7.4. Original Zone	8

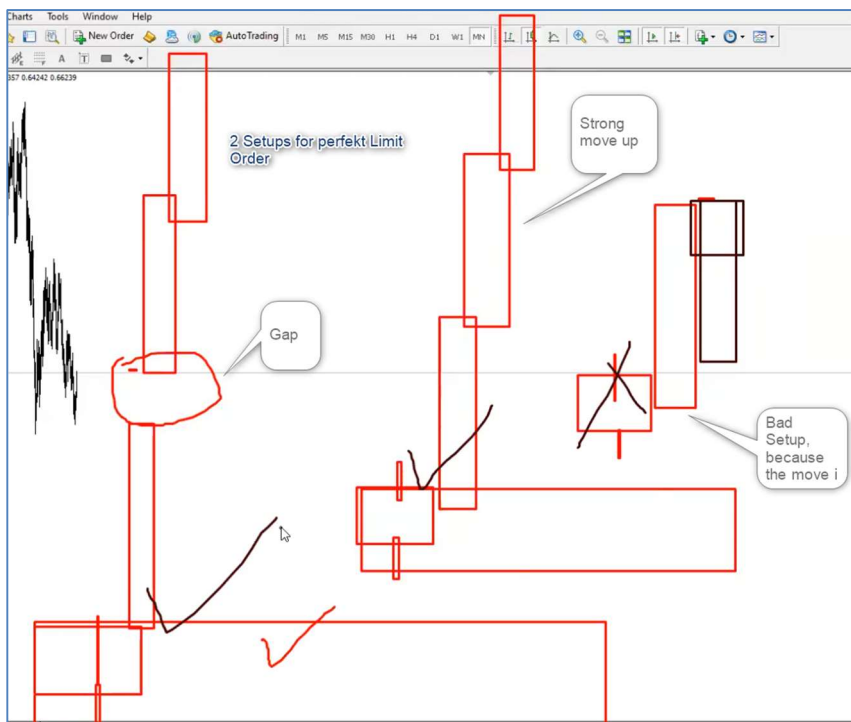

1. Supply Demand Basics

- On High Timeframe it makes Ratracements: Monthly
- On Lower Timeframe it makes Trending channels

