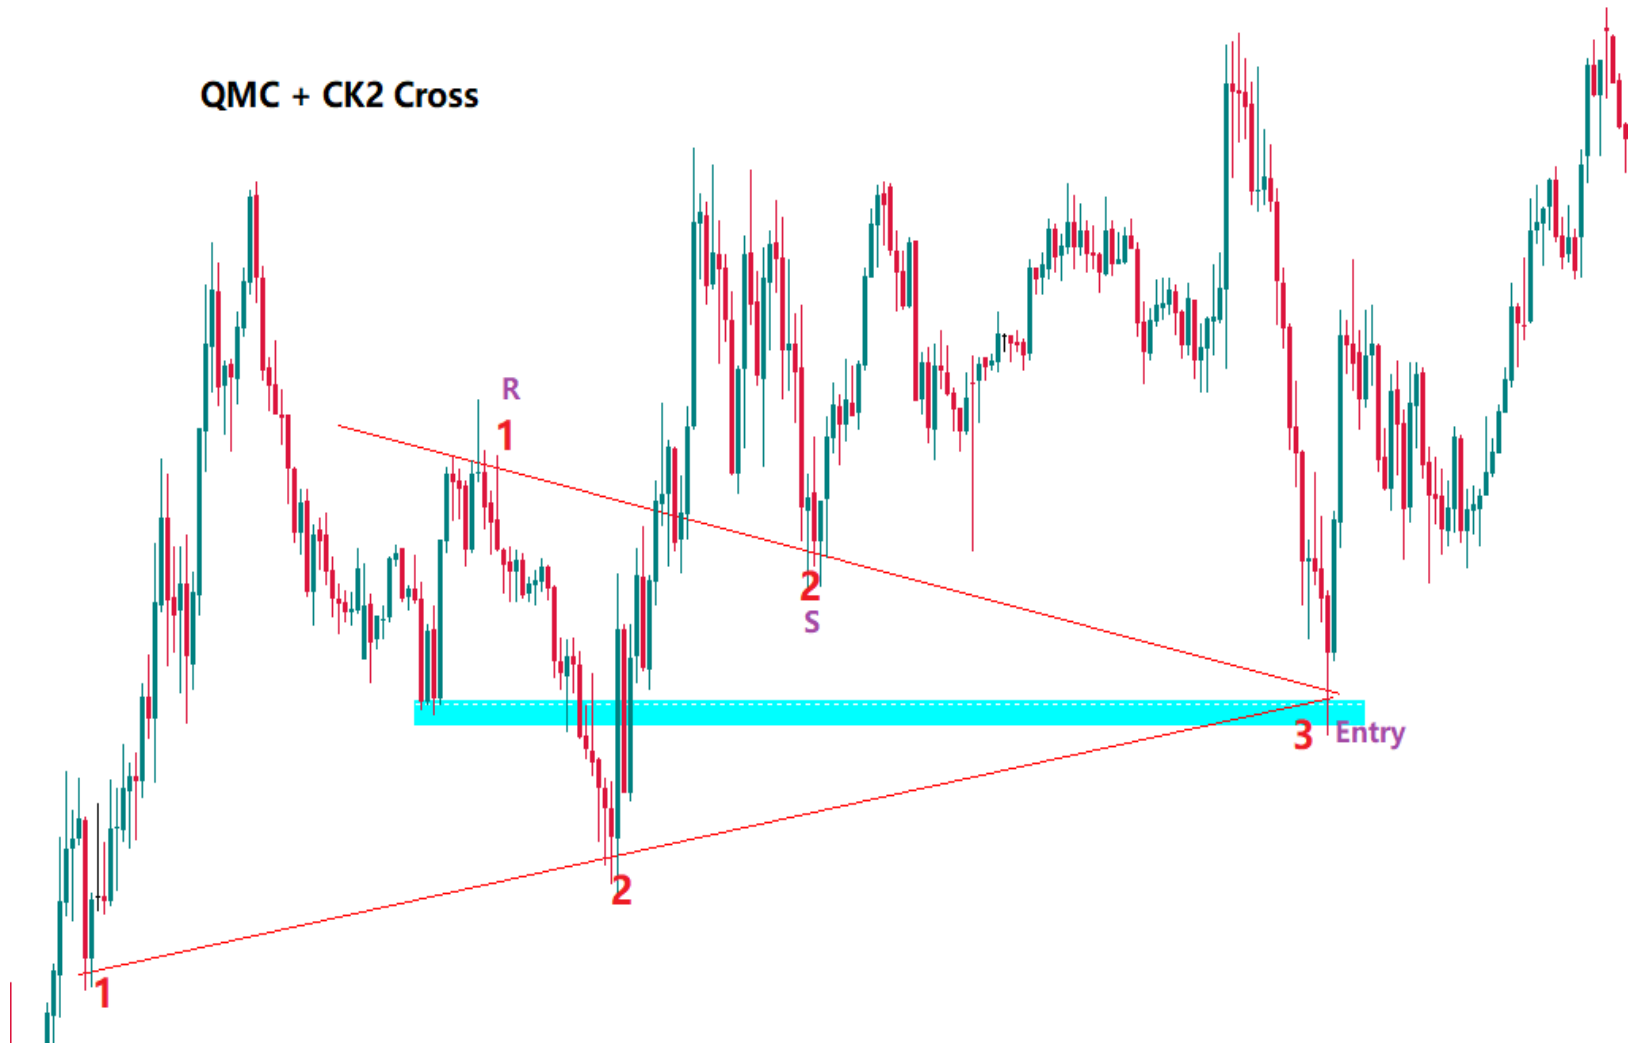

CK2 (Example 8)

QMC + CK2 Cross

CK2 (Example 9)

QMC + CK2 Cross

CK2 Ends

CK3 (Strongest Confirmation)

CK3 is the final of CK's confirmation

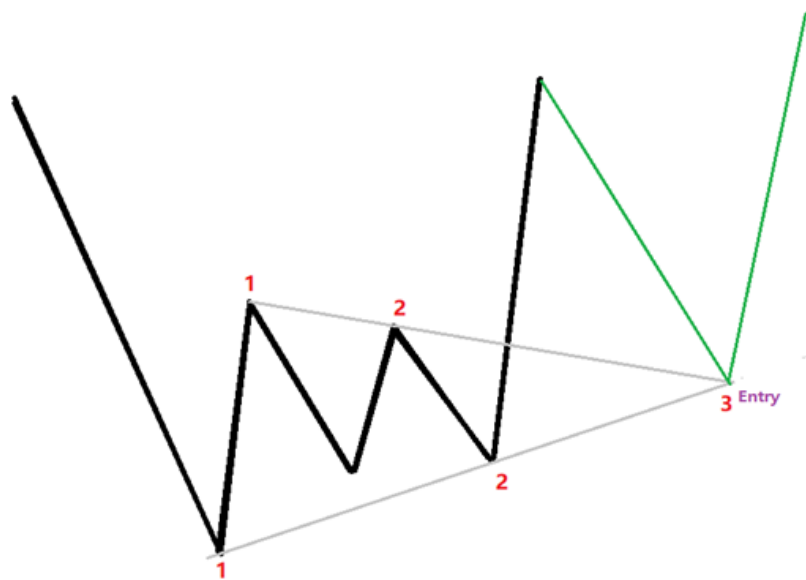

CK3 is the strongest among CK's.

CK3 doesn't mean has to draw 3 trendline.

CK3 requires Multi Timeframe Analysis

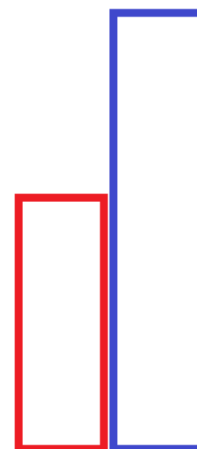

CK3 Formula

Any setup + CK2 + Solid Engulfing