- We need 50 % candle (Doji etc.) Level to draw a Base

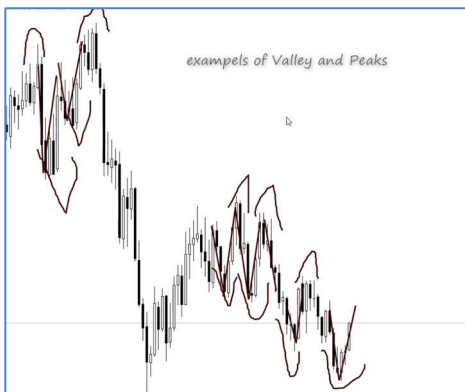

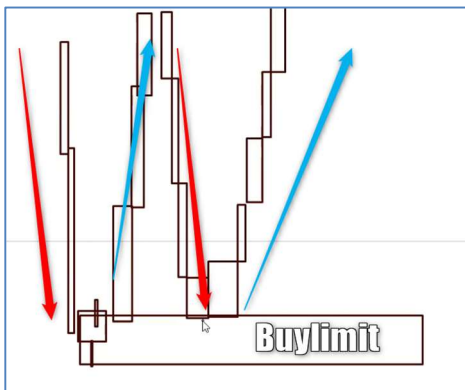

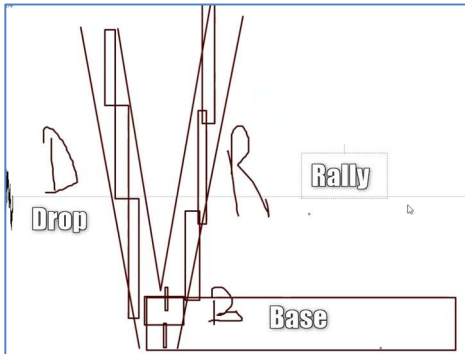

2. Best Setups for Limitorder

3. Typs of Supply and Demand

- We have 2 types:
 - o Simple: Valley and Peaks
 - o Advance: CP and PCP

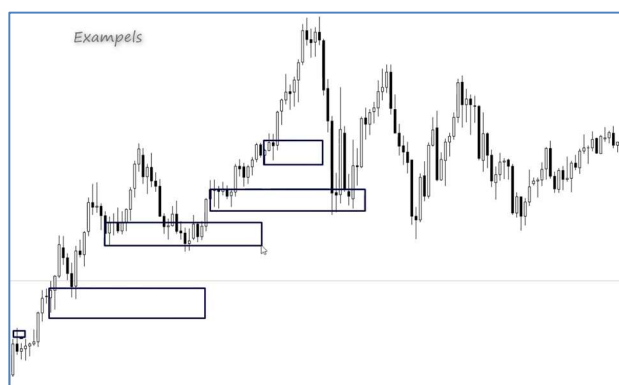

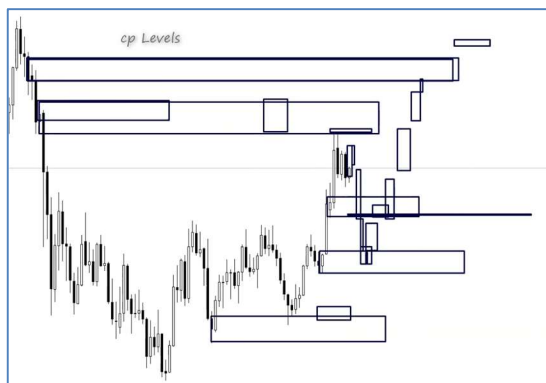

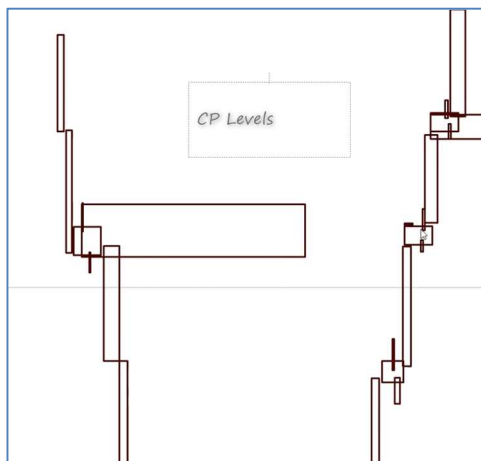

3.1. Simple

3.2. Advance

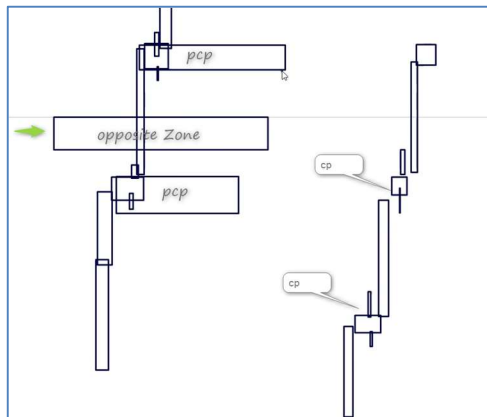

3.2.1. CP Levels

- On smaller Timeframe, you can see cp Levels
- We use maximum 3 cp Levels for eh trades. After 4 cp Level cant hold (Rule)
- Market Maker looks for Monthly, Weekly, Daily Timeframe only for Supply Demand
- Retailer use smaller the Daily Time Frame

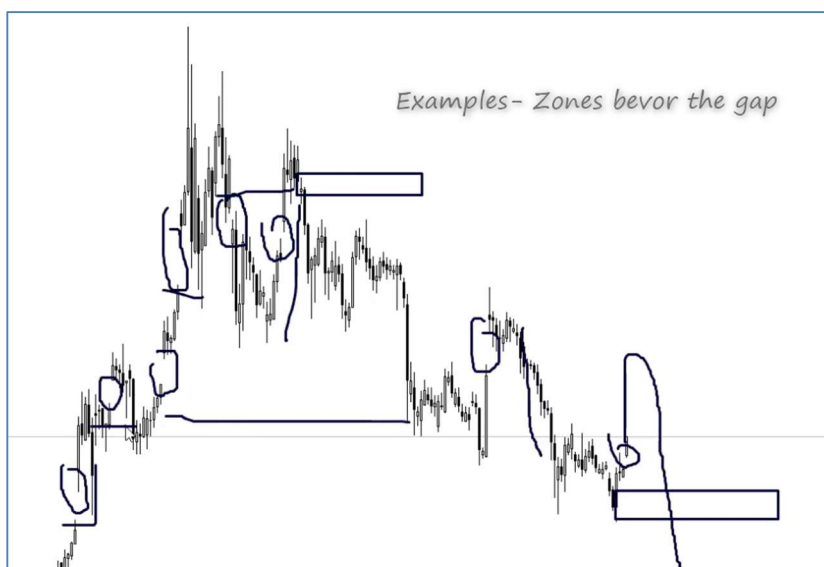

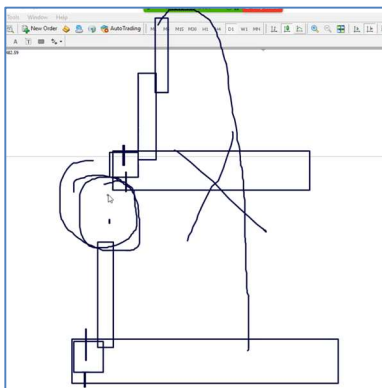

3.2.2. PCP – Levels

- After the opposing Zone was removed it will create pcg Level

4. Gaps

- When we see the a gap in the chart / market, thats a clue for as. Market will fill in the future this gap.
- We use the zone bevor the gap for our trade

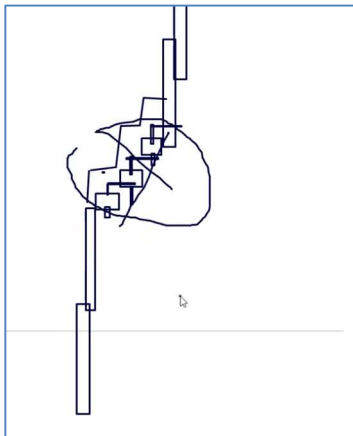

5. Quality of Base and Candle Patterns

- We need 1-6 candles for the base to trade
- We need 50 % candle, hammer candles, Doji, Marubozu etc. for the trade.
- Doji is dangerous

6. Stairs Zones

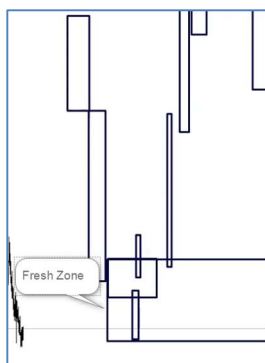

- This Zones are bad

7. Types of Zones

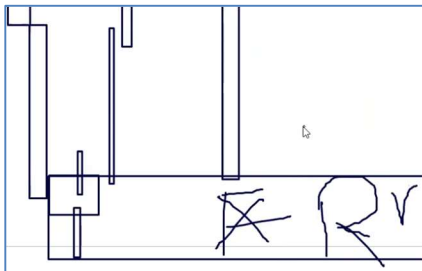

- Fresh Zone (For Limitorders)
- Retested Zone (we need confirmations for open a trade)
- Original Zone (For Limitorders)

7.1. Fresh Zone

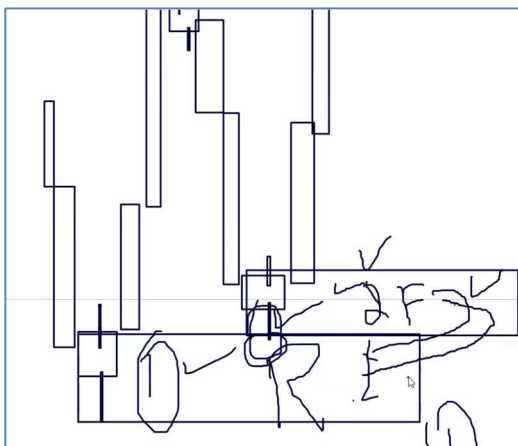

7.2. Retested Zone

- For the entry we need more confirmations. Retested Zones are dangerous
- After 3 Touches it can break

7.3. Multiple Zone (Hierarchical Zones)

- After a Fresh Zone was retested, can be created new Zone for a new trade

7.4. Original Zone

- Original Zones are similar to Fresh Zones but the different is, that original has no Zones in the past that causes the impuls.
- We use only Fresh and Original Zones
